LANDRETHS' SEEDS

THE D. LANDRETH SEED COMPANY gives no warranty, express or implied, as to the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants that it sends out, and it will not be in any way responsible for the crop.

LANDRETHS' SEEDS

No City Seedsmen possess the room at our command at the BLOOMSDALE FARMS.
Come and see it—it is just immense.

Hints to Mail Order Purchasers

TERMS CASH WITH ORDER.—Seeds sent to amount of remittance only; when prices fluctuate and postage or cost of bags is not provided for in remittance as required, orders will be modified accordingly, and customers can reorder the deficiency, as no accounts will be opened for small sums or balances resulting from short remittance. We guarantee to fill your order satisfactorily. In case of an error it will be cheerfully corrected.

REMITTANCE may be made in cash, by Express or Registered Mail, by Draft on New York or Philadelphia, or by Postal Money Order. Sums of fifty cents or less, in cash or stamps, may be sent by ordinary Mail at our risk. Postage stamps for any sum will be accepted where facilities for transmitting money by the above modes do not exist, but letters containing same should be registered, which costs twelve cents.

BY MAIL—POSTAGE PAID BY US.—The prices for small seeds (Peas, Beans and Corn excepted) quoted in this Catalogue include postage, paid by us. We do not pay postage on Peas, Beans and Corn because of their weight. If wanted by Mail, postage should be added to price quoted, at the rate of 16c. per quart on Peas and Beans, and 15c. per quart on Corn.

BY EXPRESS.—Moderate orders, too heavy or expensive for the Mails, or where quicker time than by freight is desirable, can be sent by Express to your nearest Express office. On **small seed** by Express we make a rebate of 8 cents a pound off these catalogue prices which include postage. This does not apply to orders for Peas, Beans and Corn. Charges in such cases are payable by the recipient. By special arrangement with all the Express lines in the United States and Canada, seeds and plants are now carried at a reduced rate of about 20 per cent. less than the merchandise rates when guaranteed by us. No goods sent C. O. D. without an advance sufficient to cover charges both ways. Onion Sets, Potatoes, Roots and other perishable goods will not be sent C. O. D., but will be sent only on receipt of full remittance and at risk of purchaser.

BY FREIGHT, R. R. or STEAMER.—Retail orders for heavy seeds, such as Peas, Beans, Corn, etc., can be shipped at lower rates of Freight by railroad or by steamer where practicable. All Freight and Express goods are delivered

by us to the Freight or Express office in Bristol, Pa., charges payable at destination.

ORDER EARLY.—It is better to have the seeds on hand a month early rather than wait one day when you need them.

GUARANTEE.—We guarantee all shipments of seeds to reach the purchaser safely and in good condition.

PACKAGE CHARGES.—When crates or barrels are required for packing Onion Sets, the following rates will be charged: **Crates**, 2 bush., 25c.; 1 bush., 15c.; $\frac{1}{2}$ bush., 12c. **Barrels**, holding 4 bushels, 30c. These package charges are extra and should be included in remittance.

MAKING OUT ORDERS.—We always make it a point to give orders our **immediate attention** as soon as received, a fact well known and appreciated by the thousands of customers deriving their supplies from us direct. The prompt execution of orders will be greatly facilitated if our customers will be careful to write on their order their **Full Name and Address**, the **Quantity**, **Name of Variety** and **Price** of the seeds wanted. (See Order Sheet enclosed.)

Orders with full address of customer should be written on a distinct sheet, apart from any necessary **inquiries**, which latter should be written on a **separate sheet**, to insure speed in filling orders in our packing department.

INQUIRIES as to methods of culture from correspondents who are not customers will receive attention only upon enclosure of 25c. in stamps accompanying same, which sum may be deducted when remitting us a subsequent cash order for Seeds amounting to One Dollar or more.

The practice of writing us from several post-offices is to be avoided. Change of residence should be communicated to us at once, to secure delivery of our current publications. If you want a Catalogue sent to your neighbors or friends, send us their addresses and we will put them on our Mailing List.

Space will not permit us to enumerate all the seeds and garden requisites we carry in stock. If you do not see **what you want**, write us and we will promptly give you prices and all other information.

INTRODUCTION

GARDEN SEED GROWING AND SEED SELLING

FOR its Seed supplies the whole world is now drawn upon by cultivators of gardens for table vegetables and ornamental flowers. This autumn of 1914, the European war has resulted in the absolute destruction in some parts of the unharvested Seed crops of 1914 and the burning up or waste of Seeds already saved, this being an irreparable loss so far as Seeds are concerned.

As to following crop of 1915, there has been a neglect to sow Seeds and to cultivate them in fields where they have been sown to produce biennial plants, as Cabbage, Beet, Turnip, Carrot and other similar things to make Seed a year hence. Really, the shortage in biennial Seeds a year hence will be more seriously felt when the time comes to purchase Seed for 1916 than at present, for the reason that other Seed-producing districts have not prepared for the emergency.

We will refer to the Seeds of those garden vegetables which only a little over one hundred years ago were, as a rule, grown within the boundaries of each country using them, but now a wider range of *varieties* is demanded, principally through the requirements of globe-trotters—men who have seen good things in other countries—until now lots of new things, and old ones, too, are procured from distant nations and are common on the vegetable, fruit and flower stands from the Atlantic to the Pacific.

Everything in the list of most desirable garden table vegetables can be grown somewhere in the United States, but it is not so with the Seed of many things, for, while the plants can be grown to an edible stage, the Seed, on the other hand, cannot be entirely developed to a profitable degree—that is, commercially profitable. For instance, take the Cauliflower head as used on the table and its Seed: two distinct processes of development, the Seed production subsequent to the edible product requiring peculiar climatic and soil conditions to complete its later and perfect development. This most delicious vegetable can be grown to perfection in some parts of nearly all countries, but the Seed, as to large quantities, taking a world-wide view, is grown principally in the vicinity of the Baltic and North Seas; a little elsewhere, but uncertain of development and profit.

To illustrate the world-wide spreading out of the Seed-growing interests will refer to the 150,000 pounds or more of Onion Seed annually grown in the Canary Islands off the coast of Africa, produced almost exclusively for the American market; also to the immense quantities of Garden Peas grown in Australia and New Zealand for the markets of Europe; to the most rapid development of Garden Peas growing in the Rocky Mountain valleys of Montana, Utah and Idaho, where snow-capped mountains look down all summer upon tens of thousands of acres of most delicate Pea vines, and to the almost fabulous cultures of Sweet Peas in California to furnish Seed for the ornamental gardens of the entire world.

Such being the world-wide distribution of Seed-producing districts, it can readily be perceived that all leading Seed merchants to a large degree are *assemblers* of Seeds, they or the still larger Seedsmen from whom they purchase drawing from all parts of the world, just as the large dry-goods merchant sells the products of the mills of many countries; but the supplies of the dry-goods merchant are not of such world-wide reach as those of a general Seedsman, who obtains his supplies not only from many of the States of the American Union, but in addition to which his supplies come from Mexico, Chili and Argentina; from nearly all the countries of Europe, as far as Russia on the north and Spain and Italy on the south; over the Mediterranean to Algiers; then far down to South Africa, New Zealand and Australia; thence over to Japan and China.

No Seedsman derives more than a small portion of the Seeds he sells, except he be a specialist, from local districts of his country, but necessarily purchases from the best and, sad to say, sometimes from the most unreliable Seed houses or Seed farmers, both in his own country and abroad.

It is just here why the Seeds sold by different Seed merchants vary so very greatly. Most Seed merchants are all the time intensely straining to get the cheapest Seeds so that they can sell cheaply, overlooking or ignoring the fact that cheap Seeds at once indicate inferiority. The expression "cheap and nasty" applies to Seeds more than to any other commodity.

Years ago, when a merchant or storekeeper selling Seeds obtained the larger quantity of his Seeds from neighboring farmer Seed growers or market gardeners in his vicinity, he could know something of the quality, he could visit the Seed fields, he could know something of the character of the men who grew the Seeds, but not now. That local source of supply is, as a rule, a thing of past history. Radish Seed, generally obtained from second or even fourth hand from the actual farmer, now is grown 4,000 miles east in Europe or 4,000 miles west in California; Peas grown probably in the valleys of the Rocky Mountains, possibly away off in New Zealand or in Argentina, and just so with other things. He has to

INTRODUCTION

rely upon the honesty of several parties not known to him—men passing the Seed along at various intervals through the chain of supplies—all making a profit in the transaction.

Even the highest prices do not assure the best Seeds, as there are Shylocks and grafters all along the line. Quality can only be partially assured by getting supplies from *experts* possessing a reputation for honesty; but often experts may themselves be deceived, for why should conditions governing the grade of Seeds, which pass through many hands before getting into the hands of the planter, be in a different category from drugs, of which everyone knows there are many grades? Using inferior drugs, the sick man is in his grave saying nothing; but using inferior Seeds, the planter six months after purchase may privately give way to more or less profanity every time he looks at his crops, and he cannot be blamed.

Very few Seed merchants have the knowledge from which countries to get the best, and then, when the country or district is determined upon, from what firms of Seed growers there to get the best, for the "Cheap Johns" are there, too.

It can readily be perceived that poor Seeds may not only be purchased by a small Seedsman, but by a big one, inexperienced in the details bearing upon Seed production.

Some curious errors have been presented to us in the purchase of Seeds, as, for instance, so-called European Seed has, when the bags were emptied out, exposed California labels, and the reverse—California Seed when dumped out has exposed European labels—just as in every other commodity of merchandise.

No one Seedsman has the bulge on all the rest, as the most insignificant may have the best Tomato or Sweet Pea, but it is *not likely* to be so, as those other Seedsmen of broader views whose horizon is earth-wide are, as a rule, most likely to have the best things, especially to have the most reliable all-round stocks. Certainly, they are likely to have in their heads a more valuable store of technical information. The old saw, "Don't send a boy to the mill," applies in the Seed trade as well as in some other lines of business.

Of all commercial businesses, the Seedsman as a merchant occupies a unique position, for he has only two seasons for selling—one in the spring of several months and one in the autumn of about one month. The rest of the year he is marking time, while the dry-goods man, the druggist, the grocer and the hardware man are busy all the time and their margins of profit on the aggregate largely beat the margins of profit of the larger wholesale Seed houses.

Where Seed-growing and Seed-selling conditions are understood, they represent a greater degree of technical information than is represented in most other lines of business, and, in addition, it is a business full of disappointments consequent upon failure of development of perfect plants and after that the failure of the plants to shoot to Seed or to perfect their Seed due to influences of soil or climatic conditions. There is no end to the disappointments consequent upon too much moisture or too little rain, too much heat or too much cold, hail, insects, fungus, out-door circumstances beyond the control of the Seed seller, especially as with the product of Seed from esculent vegetables the seasons of risks from the injurious influences named as pertains to the development of the perfect vegetable as produced by the private or market gardener are *just doubled* in the case of Seed production, for the reason that only after the full growth of the perfected vegetable follows another or distinct era in the life of the otherwise perfected vegetable—a period still more critical because after reaching its full growth the vigor of the plant is weakened and it is still more likely to be injuriously influenced by both natural and unnatural causes—all resulting in diminished Seed harvest and inability to fill orders.

But the Seedsman is always a robber, so some people think. Perhaps some Seedsmen are robbers—yes, we believe the public is sometimes right.

THIS CATALOGUE¹

is not worded after the almost stereotyped style of most seed catalogues nor displayed in type matter as other seed catalogues, but stands out by itself, as have all Landreths' Catalogues for one hundred and thirty-one years. In the history of the Landreths' Seed Establishment, Landreths' Catalogue from the earliest days has always been the best because it was so plain that a child could understand it from beginning to end, everything easy to find, the illustrations most accurate and the descriptions and advice practical by practical men.

The Landreths are not only always ready to advise, but are pleased to be asked for their views on any agricultural subject. Consequently, do not hesitate to ask any question connected with the Seed business. It makes no difference to us whether you are a customer of ours or not.

"THE LANDRETH SOCIETY OF POSITIVE RESULTS"

A SQUARE DEAL

By purchasing Landreths' Seeds you get Quality for Currency—not ALWAYS the case when purchasing Seeds

¶ The Landreth Seed-Growing Establishment is the oldest in America, founded in Philadelphia, 1784, and has for this long period held a most enviable reputation not only in the American Seed trade, but in the Seed trade of the world.

DAVID LANDRETH 1ST
FOUNDER OF THE
SEED BUSINESS AT
PHILADELPHIA
1784—131 YEARS
AGO

¶ Landreths' Bloomsdale Seed Farms are known as the home of **SEEDS which SUCCEED**. They are sold in nearly every country on the globe.

QUALITY

At last the Seed-buying public has awakened to the very serious error of measuring the value of Garden Seeds by their outward or current price instead of their inward or intrinsic merits. We say this because the intelligent buyer is now certainly demanding **QUALITY**.

It would seem that the "Cheap Johns" have had their day, as we have from all directions not only very positive expressions to that effect, but repeated inquiries if the low prices quoted by some merchants do not unmistakably indicate careless Seed growing, in other words, unreliable stocks of Seeds. To such inquiries we reply, Certainly, **good** Seeds cannot be grown as cheaply as **poor** Seeds.

Many correspondents spelling **Quality** with a big Q say they cannot afford to take any risk as to an inferior grade of Seed, as they have had their fingers burned before, that the first cost of Seeds compared with the returns is as a drop of water in a bucketful.

QUALITY has always been our aim in Seed growing, and the **QUALITY** of Seed should always be in the mind of Seed buyers, as they cannot afford to risk their land and labor, their hopes of profit, by the purchase of Seeds because they are cheap. **SUSPICION MUST ALWAYS BE DIRECTED AGAINST CHEAP THINGS, PARTICULARLY AGAINST CHEAP SEEDS.**

Many cheap things can be scrutinized before purchasing, but dry Seeds give no indication whatever of their merits or demerits.

The Seed buyer has been fooled too often, consequently order Landreths' Seeds and sleep without rocking.

Some advertising people say no merchant can succeed unless he tells the public what he has to sell. This being quite correct, this book is designed for that purpose, and it will be found to be both accurate in its descriptions and practical in its hints as to cultivation.

Landreths' Selection of Pedigree Seeds

This is not simply a business refrain, for **Selection** is a practical factor in successful Seed growing.

No stocks of Garden Seeds are grown from such well-bred Mother Seeds put into the ground, and afterwards during growth no growing crops are so intensely looked after.

Perhaps you do not know Landreths' Seeds.

If reliability is what you are after, use Landreths'.

Some Useful Information

Quantity of Seed to Sow a Single Row of 100 Yards

Asparagus.....	8 oz.	Corn.....	1 pt.	Onion.....	8 oz. for sets.
Beans, Bush.....	3 qts.	Cress.....	4 oz.	Parsley.....	2 oz.
Beans, Lima.....	3 pts.	Cucumber.....	4 oz.	Peas.....	3 qts.
Beans, Pole.....	3 pts.	Egg Plant.....	1 oz.	Pepper.....	1 oz.
Beet.....	5 oz.	Endive.....	2 oz.	Pumpkin.....	2 oz.
Broccoli.....	1 oz.	Kohl.....	2 oz.	Radish.....	6 oz.
Brussels Sprouts.....	1 oz.	Leek.....	2 oz.	Rhubarb.....	4 oz.
Cabbage.....	2 oz.	Lettuce.....	2 oz.	Salsify.....	4 oz.
Carrot.....	3 oz.	Melon, Water.....	3 oz.	Spinach.....	6 oz.
Cauliflower.....	1/2 oz.	Melon, Citron.....	2 oz.	Squash.....	3 oz.
Celery.....	3 oz.	Mustard.....	4 oz.	Tomato.....	1 oz.
Collards.....	2 oz.	Okra.....	12 oz.	Turnips.....	3 oz.
		Onion.....	2 oz. for large bulbs.		

The thoughtful cultivator will provide himself with a *surplus quantity* of the seeds he designs to plant, to hold as a reserve for replantings, as dry weather, beating rains and insect depredations often destroy the first sowings. A necessary precaution.

An Estimate of Seed and Number of Plants Requisite to Crop an Acre in Any One Variety

It will be noticed that these quantities are in some instances in excess of what will be actually required, but are given to insure a full stand; it is poor economy to stint the quantity of seed.

Asparagus plants @ 4 x 1/2 ft.	5000	Corn Salad in drills @ 10 inches, large seed.....	25 lbs.	Onion in rows to make large bulbs.....	6 lbs.
Barley.....	2 1/2 bush.	Cucumbers in hills @ 3 x 4 ft.....	4 lbs.	Parsnips in drills @ 2 1/2 ft.....	10 lbs.
Beans, Bush, in drills @ 2 1/2 ft.....	1 1/2 bush.	Cucumbers in drills.....	5 lbs.	Pepper plants, 2 1/4 x 1 ft.....	17,500
Beans, Pole, Lima, @ 4 x 4 ft.....	20 qts.	Egg Plant, plants, 3 x 2 ft.....	5 oz.	Pumpkin in hills, 8 x 8 ft.....	4 qts.
Beans, Carolina, Prolific, etc., @ 4 x 3 ft.....	10 qts.	Endive in drills @ 2 1/2 ft.....	4 lbs.	Parsley in drills @ 2 ft.....	5 lbs.
Beets and Mangolds in drills, @ 2 1/2 ft.....	12 lbs.	Flax, broadcast.....	2 bush.	Peas in drills, short varieties.....	2 bush.
Broom Corn in drills.....	12 lbs.	Grass, Timothy with Clover.....	6 qts.	Peas in drills, tall varieties.....	1 to 1 1/2 bush.
Cabbage sown in outdoor beds for transplanting.....	16 oz.	Grass, Timothy without Clover.....	10 qts.	Peas in drills, broadcast.....	3 bush.
Carrot in drills @ 2 1/2 ft.....	8 oz.	Grass, Orchard.....	50 lbs.	Potatoes.....	10 bush.
Celery seed.....	4 lbs.	Grass, Red Top or Herds.....	40 lbs.	Radish in drills @ 2 ft.....	6 lbs.
Celery plants @ 4 x 1/2 ft.....	8 oz.	Grass, Blue.....	40 lbs.	Rye, broadcast.....	2 bush.
Clover, White Dutch.....	25,000	Grass, Rye.....	30 lbs.	Rye, drilled.....	1 1/2 bush.
Clover, Lucerne.....	10 lbs.	Grass, Millet.....	32 qts.	Salsify in drills @ 2 1/2 ft.....	15 lbs.
Clover, Alsike.....	12 lbs.	Kale, German Greens.....	5 lbs.	Spinach, broadcast.....	30 lbs.
Clover, Large Red with Timothy.....	6 qts.	Lettuce in rows @ 2 1/2 ft.....	3 lbs.	Squash, Bush, in hills 4 x 4 ft.....	4 lbs.
Clover, Large Red without Timothy.....	16 lbs.	Leek in rows @ 2 1/2 ft.....	4 lbs.	Squash, Running, in hills 8 x 8 ft.....	3 lbs.
Corn, Sugar.....	10 qts.	Lawn Grass.....	100 lbs.	Sorghum.....	4 qts.
Corn, Field.....	9 qts.	Melons, Water, in hills 8 x 8 ft.....	4 lbs.	Turnips in drills @ 2 ft.....	2 lbs.
		Melons, Citron, in hills 5 x 5 ft.....	4 lbs.	Turnips, broadcast.....	3 lbs.
		Oats.....	2 bush.	Tomatoes in frame.....	2 oz.
		Okra in drills, 2 1/2 x 1/4 ft.....	25 lbs.	Tomatoes, seed in hills 4 x 4 ft.....	8 oz.
		Onion in beds for sets.....	70 lbs.	Tomatoes, plants.....	3800
				Wheat in drills.....	1 1/4 bush.
				Wheat broadcast.....	2 bush.

Pedigree Seeds by Mail

The above is an illustration of how the Rural Delivery wagons carry Landreth's Seeds to the farmhouse door

DOES YOUR MERCHANT HANDLE LANDRETH SEEDS?

If he don't, then write to Bloomsdale, as the United States rural delivery carries Landreth's Seeds to every man's door. United States Money Orders can be obtained at almost every Post Office. They cost—

For Orders for sums not exceeding \$2.50.....	3 cents.	If over \$30.00 and not exceeding \$40.00.....	15 cents.
If over \$2.50 and not exceeding 5.00.....	5 "	" 40.00 " " 50.00.....	18 "
" 5.00 " " 10.00.....	8 "	" 50.00 " " 60.00.....	20 "
" 10.00 " " 20.00.....	10 "	" 60.00 " " 75.00.....	25 "
" 20.00 " " 30.00.....	12 "	" 75.00 " " 100.00.....	30 "

The D. Landreth Seed Company welcomes a comparison of prices, provided there be at the same time a comparison of QUALITY, which varies just in proportion to any variation in price.

Write out your Seed Order at the prices of this Catalogue, which are inclusive of postage on all small seeds, but not on Peas, Beans and Corn, then go to the Post Office and purchase a Money Order payable to the D. Landreth Seed Company.

FOREIGN POSTAGE ON SEEDS

We solicit orders for Seeds from PRIVATE INDIVIDUALS, MARKET GARDENERS and MERCHANTS in foreign countries.

The rate of postage on Seeds to all the countries, colonies and towns named below is the same—12 cents per pound, and the limit of weight of a single package is the same to all the countries named—11 pounds to a package.

The list of countries in the postal agreement is:

AUSTRIA, including the Austrian offices in the Ottoman Empire at

Alexandretta,
Beyrout,
Caifa Candia Canea,
Cavalla,
Chios,
Dardanelles,
Durazzo,
Ineboli,
Jaffa,
Janina,
Jerusalem,
Kerasonda,
Messina,
Mytilene,
Prevesa,
Retimo,
Rhodes,
Salonica,
Samsoun,
San Giovanni di Medua,
Sante Quaranta,
Scutari,
Smyrna,
Trebizond,
Tripoli (Syria),
Valona,
Vathi (Samos),

BELGIUM,

CURACAO, including

Aruba,
Bonaire,
Saba,
St. Eustatis,
Dutch part of St. Martins,

DENMARK, including

Faroe Islands,
Iceland,

DOMINICAN REPUBLIC,

DUTCH GUIANA,

FRANCE, excluding

Algeria,
Corsica,

GERMANY, including

Cameroon,
Toga,
East Africa,
German Samoa,
German Southwest Africa,
Protectorate of Kiowchow,
Certain other Postoffices in China,

GREECE,

GUADELOUPE, including

Marie Galante,
Desade,
Les Saintes,

GUADELOUPE, including

St. Bartholomew,

NETHERLANDS,

NEWFOUNDLAND,

NORWAY,

PANAMA.

International Money Orders can be obtained at the Post Offices of all the above countries, and every order for Seeds must be accompanied by a Postal Order made out at the prices of this Catalogue.

TO BE SATISFIED ORDER FROM LANDRETH

The illustration, from a photograph, is of 20 sorts used in our high-priced Lawn Grass Mixture, the varieties so radiating out from a common centre that they may be observed and compared from one position.

PER SINGLE POUND WE PAY POSTAGE.

Landreths' Lawn Grasses

80 TO 100 POUNDS SEED TO THE ACRE

*For Parks, Croquet and Tennis Grounds, Cricket, Golf, Athletic Fields
or Private Yards*

THE LANDRETH LAWN GRASS MIXTURE which we offer should not be compared with the cheaper preparations advertised. Our prescription is of the best chosen varieties as respects color, texture and permanency, and will be found clear of weed seeds. We have all of the Special Formulas of City Parks, Squares, Golf Links, etc. Grass Seeds mixed to order to suit locality.

Landreths' Never Die Grass

FOR SURFACE EFFECT

This prescription consists of 100 parts, divided in such proportions between those Grasses which our observation has indicated as best for general park effect, as respects color, density of herbage, vigor, quick recuperation after mowing and permanency. The seeds used are well cleaned, and we believe them to be pure and full of vitality, and all persons using them are certain to secure a stand, provided the land be properly prepared and the seed sown at the proper time and at the right depth, and provided there be sufficient rainfall to germinate the seed. We cannot be responsible for the errors of the inexperienced.

Prices are all by the pound, **One Hundred Pounds** being required to seed an acre, which equals a space of 70 yards long by 70 yards wide, making 4900 square yards, or its equivalent, no matter what the shape is. 1 lb. for space of 20 x 20 feet, or 400 square feet.

At single pound rates we prepay postage. At the rate per 100 lbs. or peck and bushel, the seeds will be shipped by Express or Freight at expense of purchaser.

Landreths' Never Die	Lb. 35c. including postage	Bush. 20 lbs. \$4.50	100 lbs. \$18.50
Superior	" 38c. " "	" " 5.50	" 24.00
Extra Special	" 40c. " "	" " 6.00	" 28.00

SEEDS WHICH SUCCEED

GRASS SEED MIXTURES—Continued

Grass to Resist Tramping on ATHLETIC Grounds (Baseball Parks)

This prescription is also of 100 parts, but differs from our Park Lawn Grass in the list of varieties, a proportion of such sorts being here added as to better stand the wear and tear of tramping consequent upon games of Tennis, Cricket, Lacrosse and Baseball. A pound will sow a space 20 x 20 feet, or 400 square feet. Eighty pounds will sow an acre, but we recommend 100 pounds.

Popular.....	Lb. 35c., including postage	Bush. 20 lbs. \$4.50	100 lbs. \$20.00
Extra Special.....	" 40c. " "	" " 6.00	" 25.00

GOLF LINKS—For the Course

This produces a soft, dense and uniform turf, except where influenced by soil conditions which are certain to vary somewhat on an extended course.

Popular.....	Lb. 40c., including postage	Bush. 20 lbs. \$6.00	100 lbs. \$25.00
Extra Special.....	" 50c. " "	" " 8.00	" 35.00

GOLF LINKS—For the Putting Green

This will make a velvet or carpet-like sward.

Popular.....	Lb. 40c., including postage	Bush. 20 lbs. \$6.00	100 lbs. \$25.00
Extra Special.....	" 50c. " "	" " 8.00	" 35.00

Grass for SHADY Places

Landreth's mixture of varieties produces a reliable stand under dense shade of either pine or hardwood trees in positions where all other Grasses may have failed. Eighty pounds should be sown to the acre—or say one pound on a space 20 x 20 feet, or in proportion for other dimensions.

Grass for Shady Places.....	Lb. 45c., including postage	Bush. 20 lbs. \$6.50	100 lbs. \$30.00
-----------------------------	-----------------------------	----------------------	------------------

Southern Winter Lawn Grass

For sowing in the Autumn to make a green sod all Winter.

Price, including postage, 25 cts. per lb.
By Express, per 100 lbs., \$12.00

White Clover

White Clover is just the thing to sow on a bare spot in the yard or lawn where a very quick green covering is desired, as it will cover better in ten days' time than grass seed will cover in two months. Sow one ounce, costing 15 cts., to the square yard and larger areas in proportion. Have you a bare spot on your grounds? If so, then try White Clover.

Per oz., 10 cts., including postage Lb., 60 cts., including postage
By Express, not prepaid, 50 cents per pound

Grass for DRY SOILS

We offer a variety which grows under conditions of drought when all others fail.

Per lb., including postage, 30 cts. Bush. 20 lbs. \$4.50 By Express, 100 lbs., \$20.00

SALT

The leading reason why lawns of seaside places are so luxuriant is because the soil is constantly damp. This to a certain extent can be duplicated anywhere by applying an annual dressing of salt at the rate of five bushels to the acre, which will always influence a deposit of moisture and to a certain extent approximate to the condition of seaside places.

PERMANENT GRASSES AND FARM GRASS SEEDS, see pages 9 and 10

AN EXPLANATION AND A CAUTION

Grass Seed Lawn Mixtures

To an inexperienced man the question naturally arises, What is Mixed Lawn Grass? What do the words *mean*? A response can be made that possibly it may be simply a *mixture* of two of the twenty or thirty distinct varieties of Grass recognized as suitable for lawn decoration or it may be a complete *mixture* of the entire twenty or thirty or it may be a *mixture* of only three or four of them, or an article sold as Mixed Lawn Grass may not be a mixture in any sense—it may be only one variety—often deceptively is only one sort.

If only one sort is used, of course it follows it is *not a mixture*, but this single variety may be Kentucky Blue Grass, which is the basis for all good mixtures, a variety succeeding best in the interior or away from a salt atmosphere, really doing best on limestone soils; or, sold by some other seedsman, it may be Rhode Island Bent, so popular in localities of intense salt-water atmosphere, as, for example, the famous lawns at Narragansett and Newport; or it may be ordinary six-cent Red Top or Herds. It often is. There is opportunity for all sorts of fraud.

The lawn maker may use a single sort, confining himself to those single but very high-priced sorts, Kentucky Blue or Rhode Island Bent; but it has time after time been clearly demonstrated that a judicious mixture of three or four or even six or seven varieties makes a quicker sod and gives the best results in the long run, as if all expectations are dependent entirely upon one sort, it may subsequently be made clear to the observer that the particular variety, whether chosen almost at random or after much consideration, was not suited to the special soil or climate or the particular variety so chosen may fail to please the fancy of the lawn maker because of some material habit of growth or color.

Even if the one variety does entirely suit on some soils at certain seasons of the Spring, Summer or Autumn when for some months the one particular variety will be in best condition, the lawn maker may be disappointed with its want of vigor at *other* seasons when the chosen sort appears to hibernate rather than to flourish; consequently a *mixture of several* varieties is desirable, these being sorts choice in the appearance of foliage, sorts having different seasons of full development or continued periods of growth, sorts possessing different degrees of staying qualities as respects resistance to natural encroaching grass, sorts resisting the effects of too much or too little rain, sorts of different degrees of adaptability to variations of soils.

A *mixture* of such sorts proves much better than reliance upon one sort, as by sowing mixed Grass the risks are diversified.

We have known people to order a mixture of Grass Seed and after getting the seed seem disappointed that it did not look all alike, seeming to forget that the word *mixture* implied a number of varieties, forgetting that seeds of different varieties are of different shape, size, weight and color.

No two seedsmen who make mixtures follow the same prescription. Nobody should attempt to make a mixture except those who have made a study of the subject.

All clear-thinking men will observe that the purchase of

Mixed Lawn Grass

is entirely a matter of confidence on the part of the buyer, whether he is a merchant or a gardener, and that the method of mixing, as to varieties and proportions of each, is a matter of honesty and ability on the part of the mixer.

We sell Mixtures by the hundred pounds, and not by *measure*, puffed up by worthless chaff or hulls, often purchased by mixers of Lawn Grass at a price of two cents per pound, and used *entirely for the making of bulk* and the cheating of the public, for chaff is no good, and it is time this fraud was stopped; if not stopped by public opinion, then stopped by law.

Finally we will add that in no class of any kind of Seeds is there so much deception as in Mixed Lawn Grass—the doors for deception are wide open. The purchaser of any mixed article, whether it be Grass Seed or Coffee, at once agrees to an opening of the door to an extent of fraud equal to any evil intent of the mixer. The purchaser cannot complain of the parts or proportion of parts of an unknown mixture; he buys it just as it is, he does not know the combination. Yet no large operator is going to divulge the parts of his mixture—that is a trade secret. The purchaser is at the mercy of the mixer, and the mixer's honesty of purpose alone is the only guarantee of the quality he will deal out to the buyer.

We regret to say that the average mixture of Grass Seed does not make a well-balanced combination of valuable sorts succeeding each other, for the average mixer of Mixed Grass Seed knows just nothing about varieties, his sole aim being to make the lowest cost mixture to sell at the biggest price.

Landreth's Lawn Grass Mixture, according to its name or grade and for the **purpose intended**, is composed of many varieties put in as suitable for the purposes named, as

For Surface Effect on the Lawn,
For Baseball Grounds,
For Golf Links,

For the Putting Green,
For Shady Places,
For Dry Soils,

For Winter Lawn Grass.

FARM PASTURAGE GRASSES

Landreths' Pasturage Grass Mixtures

On small quantities by mail Postage will be extra, at the rate of 8 cents per pound.

The preparation of the land for permanent pasture is a labor that must not be slighted, and though farmwork cannot be reduced to the nicety of lawn culture, we nevertheless direct attention to our directions on lawn making, and would say that the nearer the directions are followed the greater the probability of success. It must, however, be borne in mind that a pasture sod cannot be obtained in one year.

Permanent Pastures—Landreths' Mixtures of Grass Seeds

	100 Lbs.	Lb.
FOR HEAVY SOILS. —Eighty pounds to the acre. This prescription consists of 100 parts of such Grasses as experience has indicated is productive of herbage and most durable on heavy soils	\$20 00	30
FOR LIGHT SOILS. —Eighty pounds to the acre. This prescription of 100 pounds divided into proportions between such varieties of Grasses as proved by experience to be the best adapted for light soils, both as respects the amount of leafy product and permanence	20 00	30
For all mixtures for Pasture we recommend a multiplication of varieties, all having more or less distinct seasons of development, bringing about a continuity of verdant growth.		

POSTAGE INCLUDED.

Clover Seeds

100 LB. PRICES
ON APPLICATION.

WHITE DUTCH CLOVER (<i>Trifolium Repens</i>).—Not a heavy producer of hay, but invaluable in permanent pastures. Will grow on any soil, but luxuriates in damp locations and in damp seasons. It is very persistent in growth on rich soils, affording rare feed, but on thin soils will not succeed. Sow 12 lbs. to the acre.	Lb.	60
ALFALFA OR LUCERNE (<i>Medicago Sativa</i>).—In localities where it flourishes this is one of the most valuable among the Clovers. Standing for years, shooting its roots downward till they are ten to fifteen feet below the surface, it resists the driest weather, and when every blade of Grass droops for want of moisture, it holds up fresh and green as in genial Spring. It does not succeed on compact clay or on land with impermeable subsoil. Far from exhausting land, it increases fertility, as has been fully established. Cattle pastured upon Alfalfa are apt to eat off the crowns, consequently the best practice is to cut it and stall-feed the animals. Sow 10 lbs. to the acre		30
ALSIKE CLOVER (<i>Trifolium Hybridum</i>).—The earliest large Clover. Possibly a hybrid between the Red and White, possessing qualities common to both; productive, sweet, extremely valuable both for pasturage or soiling. Clover-sick lands will sometimes produce fine crops of Alsike, which lands, after three years in Alsike and an intermediate grain crop, will again produce Red Clover. The flowers are a distinct light pink, and afford fine pasturage for bees. This Clover seeds itself freely the first year and every year, and does well as far north as Canada. This is sometimes added to pasturage mixture. Sow 12 lbs. to the acre		35
RED CLOVER, MAMMOTH. —On rich, loamy soils this variety, if the seed be true to name, develops twice as much bulk of stem and leaf as the common Red. Consequently it is very valuable as a fertilizer. It is a plant of longer life than the common Red Clover, and earlier to start a Spring growth.		
RED CLOVER (<i>Trifolium Pratense</i>).—This is the most widely cultivated of the pastoral plants; loosening the soil and admitting the air and drawing up and storing away near the surface the valuable principles scattered in the earth beneath, it is regarded as one of the best of vegetable fertilizers, as well as a cattle food of the highest merit. Its luxuriant foliage, by shade, increases the fertility of the earth and smothers noxious weeds. It is a lime plant and does well on stiff loams. Sow 16 lbs. to the acre.	Prices on application.	About 30c., including postage.
Extra Superior No. 2 Grade.		
CRIMSON CLOVER (<i>Trifolium Incarnatum</i>).—This Clover is very popular, being a valuable addition in economical farming, that is to say, it produces such a mass of top and such a mass of root that it is very valuable as a soil restorer. The seed may be sown any time from May to October. If sown early, the first growth is available in the Autumn, and will make a good crop of hay the following Spring; or it may be turned under early in the Spring, preceding Corn or other crops. It roots very deeply and collects a large amount of nitrogen and potash. Cattle are fond of the hay, which should be cut as soon as in full bloom; but the plant is principally used for ploughing under as a green crop. The quantity sown to the acre is 15 lbs. broadcast. Write for price per 100 pounds. Price, per single pound, including postage		25

BLOOMSDALE

The land, level as a Western prairie, presents everywhere clear-cut methods and intensity in the execution of the same to a most complete finish, the whole illustrating a style of culture the like of which is elsewhere seen only in Europe. These remarks apply to the three Landreth farms, on all of which is produced a grade of Seed more perfect, as respects shape, color and general development, than produced by other growers not so severely critical in ferreting out and removing every plant showing signs of departing from the true types.

The D. Landreth Seed Company do not profess to grow all the Seeds they sell, as that would require an immense acreage, but they do grow their choicest grades, all of which, now and hereafter, will be indicated as Landreths' Cabbage, Landreths' Beet, and which, consequent upon the critical attention and labor given them, are priced at a value higher than less carefully selected stock.

Lawn Grasses on pages 6 to 8

★ Prices Fluctuate.

GRASS SEED

★ Postage included in pound prices. 100 pound lots, by freight or express, not prepaid.

BROMUS INERMUS.—A strong-growing Grass of the arid plains of Russia, thriving on lands too dry for other sorts. When grown on good soil it yields enormous crops. Its habit is to make strong tufts and to hold its color till after hard frost. Its vigorous character makes it a good Grass for embankments. Its foliage is like Rye, long, straight, broad, soft, light in color. Stronger than Orchard Grass. The seed stalks reach 2 to 4 feet in height, closely set with long leaves. The seed is borne after the manner of Oats. Sow 40 lbs. to the acre. 100 lbs. \$18.00 . . . per lb. 32c.

BENT GRASS, RHODE ISLAND (*Agrostis Canina*).—Resembles Herds Grass, forming a fine tuft even on thin soils. Doing especially well in salt atmospheres. The only lawn Grass used at Newport. So similar to Herds Grass as to be almost indistinguishable. Sow 40 lbs. to the acre. 100 lbs. \$33.00 . . . per lb. 42c.

BENT GRASS, CREEPING (*Agrostis Stolonifera*).—Known in England as Florin; a good soil binder, does well on damp land. The favorite lawn Grass in England, as unequaled by any other. Very similar to Blue Grass but of stronger growth. Sow 30 lbs. to the acre. 100 lbs. \$33.00 . . . per lb. 42c.

BLUE GRASS, CANADA (*Poa Compressa*).—For dry soils, sow 35 lbs. to the acre. 100 lbs. \$15.00 . . . per lb. 25c.

BLUE GRASS, KENTUCKY (*Poa Pratensis*).—This is a pasture Grass of high merit, the earliest to start in Spring and continuing green far into the Winter. Though it makes fine quality hay, it is not to be recommended for that purpose, being a light cropper. Its uniform growth and its beautiful habit and color make it desirable for lawns. It requires more time than other Grasses to become established, but is the longest living of all. It flourishes best in limestone lands. Roots of creeping habit, overpowering weeds. Only flowers once a year. Sow 30 lbs. to the acre. 100 lbs. \$18.00 . . . per lb. 30c.

CRESTED DOG-TAIL (*Cynosurus Cristatus*).—Foliage deep green, lustrous, long, narrow, soft; a deep rooter. A fine lawn Grass, invaluable in pastures. Sow 25 lbs. to the acre. 100 lbs. \$31.00 . . . per lb. 40c.

FESCUE GRASS, HARD (*Festuca Duriuscula*).—Does well on damp ground or in salt atmosphere; good for pasturage; retains its green color during drought. Sow 30 lbs. to the acre. 100 lbs. \$25.00 . . . per lb. 35c.

FESCUE GRASS, MEADOW (*Festuca Pratensis*).—The English Bent Grass. A permanent Grass of good quality; grows well in nearly all situations, wet or dry, hill or bottom land. Has round, smooth stems, two or three feet high, lustrous deep green leaves. In mountain lands of Virginia said to grow six feet high, foliage broad. The numerous fibrous roots penetrate good soil twelve to fifteen inches; makes good hay; also a permanent pasture, especially in the South. Sow 40 lbs. to the acre broadcast. 100 lbs. \$30.00 . . . per lb. 40c.

FESCUE GRASS, SHEEP'S (*Festuca Ovina*).—Most diminutive of cultivated Grasses, leaves narrow or hair-like, grows in tufts, does well on dry soils or on rocky ledges, used in lawn Grass. Sow 35 lbs. to the acre. 100 lbs. \$24.00 . . . per lb. 35c.

FOX-TAIL, MEADOW (*Alopecurus Pratensis*).—Resembles Timothy, but two weeks earlier to cut for hay; very hardy, does well under shade, large leaf producer. A spreading perennial of high favor in Europe; one of the earliest and best Grasses for permanent pasture. Habit coarse, but suitable for park purposes. Succeeds best on well-drained, rich, loamy or clayey soils; makes excellent hay and should be included in all permanent pastures. Better for pasturage than for hay. Its merits are earliness, quality and quantity. Sow 25 lbs. to the acre. 100 lbs. \$35.00 . . . per lb. 40c.

HERDS, OR RED TOP GRASS (*Agrostis Vulgaris*).—A good perennial Grass, generally sown on permanent pastures. It succeeds Clover and Timothy when they have died out. Does well on any soil, but best on moist land. Sow 40 lbs. to the acre. 100 lbs. \$18.00 . . . per lb. 25c.

MEADOW GRASS, ROUGH STALK (*Poa Trivialis*).—Resembles Blue Grass; used in England for lawns. Will flourish in dripping situations. Sow 30 lbs. to the acre. 100 lbs. \$40.00 . . . per lb. 55c.

MILLET, PEARL OR CAT-TAIL.—Very productive. Drill in two-foot rows. Sow 10 lbs. to the acre. 100 lbs. \$12.00 . . . per lb. 20c.

MILLET, GERMAN (*Panicum Germanicum*).—This is an improvement on Hungarian Grass if cut just as the leaves are turning. Under some circumstances it will yield half as much more to the acre. On Bloomsdale Farms, on one occasion, we cut thirteen tons of dry, clean hay from three acres. Sow 50 lbs. to the acre. Per bush., \$2.75 . . . per lb. 20c.

MILLET, HUNGARIAN (*Panicum Hungaricopsis*).—An annual forage plant of celebrity. It germinates readily and withstands drought. It has numerous succulent leaves, broad and over a foot in length, the plant in strong soil reaching a height of three feet. Cut early it makes an excellent hay, but left to ripen seed it becomes hard and woody. Sow 50 lbs. to the acre. Per bush. \$2.50 . . . per lb. 20c.

MIL O MAIZE, OR GUINEA OR DHOURA CORN.—Thrives in driest localities, can be cut several times a season. Sow 6 lbs. to the acre . . . per lb. 20c.

KAFFIR CORN.—One of the non-saccharine sorghums. Drill in rows, cultivate like Corn; blades make good fodder. Sow 10 lbs. to the acre . . . per lb. 25c.

ORCHARD GRASS, OR ROUGH COCKSFOOT (*Dactylis Glomerata*).—One of the most valuable of all the cultivated Grasses, blooming with the Red Clover and making with it an admirable hay. As a pasture Grass it is more productive than any other and does best under close feeding. It recovers rapidly. It stands drought better than any other Grass, keeping green and growing when others are dried up. In Summer it will grow more feed in a day than Blue Grass will in a week. Sow 50 lbs. to the acre. 100 lbs. \$20.00 . . . per lb. 30c.

RYE GRASS, ITALIAN (*Lolium Italianum*).—This is a variation of the Perennial Rye Grass, being much earlier and far more rapid in growth, producing larger leaves, more succulent food and three times as much of it; it is not as durable. The leaves are long and soft; the foliage is a rich green, resembling Rye, but lighter in color than the Perennial Rye Grass. It makes a great show, developing from seed the quickest of any of the valuable Grasses. Is a stronger feeder, enduring any amount of irrigation or manure. Succeeds best in moist soil, and in such is the best Grass for soiling, affording repeated luxuriant and nutritious crops. Sow 30 lbs. to the acre. 100 lbs. \$11.00 . . . per lb. 20c.

PERENNIAL RYE GRASS (*Lolium Perenne*).—Long a standby among the best farmers in England. Leaves long, narrow and fine. Darker in color than the Italian, not more than half as large, and slower to develop. Cut when in blossom it makes fine hay and abundantly, but not equal to Orchard. It requires a moist climate, and in such stands for six or seven years. Perennial Rye Grass will resist overflow, and does well on sloping banks, as its roots are very fibrous and mat-like. It revels on deep tenacious soils. Sow 30 lbs. to the acre. 100 lbs. \$11.00 . . . per lb. 20c.

SORGHUMS.—There are several groups: Those variously known as Milo, Durra, and Kewliang being principally grown for grain, for cattle and poultry feeding, while the Kaffirs are grown principally for forage. Prices fluctuate: each about . . . per qt. 40c.

TIMOTHY (*Phleum Pratense*).—As a Grass to cut for hay this is unsurpassed. It is coarse if allowed to ripen seed, but if cut in the bloom is bright and highly nutritious. If sown with Clover, as is often practiced, it has to be cut before development, being later, and thus there is a loss in returns. It does best on loamy soils. It is a large producer, two or three tons of hay being frequently made. Sow to the acre, if sown alone, 15 lbs. Per bush. (45 lbs.), \$3.50 . . . per lb. 10c.

SWEET-SCENTED VERNAL GRASS, PERENNIAL (*Anthraxanthum Odoratum*).—One of the earliest in Spring and latest in Autumn. It is almost the only Grass that is fragrant, and to its presence our hay fields owe much of their charm. Sow 25 lbs. to the acre if sown alone. Per oz. 10c. . . per lb. 80c.

VICIA VILLOSA (*Hairy Vetch*).—A native of Russia. All animals eat it, both green and cured. Difficult to cure; mostly used for feeding green, for silos, and for plowing under as a manure. Analysis demonstrates the plant to be of high value. It does not flourish in wet lands, but needs considerable rain during its early growth. Broadcast two bushels to the acre in September and October in the South, and in April in the North. This plant sown in August, September or October, in States south of the latitude of the Potomac, has given admirable results as a pasture plant in early Spring and for mowing in April for the making of hay. Price per 100 lbs. on application . . . per lb. 25c.

FLOWER SEEDS

Names both Botanical and Common

Prices are per Packet and Generally Five Cents

The Flower Seeds offered by Landreth are the best of their kind and in their range of varieties cover the most desirable sorts. Yet varieties not named in this list are carried by Landreth and can be had on application.

(Prices per packet)

ACROLINIUM

Showy annuals with pink and white everlasting flowers.

Double Mixed..... 5

AGERATUM

Of easy growth, flowers abundantly out-of-doors in Summer and up until frost, or in greenhouses in Winter; therefore very desirable for bouquet-making. A bed with the centre of *Salvia splendens* and border about 18 inches wide of blue *Ageratum* will make a dazzling sight for 90 days.

Mexicanum.—White..... 5

Conspicuum.—White. Half-hardy annual. 18 in. 5

Dwarf Mixed.—Three colors. 18 in.....Oz., 40c.; 5

Imperial Dwarf Blue Tom Thumb.—9 to 12 in. 5

AQUILEGIA (Columbine)

is among the most beautiful and curiously formed of hardy perennial flowers. Blooms in the early Spring and Summer for 60 days.

Hybrida.—Single mixed. 2 feet. All colors.... 5

Hybrida.—Double mixed. Very curious..... 5

ALYSSUM, SWEET

Flowers from June to November, and all Winter in-doors. Is fragrant. Makes a very pretty border; fine for carpet bedding, baskets, pot plants and in making small bouquets. Cut back when through flowering and will bloom again. Annual. Blooms for 60 days.

Maritimum (Sweet).—White. 8 to 12 inches. Oz., 40c.; 5

(Prices per packet)

Benthami compactum procumbens (Little Gem).—Very suitable for border and pot work. 6 inches.....Oz., 40c.; 5

Alyssum, Sweet—An old-fashioned flower, but still as great a favorite as ever

(Prices per packet)

Snapdragon or Antirrhinum

ANTIRRHINUM (Snapdragon)

is a showy hardy perennial, blooming in August if sown early and then on till killed by frost. Among the most showy and brilliant border plants; succeeds in any good garden soil. By cutting off most of the flowering stems and giving a slight protection over Winter, plants will bloom second Summer for four months. Try a few this way. For cut flowers with stems kept in water, Snapdragons retain their fresh appearance for ten days, and in this particular they are very valuable as table decorations.

Grandiflora majus Mixed.—Height 18 inches. Desirable as comprehending all colors..... Oz., 50c.; 10

BACHELOR'S BUTTONS

See *Gomphrena*, page 17.

BALLOON VINE (Cardiospermum)

The **Balloon Vine**, popular as a rapid climber, 8 feet, producing inflated seed pods one inch diameter; delicate foliage. 50 days. Always a favorite.....Oz., 20c.; 5

(Prices per packet)

BALSAMS (Lady's-slipper)

Large flowered, full centered. Beautiful annuals with flowers as double as Roses, measuring two inches in diameter. Rich soil and deep culture are requisite to produce large and showy flowers. Seeds may be sown where they are to stand, and later thin out the plants; but if started indoors they will flower earlier. Set plants about 2 feet apart, where they can have plenty of sun. Our stock is exceptionally fine. In bloom 60 days.

Balsam, Camellia Flowered

Camellia Flowered Perfection.—Pure white, mixed colors, 2 feet.....Oz., 75c.; 5

Rose Flowered.—Mixed colors. 2 feet high, 18 in. diameter.....Oz., 75c.; 10

Tall Finest Mixed Sorts.....Oz., 60c.; 5

BALSAM APPLE

See *Gourds*, page 17.

BEANS, CASTOR

See *Ricinus*, page 25.

(Prices per packet)

Mixed Asters— $\frac{1}{3}$ Size

ASTERS

Chrysanthemum-like flowers surpassed by no plant in beauty. They vary in color from a delicate pink and white to deep reds and purples. The plants thrive best in rich soil, but with sufficient moisture will give satisfaction in almost any garden plot, and blossom in profusion for 90 days or till late in the Autumn, proving a constant delight even after other flowers have been killed by frost. They are especially adapted to house decoration, and when cut and placed in water hold their regal heads erect from one to two weeks without withering. A bed of Asters in the garden or on the lawn is effective and beautiful for months, providing more cut flowers than any other plants occupying the same space. Try Landreth's Asters this year and see how unusually fine they are. Good as any offered under more florid descriptions. 8 to 20 inches high. Asters are by far the most satisfactory open garden flowering plants during Midsummer and Autumn.

Branching Asters

We cannot recommend the Branching too highly. They come into flower a few weeks before Chrysanthemums and closely resemble small ones. The best Asters for cutting. White, lavender, pink, crimson, purple, mixed colors. 20 inches..... 10

(Prices per Packet)

Crego's Giants.—Very early and constant bloomers, after the style of Queen of Market, but larger flowered.

Mixed colors..... Oz., \$2.00; 10

Branching.—Mixed..... Oz., \$1.50; 10

Pæony-flowered.—Mixed. Very full and compact..... Oz., \$1.50; 10

German Quilled.—Mixed colors. Very fine..... Oz., \$1.25; 10

Giant Comet.—Immense flowers, often 6 inches diameter; good form and growth. White, dark blue, light blue, crimson, sulphur-yellow, rose. Very valuable for exhibition vases as resembling Japanese Chrysanthemums.

All colors mixed..... Oz., \$3.00; 10

Hohenzollern.—One of the best Asters ever introduced; tall growing and branching, bearing large flowers on long stems. White, crimson, rose, dark blue, light blue, purple. Valuable for cutting.

All colors mixed..... Oz., \$6.00; 10

Ostrich Plume.—A very showy flower; branching with loosely curled flowerets. White, rose, light blue, dark blue, crimson. Fine for cutting

All colors mixed..... Oz., \$3.00; 10

Queen of the Market.—The best earliest among the Asters; white, scarlet, rose, dark blue, light blue, lavender. Very desirable. Habit spreading. Plants, 18 inches high and very productive. All colors mixed..... Oz., \$1.50; 10

Victoria.—Best all-round Aster. Flowers massive, with overlapping petals. 18 inches. Flowers very full and showy. White, delicate rose, purple, violet, scarlet, light blue, dark blue.

All colors mixed..... Oz., \$3.00; 10

Tall Varieties, Mixed in packet..... Oz., \$1.50; 5

China Asters.—Mixed colors..... Oz., \$1.25; 10

CANDYTUFT

These well-known favorites are among the most beautiful of our annual flowers. The seeds can be sown at all seasons or in Fall for early flowering. They like rich soil and plenty of room to flower freely. Nearly all varieties are hardy annuals. Very pretty in beds or masses. Bloom 60 days.

Rose Cardinal.—New, very large oval heads. Plants literally covered with the flowers, presenting one mass of this beautiful shade of rosy scarlet. Highly recommended..... 10

Crimson.—Very showy crimson..... 10

Empress, or Giant White.—Hyacinth flowered. A superb variety; large, pure white flowers on good stems..... 5

Mixed Colors.—Dwarf annuals..... Oz., 40c.; 10

(Prices per packet)

CAMPANULA

The **Canterbury Bells** are a large genus of showy plants, mostly perennials. The Campanula medium claims a situation in most gardens. Easy of culture and certain to flower; all succeed well in good soil. Blooms second year.

Single Mixed	5
Double Mixed	10

CANNAS—Seeds only

are mostly tropical, half-hardy perennial plants with broad foliage somewhat resembling corn and showy flowers; produce a striking effect grouped in beds or single on the lawn. Soak the seed in warm water about 12 hours, sow in hot-bed, transplant when ground is warm; give plenty of moisture and rich soil. Take up the roots before frost and keep in a moderately warm cellar.

Crozy's Early Newest Large Flowering.—Mixed colors. 4 to 5 feet.....Oz., 40c.; 5

Canterbury Bells

CANTERBURY BELLS

See **Campanula**, above.

(Prices per packet)

CARNATIONS

See **Dianthus**, page 15.

Celosia

CELOSIA

The **Cockscombs** are tender annuals, requiring good soil. The Cockscomb form will produce a larger comb by cutting off side flowers and leaving one head only to a plant. If cut before they fade, the head may be preserved during the Winter. 12 inches across. In flower for 90 days.

Giant Empress.—Bright crimson combs, dark foliage. 2 to 3 feet high..... 10

Cristata Nana.—Mixed. 4 or 5 colors. 1 to 2 feet high. Combs 10 inches across..... 5

Plumosa.—Scarlet and golden mixed. Plants 3 to 4 feet high, sending up delicate and exquisitely beautiful plumes of 10 inches in length, 3 to 4 inches in diameter and far more delicate than the more formal Cockscomb..... 10

Mixed varieties Oz., \$1.50; 5

CENTAUREA (Corn Flower)

Cyanus (Emperor William).—Blue 10

Single.—Mixed. All colors..... 10

CLEMATIS

The **Clematis** are perennials of rapid growth on trellis or netting. Blooming second year for 4 months.

Coccinea.—Scarlet. 12 feet..... 5

COLUMBINE

See **Aquilegia**, page 11.

CONVOLVULUS

See page 20.

CYPRESS VINE

See **Morning Glories**, page 20.

SEEDS WHICH SUCCEED

(Prices per packet)

Cosmos—Blooming in the late Autumn when all other flowers have ceased

COSMOS

Every year this flower makes more friends. Both flowers and lace-like foliage are grand for cutting. Growing 4 to 8 feet high from seed. In flower for 30 to 40 days. See illustration. Valuable for screens.

Early Dwarf Dawn.—White ground, flushed with delicate pink; a decided acquisition to this class.....Oz., 30c.; 15

Fine Mixed.—3 to 4 feet high, bearing white, crimson and pink flowers in July and onward.. Oz., 30c.; 5

Giant of California.—Strong, robust plants, fine colors.....Oz., 40c.; 10

Klondyke.—New, orange-yellow.....Oz., 30c.; 10

Mammoth Perfection.—Flowers of perfect form, great size and beauty. White, crimson, dark pink, white tinted rose. Mixed.....Oz., 40c.; 10

Giant Pink..... 10

Crimson Perfection.....Oz., 40c.; 10

(Prices per packet)

Delphinium

DELPHINIUM (*Larkspur*)

The **Larkspurs** are showy annuals and perennials. Very easy to cultivate and beautiful for borders. The foliage is dark green, much divided, throwing out to perfection the blossoms, which are terminal spikes of blue, purple, white and red. Although hardy perennials, the plants will bloom the first Autumn and again the following Spring. All grow freely in good soil. See illustration.

ANNUAL VARIETIES

Hyacinth-flowered. —Mixed. Double.....	15
Dwarf Rocket. —Double mixed. 1 foot.....	5
Emperor. —Very choice mixed colors.....	10
Finest Mixed	5

HARDY VARIETIES—VERY CHOICE

Formosum. —Double blue, white eye. Surpassingly brilliant, 1 foot high.....	20
Nudicaule. —Large scarlet; very showy.....	20

DIANTHUS

In this family are the **Pinks**, **Picotees** and **Carnations**, which are surpassed by few garden flowers. These old favorites are still as popular as ever. Rich soil will make bright flowers. Most of the varieties are fragrant. In the open garden some bloom the first Autumn; all bloom the second season.

PERPETUAL FLOWERING

Chabaud's Double Perpetual. —Choice yellow; blooms in 6 months in open garden.....	25
Comtesse de Paris	25
Giant Marguerite. —Very double. Blooms first year early, and constant blooming 4 months from seed. Large flowers. Mixed.....	25

(Prices per packet)

DIANTHUS—Continued

**BORDER OR OPEN-GARDEN CARNATIONS—
CARYOPHYLLUS**

One of the leading flowers, a rival of the Rose; the flowers are generally borne on long stems; seed can be sown under glass or in the open ground, and will flower the next Summer. The Marguerite varieties often flower the first year.

- Double Striped** 10
Grenadin.—Red. Biennial. Mixed 10
Vienna.—Early double dwarf. Mixed colors ... 10

CHINESE AND JAPANESE PINKS

The Pinks are free-flowering biennial plants that bloom the first Summer, and if freely cut will produce larger flowers the second year.

Chinensis (China Pink).—Double. 1 ft. Oz., 40c.; 5

Diadematus.—Dwarf, double mixed; compact habit; improvement on Chinensis. Oz., \$1.50; 5

Eastern Queen.—Large single flowers, finely fringed with magnificent rich shadings. Flowers often over 3 inches in diameter. Heddwigii character. 10 to 15 inches. Oz., \$1.50; 10

Heddwigii (Japan Pink).—Double and single; very showy, fragrant. Flowers 2 to 2½ inches in diameter, beautifully striped and mottled, sometimes fringed. 10 inches Oz., \$1.50; 5

Dianthus laciniatus

(Prices per packet)

Dianthus caryophyllus

Laciniatus.—Exquisitely fringed, single mixed. 4 to 5 colors. 2 feet. Oz., 75c.; 10

DIGITALIS (Foxglove)

Hardy perennials of easy culture, living for several years without care and yielding tall spikes of showy ringent flowers. 30 inches, blooms second year.

Fine Mixed 5

DOUBLE DAISY

The **English Daisy** is a dainty perennial plant of poetical celebrity. Quite hardy in most situations, easy culture, requires shade. Flowers from April to June. Start seed in hot-bed. Should be planted in beds.

Longfellow.—Rose, fine large flowers. 5 inches. Oz., \$3.00; 15

Mixed Colors.—5 inches Oz., \$2.50; 10

Shasta.—California beauties. 6 inches Oz., \$4.00; 10

Snowball.—Double white. Oz., \$3.00; 10

EVERLASTING FLOWERS

See **Xeranthemum**, page 26.

(Prices per packet)

California Poppy

ESCHSCHOLTZIA

One of the most beautiful and showy of garden flowers. When grown in masses, scarcely any plant produces a greater degree of splendor. Easily raised from seed. Sown in Autumn, the growth is of increased vigor. California State flower. Diameter of plant growth 20 inches. Blooming 60 days. See illustration.

- Burbank's New Crimson California Poppy.**—Very showy, rare, desirable. 5
Crocea fl. pl.—Double flowered. 1 foot. 5
Golden West.—Grand new variety having light canary-yellow flowers, with deep orange blotch at base of each petal, forming a cross in centre. Flowers measure over 4 inches in diameter and have overlapping petals, delicately waved at edges. 5
Mixed.—Various colors. 1 foot. Oz., 40c.; 5

FOXGLOVE

See *Digitalis*, page 16.

GAILLARDIA

The *Gaillardias* are half-hardy, free-flowering annuals. The flowers are a very showy combination of orange, crimson and purple, blended and streaked in various markings. They are good bedders, being strong, constant bloomers through the whole Summer.

Grandiflora Mixed Varieties.—Hardy. Resembles a small Sunflower. 24 inches tall. 10

GERANIUM

Half-hardy perennials; 2 feet. Sow in seed-bed in Spring, keep moist, and plant out in rich sandy loam. Cuttings may be easily started in pots, if kept moist and shady. Take up in the Fall, pot and keep in a moderately cool cellar during Winter.

Scarlet Zonale. 15

GOMPHRENA (*Globe Amaranthus*, *Bachelor's Button*)

Well-known annuals of easy culture. To preserve for Winter decoration the flowers should be fully matured before being gathered.

Tall Mixed.—24 inches high. 5
Dwarf Mixed.—15 inches tall. 5

(Prices per packet)

GOURDS

The **Gourds** are annuals, rapid growers, from 10 to 20 feet high, valuable for covering screens or arbors; should have moist, rich, loamy soil to attain perfection. The *Bottle* and *Dipper* Gourds are useful when dry for domestic purposes. The inside of the *Luffa*, *Dish-cloth* or *Bonnet* Gourd, is very strong and gauze-like.

- Balsam Apple.**—Vine; 6 feet. Used as a lotion 5
Balsam Pear.—Vine; 6 feet. Used as a lotion 5
Hercules' Club.—Climber, fruit sometimes 5 feet long. 5
Sugar Trough.—Used as holders for syrups or water. 5
Dipper.—Crooked at the neck. Used for dipping water. 5
Dish-cloth.—The weblike interior makes an excellent sponge. 5
Mixed Gourds. Oz., 40c.; 5

HOLLYHOCK

One of the grandest perennials for a screen, throwing up spikes 4 or 6 feet high of beautiful flowers as double as a *Rose*. Nothing better for background or among shrubs. Blooms second year.

- Fine Double.**—Mixed colors. White, red, crimson, yellow, and all shades double flowers from nearly black to pure white. Beautiful combination when planted in groups. Perennial. 10
Alleghany.—Semi-double, fringed, very choice, mixed colors. Oz., \$1.50; 10
Single Mixed. Oz., \$1.00; 5

Hollyhock—Beautiful double flowers

(Prices per packet)

HELIOTROPE

The **Heliotrope** is a sweet-scented tender perennial. Grows freely in the garden or greenhouse. Fine for bouquets.

Giants.—Newest large-flowering varieties mixed. 10

IPOMŒA (Morning-glories)

See page 20.

JOHNNY-JUMP-UP

See **Pansies**, page 23.

KŒCHIA TRICOPHYLLA

The seed should be sown when the Oak trees are bursting into leaf. The plants develop very rapidly, finally reaching by midsummer two feet in height, and forming perfect globes of green, feathery branches, which later burst into a mass of small brightest scarlet flowers; the whole effect being that of a globe of fire, a veritable burning bush. Anyone can grow this plant in almost any situation, and we accordingly recommend it most highly. Sometimes called **Fire Bush**. Price per packet..... 5

LADY'S-SLIPPER

See **Balsam**, page 12.

LARKSPUR

See **Delphinium**, page 15.

LOBELIA

This class of plants is of great beauty and adapted to many varieties of ornamental purposes. The annuals do well in baskets, vases, etc., where graceful, drooping plants are desirable. The compact, almost globular varieties are used for edgings, beds, pots, etc. No garden can be complete without some of the new varieties of Lobelias.

Erinus gracilis.—Trailing plant, with blue flowers..... 5

MARIGOLDS

are showy annuals of easy culture. The flowers of the African variety, in its perfection, are equal to the double Dahlia. The French, as double as a Ranunculus, in appearance and texture not unlike the richest velvet. *Signata pumila* is of compact, globulous growth; the flowers, yellow and orange, cover the entire outer surface of the plant. In bloom for 90 days.

Dwarf Brownie, or Legion of Honor.—Plants about 9 inches high. Fine for borders or massing. Flowers brilliant gold with maroon blotching, in bloom from early Summer till frost. Single.... 5

Africana.—Mixed. 2 feet tall..... 5

Prince of Orange..... 5

Dwarf Double Mixed..... 5

MARVEL-OF-PERU

See **Mirabilis**, this page.

(Prices per packet)

MESEMBRYANTHEMUM CRYSTALLINUM (Ice Plant)

Start in hot-bed and transplant to border in middle of Summer. Very succulent, highly ornamental and curious. From its glittering surface is sometimes called **Diamond Plant**. 8 inches high, 18 inches flat on the ground. Once well started it can resist almost any drought..... 5

MIGNONETTE

No annual is a more general favorite than the **Mignonette**. Its modest, sweet-scented flowers recommend it to every one. One of the easiest culture, it adapts itself to all situations. Finds a place in the greenhouse or conservatory, in a box or pot on the window, or in the open ground in Summer. Blooms till Fall. Sow seeds several times during season. In bloom for 60 days.

Allen's Defiance.—The florist's favorite. Large spikes 13 or 14 inches long, very fragrant, and will keep for weeks after cutting, holding their fragrance, as the buds open daily. Fine for forcing. 9 inches..... 10

Goliath, Giant Flowered.—Red. Plants pyramidal in form and very strong with exceedingly large flower-spikes. 12 inches. One of the best..... 10

Machet.—Golden. Dwarf growth, highly colored; fragrant..... 10

Odorata.—Very sweet. 9 inches.....Oz., 20c.; 5

Parsons' White.—Almost white, erect growth, with slender spikes, very fragrant. 12 inches. 5

MIRABILIS JALAPA

Four-o'clock.

Marvel-of-Peru, or, as it is generally called, Four-o'clock, because its flowers open late each afternoon; bright foliage. Flowers are fragrant, with desirable colors and fine markings. Makes a fine Summer hedge if set in rows a foot apart.

Mixed colors of flowers..... 5

Variegated foliage.—Mixed..... 5

(Prices per packet)

Landreth's Nasturtiums

Sow in nursery bed when the Apple is in bloom.
Transplant when two inches high.

(PRICE PER PACKET, 5 CENTS)

Did you have them last Summer? If not, why not? The Nasturtium, with four or five other ornamental plants, leads everything else in the garden. Landreth's Nasturtiums for 1914 were a great success, but we feel confident that they will be even more satisfactory as our stock contains some new varieties. These flowers require next to no care and thrive best in rather poor soil, enduring heat and dry weather remarkably well. No flower is as desirable for table decoration. Every housewife prizes the seed pods on account of their pungent, peppery taste, and feels her pickles incomplete without them. The flowers are of all colors, from deep chocolate to nearly white, and blossom in greatest profusion until killed by frost. They are very effective when planted in borders, also well suited for vases and baskets. Do not let a Summer pass without having a bed of these refreshing flowers. You cannot but love them if you know them. No more trouble to grow Nasturtiums than to grow Lettuce or Peas or Beans. They bloom from early summer until killed by frost.

5 CENTS PER PACKET, 20 CENTS PER OUNCE, EXCEPT WHERE OTHERWISE NOTED.

One Ounce sows 30 feet of single row.

TALL NASTURTIIUMS

Climbing 6 to 8 feet high.

Mixed Tall Sorts.—A combination of many tall varieties; colors, white, cardinal, orange, rose, scarlet, etc. 5 cents per pkt.; Oz., 10c.

NAMED SORTS, 5 CENTS EACH; OZ., 1 Oc.

Atropurpureum.—Crimson, dark and showy.

Atrosanguinea.—Excellent, blood-red, free bloomer. Very showy. Not dark as Atropurpureum.

Bright Rose.—Very choice sort, producing a rose-colored flower; quite distinct from usual colors.

Chameleon.—All colors on same plant and a great variety of splashes of color on same flower.

Dunnett's Orange.—A very vigorous grower, producing a showy, deep orange flower.

King Theodore.—Very dark. One of the most attractive on our trial grounds this year.

Landreth's Giants.—A California strain of beautiful giant flowers with a great range of color. There will be no disappointment when these bright attractive blooms appear in their many shades and tints, showing the crimped, crêpe-like effect of the flowers.

Pearl.—Delicate, cream-colored flowers contrasting finely with the orange, gold and scarlet of more brilliant varieties.

Prince Henry.—Primrose-colored, foliage light color, spotted with crimson. A choice sort.

Scheuerianum coccineum.—Scarlet and rose.

Schillingi.—Very vigorous grower. Flower yellow, spotted with crimson and maroon.

Spit Fire.—Remarkable in its intensity of sparkling brilliancy; exceedingly showy; one of the finest sorts.

Ten packets of above only 40 cents. Good Mixture, 80c. per pound.

DWARF NASTURTIIUMS

8 to 15 inches.

Mixed Dwarf Sorts.—A mixture of the best dwarf sorts, producing when in bloom an agreeable effect; in colors of scarlet, crimson, bronze, gold and white. 5 cts. per package.

NAMED SORTS, 5 CENTS EACH; OZ., 1 5c.

Cattell's Crimson.—Showy variety, equal to any in startling effect.

Empress of India.—Foliage purple-blue, bearing brilliant deep scarlet flowers; a good plant for edging.

King Theodore.—Dark crimson. Foliage dark green. An excellent sort. Good for edging.

Pearl.—Flowers lemon tint, a choice color among Nasturtiums, producing pleasing effect.

Ivy-Leaved.—Very desirable for use in window boxes by reason of its very odd-shaped and dark colored foliage and flowers of a new form.

Pkt., 10c.; oz., 20c.

Five packets of above only 20 cents. Good Mixture, 90c. per pound.

Tom Thumb, Golden Queen.—Leaves yellow, extremely floriferous, and the large and perfect flowers are thrown well above the foliage, thereby explaining the brilliancy of the effect. It comes true from seed. Fine for borders, massing or in pots. Per pkt., 10c.

Thirty packets of the above, which is enough to fill any garden and home with sunshine all Summer, for only \$1.50.

We call the attention of table epicures to Nasturtium sandwiches, the effect being most novel, and to the palate most delicious, both green leaves and flowers being used.

MIMOSA SENSITIVA (Sensitive Plant)

Various colors. The Sensitive Plant, from its mysterious irritability, is very curious and interesting. When touched will instantly fold its leaves and droop. It is as easy to grow as a Pea or Bean. 1 to 2 feet. Flowers pink. 5

MYOSOTIS

The **Forget-me-not** is a modest, pretty little flower, a favorite with everyone. Half-hardy perennial, flowering the first season. Branches cut and placed in water continue to bloom a long time, nearly as well as on the plant.

Alphestris.—Blue, white and rose mixed. 10

LANDRETHS' FLOWER SEEDS

(Prices per packet)

MORNING-GLORY

LARGE-FLOWERING VARIETIES AND LARGE LEAVED

- Convolvulus.**—The **Convolvulus Major** is an annual of rapid growth; large flowers of many colors; suitable for porches or arbors, blooming in July and constantly till frost.....Oz., 15c.; 5
- Double White Tassel.**—Snow-white, very double and fringed.....Oz., 50c.; 15
- Rochester.**—A new large-flowering variety. Flowers 4 inches or over, are of a deep violet-blue, with a narrow band of white around the edge. Wonderfully attractive.....Oz., 35c.; 10
- Double Mixed**..... 10
- Single Mixed**..... 5

DWARF VARIETIES

- Minor, or Tricolor.**—Blue, white and yellow flowers of 1½ inches' diameter. Hardy annual, handsome flowers, suitable for vases, hanging baskets and small border. 1 foot; 60 days.... 5

CYPRESS VINES

- Quamoclit.**—Crimson, small, dark. Fern- or lace-like foliage; climbing 8 feet..... 5
- Quamoclit alba.**—White, small. 10 feet. Lace-like foliage; climbing 8 feet..... 5
- Quamoclit Mixed.**—White and crimson. Lace-like foliage; climbing 8 feet.....Oz., 40c.; 5

Ipomœa

IPOMŒA (Morning-glory)

- The *Ipomœas* are among the most beautiful of annual running vines, blooming for 90 days or from midsummer till frost.
- Coccinea** (Star *Ipomœa* or Small Scarlet Morning-glory).—Small, flat, ivy-like leaves. 12 feet.. 5
- Grandiflora.**—Purple. Not so strong as the large common *Convolvulus*. 12 feet..... 5
- Heavenly Blue.**—A beautiful annual Morning-glory, rapid climber, entire flowers of azure-blue..... 10

(Prices per packet)

MOONFLOWER

These beautiful rapid-growing climbers will grow about 30 feet in one season. Exceedingly showy. Leaves are large and the flowers, which open as the sun is sinking in the west, are very fragrant. The seeds being hard, some advise filing the end of each seed, but we have found it best to plant the seeds one-half inch deep after having soaked them overnight in warm water. Blooming 40 days.

- Mexicana Grandiflora Alba.**—White flowers, six inches wide. Opens only night and mornings. Large, smooth, dark foliage. Large flowering and large-leaved **Morning-glories** 10
- Bona nox** (Evening Glory, Good Night, Moon-flower).—Pure white, fragrant flowers. Tender annual. 15 feet. Very showy.....Oz., 20c.; 10
- Learii.**—Blue Dawnflower. Blooms early in the morning and late in the afternoon. Leaves small, halbert-shaped, dark and glossy..... 10

Landreth's Sweet Peas

(SEE NEXT PAGE.)

Sow in permanent location, in single row, two seeds to the inch, half-ounce of seeds to every yard of row; cover one inch deep.

Sweet Peas can be grown as easily as the common garden Peas, simply requiring room and early starting—planted even before the frost is out of the ground, sometimes the preceding Autumn, as with deep roots in a deep, rich soil the season of blooming is lengthened. They do best when trained to trestles made of string or wire. They should be thinned out about one inch apart in rows, and if in parallel rows the rows should be four (4) feet apart.

Sweet Peas have a blooming period of about four weeks, consequently to provide for a longer season of flowering it is advisable, where garden space permits, to make four or five sowings about two weeks apart, making the first sowing before the frost is out of the ground. But the blooming season is only partially fixed according to date of sowing, for Nature is disposed to run flowering time much together, whatever may have been the date of sowing the seeds.

Sweet Peas always develop the largest and best flowers and continue longest in bloom under conditions of a rainy season or under irrigation. On the other hand, hot, dry weather diminishes the size of flowers, causes them to fade and induces the vines to cease blooming, to soon dry up if not revived by rain, but after a good rain will make a display as attractive as at first.

White-seeded Sweet Peas are more delicate than the dark-seeded varieties, and under unfavorable conditions of soil and rainfall or drought do not germinate as freely as dark-seeded, which are always hardy.

Sweet Peas of any variety will generally bloom in 60 or 70 days after they germinate; one ounce being sown to ten feet of row.

SWEET PEAS—Continued.

GRANDIFLORA TYPE

MIXED COLORS

If a mixture of colors is desired we offer three grades:

	Oz.	Lb.
Landreths' Fine Mixed.....	15	\$1.00
Landreths' Very Choice Mixed.....	15	1.25
Landreths' Special Mixed.....	20	1.40

Per packet, 5 cents.

NAMED SORTS—SINGLE COLORS

5 CENTS EACH.

While Landreths' selection of named sorts only numbers 50 out of a possible 600, it is complete as respects variations in colors, tints and markings.

These fifty distinct varieties under distinct labels (Spencers excepted) are all priced, postage included, at \$2.00 per pound; 60c. per quarter pound; 20c. per ounce; 5c. per packet.

WHITE CLASS

Dorothy Eckford.—Fine large blooms, decidedly the best in the White Class; semi-hooded; very large, best white.

Emily Henderson.—Large white flowers, produced in abundance. Compact vines; open form.

CREAM OR YELLOWISH CLASS

Honorable Mrs. E. Kenyon.—A giant primrose-color flower.

Mrs. Eckford.—A large flower; very desirable for bouquets.

LAVENDER CLASS

Lady Grizel Hamilton.—Very attractive; produces large flowers of light lavender with blushed wings.

Countess of Radnor.—Large blossoms of a lavender shade with purple.

Gray Friar.—Lavender and gray striped and flaked; very attractive.

PURPLE CLASS

Black Michael.—Almost black, darker than Black Knight, and producing a large, strong flower.

Duke of Sutherland.—Purple, not so dark as Othello.

Othello.—A deep claret; flowers large size and wide expanse.

Shahazade.—A rich maroon, intensely dark.

Boreatton.—Deep purple crimson, a velvety maroon.

Black Knight.—Claret color suffused with purple.

(Prices per packet)

SALMON CLASS

Lady Mary Currie.—Exceedingly showy; one of the best of the salmon types; body veined with pink.

J. E. Castle.—Rose carmine to salmon; flowers of the Unwin type, showy or fluted, standard.

Honorable F. Bouverie.—A beautiful variety of salmon, with wings buff on the edge.

Gorgeous.—Brilliant, as indicated by the name; deep salmon-orange, the wings still more highly colored; open form.

Lady Penzance.—Somewhat similar to Gorgeous; a profuse bloomer; exquisite orange and salmon; hooded form.

Miss Willmot.—Standard orange-pink, showing vein of deeper orange-pink. Wings rose with strong tint of orange, showing veins of orange-rose. Very large size, semi-hooded form of the very best type. Stems long and large and plant very vigorous. It is the largest and best of all this shade.

Aurora.—Orange-rose, striped on white. Large size, hooded form of the best type. It is the most attractive striped variety. Mrs. Joseph Chamberlain has the same shape and size and general characteristics.

ROSY CLASS

Extra Early Blanch Ferry.—Earliest to bloom; a brilliant combination of white and rose.

Gladys Unwin.—Light pink, showy; flower of a wavy type, strong standard, upright wings, very broad, and a very choice sort.

Apple Blossom.—A lovely combination of light and deep rose on silvery wings; very showy; often four blooms to a stem.

Mrs. Dugdale.—Very large flowers; a rich carmine-rose; fine.

Prince of Wales.—An improvement on Her Majesty; a good producer of many large flowers of deep rose tint.

Duke of Westminster.—Beautiful light rose with shades of purple; large hooded.

Lovely.—Exquisite shades of pink and rose; flowers large.

Queen of Spain.—Soft buff-pink, self-color, medium size, hooded form, with standard rather too much curled. The tendrils, stems and calyx are conspicuously tinged with brown. The shade is quite similar to Countess Lathom, but it is a little lighter and softer.

(Prices per packet)

SWEET PEAS—Continued

CRIMSON OR SCARLET CLASS

King Edward VII.—In beauty and brilliancy not exceeded by any known Pea; form larger than Salopian.

Scarlet Gem.—By some considered superior to King Edward VII; certainly a most dazzling scarlet; open form.

Salopian.—Very handsome, a most brilliant scarlet; flowers of large size.

Queen Alexandra.—Very fine scarlet; hooded form.

Coccinea.—A fine scarlet, as its name indicates.

BLUE CLASS

Captain of the Blues.—Standard almost clear purple, wings blue, shaded and tinged with purple. It changes soon after being fully expanded to standard bluish-purple, wings clear blue.

Navy Blue.—Well named; flowers dark blue all over and most effective in combination with others or singly.

Emily Eckford.—Large flowered; wings deep blue, body inclined to be purple; crumpled flowers.

Captivation.—Large deep maroon-colored flowers.

Mrs. Walter Wright.—An excellent sort; large-flowered, of deep blue color; showy.

Maid of Honor.—Very light blue shaded with white.

Dorothy Tennant.—A light blue shaded with rose, holding their color better than some others; one of the best.

Helen Pierce.—Mottled blue and white, not striped, positively mottled; very choice and effective.

STRIPED CLASS

Mrs. Joseph Chamberlain.—A pure white, thoroughly striped with delicate rose; most effective; best type.

Jessie Cuthbertson.—White striped and flecked with dark rose; very showy; hooded.

Princess of Wales.—Purple, mauve and lavender, striped most effectively.

America.—A white form, striped with bright blood-red; very showy; very choice; holds its color.

Ramona.—Yellowish-white, completely striped with pink.

Juanita.—The body of this form is white, but broadly marked with light lavender; hooded.

If only one of each color is desired, we specially recommend the first leading sort under each of the nine (9) classes.

(Prices per packet, 10 cents)

**Spencer Types
Sweet Peas**

Mixed Varieties

Per lb.	Per $\frac{1}{4}$ lb.	Per oz.	Per pkt.
\$2.75	90c.	30c.	10c.

Mixed Colors.—A development in Sweet Peas which is passing throughout the entire list of varieties, each old color and old form being enlarged and beautified beyond compare, and which in turn, when firmly fixed, will entirely supplant the old and familiar forms. The new habit is not fixed, but varies from 50 to 60 per cent. true.

**Named or Distinct Sorts of
Spencers**

Mammoth, Waved or Crumpled

These forms of Sweet Pea flowers are all the rage at the Sweet Pea Exhibitions and at all places where competition in the production of the Sweet Pea is brisk. We offer the eight named varieties as below, all at \$3.00 per lb., \$1.00 per $\frac{1}{4}$ lb., 40c. per oz., or 10c. a pkt.

Countess Spencer.—A rose-pink of rare excellence in form and size, very attractive, vines strong in growth.

Asta Ohn.—Flowers large, waved. Color lavender and mauve, stems very stiff, bearing generally four large flowers.

Black Knight Spencer.—Very showy, color maroon, rich and dark, flowers waved, strong vine, blooming luxuriously.

White Spencer.—Profuse bloomer, gigantic flowers, stems strong and long, bearing three flowers, a strong climber.

Primrose Spencer.—The finest of its class, an unmistakable Primrose, of the best Spencer form. Flowers large and beautifully waved.

King Edward VII.—Crimson-scarlet. Exceedingly large-flowered, stems long, strong and stiff, often bearing three to four blossoms, vines very vigorous, a profuse bloomer.

Dainty Spencer.—White with rose-pink edges, stems long and carrying three to four flowers of a most dainty appearance; very attractive.

Mrs. Routzahn.—Pink, apricot and buff flowers, large-waved, stems long, bearing three to four flowers.

Efrida Pearson.—Salmon and pink. Very large flowers, borne on long stems. Profuse bloomer. One of the best.

Queen Alexandra.—Large, half hooded, bright red flowers, unsurpassed in brilliancy. This might be put down as an absolute scarlet.

Senator.—Mammoth-flowered. Color heliotrope, striped with dark claret. A profuse bloomer.

Florence Nightingale.—Large, wavy, lavender-colored flowers. Vine strong. Profuse bloomer. Long stem.

Mrs. Hugh Dickson.—Immense flowers of a pinkish-apricot color. Vine sturdy. Blooms lasting and continuous.

Senator Spencer.—Deep claret or wine-color stripes and flakes on a light heliotrope ground.

Petunias

Petunias, single flowered

Petunias are annuals of extraordinary merit and of easy culture, producing a fine effect by reason of the beautiful combination of colors. In the garden, conservatory or greenhouse they produce most beautiful flowers in great profusion. Will grow freely in any soil, but the richer the soil the better effect produced. Also fine for boxes, vases, etc. In the open garden the plants spread 3 feet by 20 inches high and bloom for 90 days. See illustration.

BEDDING, SINGLE FLOWERED

- Belle Etoile.**—White and purple; profuse bloomer. 2 feet..... 5
Countess of Ellesmere.—Great bloomer, rose and white..... 10
Hybrida.—Mixed colors. 2 feet.....Oz., 50c.; 5

(Prices per packet)

PHLOX

Phlox Drummondii Grandiflora

Phlox Drummondii Grandiflora.—This is the Large Flowering Class, and in all its varieties of colors and shades cannot be excelled by any annual for brilliant and constant display. Blooms from July to November, and should have rich, light soil. The seed may be sown in hot-bed in March and the plants planted out in June, or when the ground becomes warm may be sown just where they are to stand. No wonder these brilliant blooms are called Flame Flowers, as when planted in beds or masses, the plants standing four inches apart in each direction, they make a solid field of color. In the open garden the plants spread 20 and rise 12 inches high. In bloom 60 days. See illustration.

- Coccinea.**—Bright scarlet, fine form, large. 1 foot..... 5
Nana compacta.—Dwarf mixed, all colors. Plants 6 inches high..... 10
Star of Quedlinburg Mixed.—Bears five-pointed, star-shaped flowers; easy culture. A very odd and handsome flower. Hardy annual..... 10
Fringed Mixed.—Many colors, fringed petals.... 10
Dwarf Fireball.—Blood-red; 8 inches..... 10
Mixed Colors.....Oz., \$1.50; 10

SCABIOSA

Pincushion Flower, known the world over as Mourning Bride. Is a well-known annual. Easy culture; blooms all the season. Fine for bouquets. 2 to 3 feet.

- Double Purple**..... 5
Double Snowball.—Pure white..... 5
Tall Varieties.—Mixed..... 5

(Prices per packet)

RICINUS

The **Castor Bean**, in all its varieties, has a showy tropical appearance, singly or in groups. Valuable for screens.

- Cambogiensis.**—The stem and leaf stalks are ebony-black, large leaves and richly colored. 10 feet..... 5
Sanguineus.—Red stalks and foliage, with bronze tinge, seed-pods scarlet. 10 feet..... 5
Zanzibariensis.—Largest-leaved variety, an elegant centre plant. Leaves often 3 feet across. 12 feet high..... 5
Gibsonii.—Red stems..... 5
Mixed Varieties.....Oz., 20c.; 5

SENSITIVE PLANT

See *Mimosa*, page 19.

SNAPDRAGON

See *Antirrhinum*, page 12.

SALVIA (Scarlet Sage)

Every ounce of Scarlet Sage we sell is grown on Bloomsdale Farm, where the broad scarlet patches scattered among the other crops produce a most dazzling effect. Ounce, \$1.50.

Half-ounce should raise 1000 plants. Sow seed in hot-bed or box in house and plant out when ground is warm, or sow outdoors when the Apple is in bloom. In bloom 60 days. 2 feet spread.

Bonfire.—A fine dwarf variety, from 2 to 3 feet high; forms a dense, compact bush, is a heavy bloomer. Brilliant scarlet. We especially recommend this sort of seed, which we grow every year on Bloomsdale to the extent of three acres. It is most brilliant and profuse in flowering..... 10

Lord Fauntleroy.—A favorite variety..... 10

Sage, Bonfire

(Prices per packet)

SUNFLOWER (*Helianthus*)

The **Sunflower** is a well-known old-fashioned favorite, of late years wonderfully improved. The size and brilliancy of its flowers make it worthy of a place in every garden.

Argophyllus (Silver Leaf).—5 feet.....	5
Giganteus (Russian).—Golden. 8 feet.....	5
Globosus .—Globe flowered, yellow. 3 feet.....	5
Dwarf Double .—3 feet. Densely double flowers.	5

SWEET-WILLIAM

These flowers were favorites in our grandfathers' gardens. They bloom early in the Spring and continue in flower a long time. Plants are hardy and they will bloom in August the first and second years, and their number may be increased by dividing the roots. Colors run from purple to white.

Double Mixed . 1 foot.....	Oz., 75c.; 5
Single Mixed . 1 foot.....	Oz., 40c.; 5

TEN WEEKS' STOCK

Stocks are half-hardy annuals, beautiful and fragrant. Sow under glass or on warm border early in Spring, transplant to rich ground. See illustration.

Cut and Come Again (Princess Alice) is the finest and most floriferous white sort. For garden, pot or cut-flower use, it cannot be equaled. 16 inches.....	10
Large Flowering .—Mixed colors. Flower nearly 2 inches in diameter.....	10
Giant Perfection .—Pyramidal.....	20

Ten Weeks' Stock

(Prices per packet)

THUNBERGIA

Handsome climbing greenhouse perennials, but will succeed in open ground as annuals if planted on a warm, sunny border; fine for baskets, etc.

Best Mixed .—5 feet. White and yellow.....	5
---	---

VERBENA

The **Verbenas** are half-hardy perennials. No flower garden is complete without Verbena. Mostly upright, but when prostrate taking root freely where stems come in contact with the ground. Grand for bedding. In bloom 90 days.

Auricula-flowered .—White eye; height 9 inches; spread 2 feet.....	15
Firefly or Scarlet .—Height 9 inches; spread 2 feet.....	10
Hybrida Mixed Colors .—Height 9 inches; spread 2 feet.....	Oz., \$1.40; 5
Mammoth .—White.....	10

VINCA ("Periwinkle")

Valuable for pot culture, tender perennials. Sown early, blooms freely same season. 1 foot.

Alba pura .—Pure white; spread 8 inches.....	5
Rosea .—Spread 8 inches.....	5
Mixed .—Several colors; spread 8 inches.....	Oz., 60c.; 5

WALLFLOWER

is a great favorite. It is a half-hardy biennial, producing beautiful fragrant flowers. Requires protection during the Winter. Blooms second year. 18 inches.

Large Flowering Double Mixed	5
Large Flowering Single Mixed .—2 feet.....	5

XERANTHEMUM.

Hardy annuals, bearing flowers in profusion. Much prized for Winter bouquets. Height 2 feet. The best varieties mixed..... 5 |

ZINNIA

Double. Is an annual of robust habit, blooming from July to October. Seeds can be planted in the open, or young plants transplanted if desired. Dwarf varieties should stand about one foot apart, and tall varieties double this distance. Will grow anywhere and stand any amount of rough treatment. In bloom 60 days. Plants 18 inches' spread.

Large Flowering Dwarf Mixed	Oz., 40c.; 5
Large Flowering Tall Mixed .—All colors, 2 feet.	Oz., 40c.; 5

SEEDS WHICH SUCCEED

THE CALL OF THE GARDEN is a never-ceasing impulse in the mind of every one who can control a suitable piece of land, there being in the minds of all an inclination to plant Seeds, to cultivate, and aid nature in producing, what might almost be said, something from nothing.

The BEST NOVELTIES and the CHOICE STANDARDS are printed in heavy black type

General Rule: Cover Seeds Four Times their Least Diameters

Artichoke (FRENCH SEED)

**THESE PRICES
INCLUDE POSTAGE.**

Three Ounces of Seed to 100 Yards of Row.

This plant may be grown from seed sown when the Cherry is in bloom or from suckers taken from established plants. If the seed be sown, the plants may be raised in beds and transplanted. The seedlings or sets should be planted out in rows at four feet apart and eighteen inches in the row. Success with it in the United States cannot be expected north of the Cotton Belt.

Green Province Large Globe.—Heads elongated, green. Plants rather spiny.....

$\frac{1}{4}$ lb.	Oz.	Pkt.
90	30	10

Purple Province Large Globe.—Heads deep violet; short and blunt. Very productive....

90	30	10
----	----	----

Illustration of the PROCESS OF PREPARING an Asparagus Bed

In this case, there being three trenches five feet apart and twenty-four inches deep, each trench filled to a depth of eight inches with well-decayed stable manure, the roots placed on top of the manure in the bottom of the trenches at eighteen inches apart and covered at first by one inch of earth. As the Asparagus plants develop in size the earth is hoed in, until finally by the end of the second year the entire surface is level; the object of the deep planting being that the root crowns shall be far below the reach of an Asparagus cutting knife, but after five or six years the crowns rise nearer the surface.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

THESE PRICES
INCLUDE POSTAGE.

Asparagus

Of Seed, Sow Eight Ounces to 100 Yards of Row. Fifteen Pounds to the Acre. Of Two-year-old Roots, Set 5000 to the Acre.

If the rows be six feet apart, about 5,000 plants are required to plant an acre.

Two-year-old roots are better than one-year-old ones. When well planted and fertilized, a cutting of stalks can be made about three times the second year after planting. Cutting should not be continued too late in the Spring, or the roots will become exhausted if the shoots are not allowed to develop fully, for of course it must be understood the leaves are the lungs of the plants. After cutting has ceased, the ground should be worked by plowing away from the rows and manuring alongside, after which the earth should be thrown back. Twenty bushels of salt to the acre, sown broadcast, may be used to advantage annually.

SEED

- PALMETTO.**—An early prolific, regularly developed type of Asparagus of the Southern seaboard. Pkt. 5c.; oz. 10c.; $\frac{1}{4}$ lb. 20c.; lb. 65c.
COLOSSAL.—The leading variety in the American markets. Pkt. 5c.; oz. 10c.; $\frac{1}{4}$ lb. 20c.; lb. 65c.
COLUMBIAN WHITE.—Pkt. 5c.; oz. 10c.; $\frac{1}{4}$ lb. 25c.; lb. 80c.
ARGENTEUIL.—The favorite variety used in France. Pkt. 5c.; oz. 10c.; $\frac{1}{4}$ lb. 25c.; lb. 75c.

ROOTS

- PALMETTO.**—Two years old, per 100, 75c.; 1000, \$5.50.
COLOSSAL.—Two years old, per 100, 75c.; 1000, \$5.00.
COLUMBIAN WHITE.—Per 100, \$1.00; 1000, \$6.00
ARGENTEUIL.—Per 100, 75c.; per 1000, \$5.50.

One-year-old roots one dollar per thousand less in each case.

Ready for Table 40 to 75
Days from Sowing

Beets for Table

Five Ounces of Seed to
100 Yards of Row

Extra Early Egyptian

Under a system of horse cultivation, drill in rows at $2\frac{1}{2}$ feet apart and thin to 3 inches. If the culture is by hand, the rows may be drawn 18 inches apart. The seed may be drilled in the Spring when the Apple is in bloom. Yield 200 to 500 bushels per acre.

Extra Early Egyptian Turnip, 40 days.—

Roots for table use developing in forty days. Bulbs half globular, or flattened at the poles; roots very slim, skin smooth, leaves red and green.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
90	30	15	5

Extra Early Eclipse, 42 days.— This

variety has to a great extent superseded the Egyptian. The bulbs are globes, blood-colored and develop with astonishing rapidity. Foliage longer and more vigorous than the Egyptian.

BEETS FOR TABLE—Continued

	Lb.	¼ lb.	Oz.	Pkt.
Landreths' Early Forcing, 48 days. —Nearly as early as the Egyptian and hardier. Not so dark in flesh, but more firm when boiled or pickled; the leaf tops are remarkably short and compact, fitting the variety for forcing under glass or close planting on the border. Alternate circles of red and white. Very sweet.	90	30	15	5
Bassano or Extra Early Turnip, 48 days. —This is, with the exception of the Egyptian and Eclipse, the earliest sort. It is the first in market of large-rooted sorts; it is globular, sugary and tender; light in color. The sweetest of all beets.	80	30	15	5
Landreths' Fire Ball, 48 days. —Early, round, flesh brilliant scarlet with alternate rings of red and white; very choice, well named.....	\$1.25	40	25	10
Early Model, 48 days. —Something similar to Crimson Globe; smaller and more uniformly round. Very dark in flesh. A production of merit.....	1.10	35	20	10
Lentz Turnip, 50 days. —Short leaved, suitable for culture under glass. Very early. Light in color, but not so pale colored as the Bassano. Quite sugary.....	80	30	15	5
Landreths' Early Blood-Red Turnip, 50 days. —Top shaped, early in maturity. One of the best sellers we have. Deep red.....	90	30	15	5
Edmands' Improved Blood-Red Turnip. —A deep blood variety, slightly oval in form. Very popular in the Boston markets.....	90	30	15	5
Half-Long Blood-Red, 60 days. —Leaves half green and red. Very desirable. One of the best. A handsome, wedge-shaped root, growing well under ground; flesh very dark blood-red, skin smooth, habit much earlier in maturity than the old Long Blood. Most popular with Philadelphia Market Gardeners.....	1.00	30	15	5
Long Blood-Red (very rich), 65 days. —Resists drought better than any other variety of Beets; color deep red, flesh very sweet. Grows entirely under ground. Ten to twelve tons can be grown to the acre. Valuable for cattle. Keeps well during Winter.....	80	30	15	5
Large-Ribbed Swiss Chard or Silver Beet. —Greens for boiling are always acceptable. Spinach cannot always be had and often is tough and stringy. The Silver Beet, on the other hand, is in season from early Spring to Autumn frost and will be found a most agreeable dish. One of the best vegetables, the green foliage used like Spinach, the thick leaf stems cooked like Celery. No crop which can be grown in the garden produces such a large amount of food on so small a space. The cultivation of this vegetable is the same as that of a Beet.	90	30	10	5

Sugar Beets and Mangels

SUGAR BEETS

Five Ounces of Seed to 100 Yards of Row

	Lb.	¼ Lb.	Oz.	Pkt.
Klein-Wanzleben, 80 days. —This is the variety of Sugar Beet the German Beet-sugar factories have united in recommending as possessing the highest sugar-producing qualities, as much as 18 tons of sugar having been made from 100 tons of root of this variety.....	40	15	10	5
Vilmorin's Improved, 80 days. —A leading sugar-making sort, doing well on a wide range of soils and exceptionally rich in sugar. Fine for cattle feeding.....	40	15	10	5

MANGOLD-WURZELS

A family of Beets bred to a large size for cattle feeding. The roots are easily injured by Autumn frosts, and therefore must be taken up in good time and properly protected. When first harvested they are acid and scour cattle, but after a few months become palatable and safe. The approved types produce massive roots which, well elevated above the surface, are harvested with the greatest ease and produce double the weight of Turnips to the acre, to which advantage may be added the high nutritive value, the saccharine often being equal to 6 or 7 per cent. of the gross weight. The Mangold is a high feeder—potash and nitrogen are needed. Drill when the Cherry is in bloom.

Golden Tankard, 90 days. —A rapidly maturing root adapted to shallow lands, though doing well on every soil. The root has broad shoulders, smooth, rich, golden skin, solid sugary flesh, and golden footstalk.....	40	15	10	5
Mammoth Long Red, 110 days. —In England 80 tons have been grown to the acre. Everywhere the most popular variety for cattle feeding.....	40	15	10	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Trial Ground.—One hundred and sixty-five distinct tests in Trial Ground of Pole or Running Beans, twenty-five vines of each sort, all climbing up strong, tarred twine fastened to wires, stretched between posts. The photograph was taken in May when the vines had just started to climb up. Now, late in the season, these same vines form two lines, 300 yards each, of almost impenetrable hedges of foliage and covered with pods, showing relative merits in productiveness, shape and quality.

**HEIGHT,
EIGHT FEET.**

Eighteen Pole Beans

**POSTAGE NOT
PAID ON BEANS.**

**One Quart to 200 Poles or Three Pints of Seed to 100 Yards of Row. Fifteen Quarts to the Acre.
Maturing for Table 45 to 90 Days from Germination.**

Plant when the Apple is in bloom; set poles 4 by 4 feet, or set permanent posts like in picture and string wires with perpendicular strings; tie up the tendrils as often as necessary. To prevent Bean Poles from blowing down, unite them by strong cords, or, better, dispense with poles and use wire netting. Pole Beans, as a rule, require support to a height of six feet. No advantage climbing higher, as the pods cannot be reached.

	Peck.	½ Peck.	Qt.	½ Pt.
Red-Speckled, Oval-Seeded, Cut-Short Cornfield, 65 days. —This is a climbing green-podded Bean, used in the South for planting to Corn.....	\$1.75	1.00	30	10
Lazy Wife, 55 days. —Pods 6 to 7 inches long, and borne in clusters. It is so named because of the ease of picking and productiveness of the vine.....	2.50	1.40	40	10
White Dutch or Case-Knife, 60 days. —Used either as a snap-short when very young, shelled as the Lima when more largely developed, or for soaking when dry.....	1.90	1.25	35	10
Carolina or Sewee, 70 days. —A small variety of Lima, more easy of vegetation, more vigorous in growth, earlier in season, more prolific in pod.....	2.00	1.25	35	10
Tall German Wax, Black Seed, 75 days. —Pods half-round, waxy.....	2.25	1.40	40	10
Creaseback, 45 days. —Earliest Pole Bean in cultivation, exceedingly productive....	1.90	1.00	30	10
Landreths' White Sickle, 58 days. —White seed, similar in form to the Kentucky Wonder. Stringless, choice.....	2.50	1.40	40	10
Green-Pod Kentucky Wonder or Old Homestead. —A green-podded, early prolific sort. Tender, solid and stringless. Pods borne in clusters. Pods long, undulating and tender.....	2.00	1.25	35	10
White-Seeded Kentucky Wonder. —In our Catalogue of 1910 we introduced the Golden-Pod Kentucky Wonder, and we now offer the Green-Pod, White-Seeded Kentucky Wonder; and while a Kentucky Wonder a continuous bearer and almost rust-proof, the round pods being stringless. The seed is pure white and in many respects superior to the old green-podded form.....	2.00	1.25	35	10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

PAID ON BEANS.

POLE BEANS—Continued

Natural size—Landreths' Large Green-Seeded Lima

Peck. $\frac{1}{2}$ Peck. Qt. $\frac{1}{3}$ Pt.

- Landreths' Large Green-Seeded Lima.**—Seeds of a decided green tinge, that is to say not bleached ivory-white, the color of most Limas. This green-seeded selection is a going back to the Lima of years ago which has never been excelled. Unsurpassed in flavor.....\$2.50 1.40 40 10
- Landreths' Early Prolific Pole Lima.**—Superior to Large White Lima. In all particulars it is more productive from first to last, and earlier than any to produce pods suitable for picking, the pods borne in clusters and maturing over a long season. Considering all things, undoubtedly the best of the Lima varieties. The foliage is small and light colored. 80 days..... 2.25 1.40 40 10
- Challenger Lima, or Dreer's Pole, 85 days.**—A productive Pole variety, producing thick pods containing fat seeds of excellent quality for table use. The so-called Potato Lima 2.25 1.40 40 10
- King of Garden Lima, 90 days.**—One of the best. Large leaved, good climber. Vine of branching habit, productive. Pods long, dark and large. Quality very superior. If you do not know it, try it..... 2.25 1.40 40 10
- Extra Early Large Jersey Lima.**—Matures 75 days from germination. Under favorable conditions four or five days earlier than the large Lima..... 2.50 1.40 50 10
- Large White Lima.**—Whiter and smaller seeded than the Jersey, otherwise excellent in quality. The grade generally sold for gardens..... 2.25 1.40 40 10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

POLE BEANS—Continued

POSTAGE NOT
PAID ON BEANS.**Golden-Pod Kentucky Wonder, 55 days.** Peck. $\frac{1}{2}$ Peck. Qt. $\frac{1}{4}$ Pt.

—A light golden or lemon wax pod of the same good qualities of early maturity, solidity and tenderness as found in the old Green-Pod and, like the old sort, free from strings. Larger. Notice this is a golden wax pole bean.

\$2.25 1.40 50 10

Tennessee Wonder, 55 days.

—Named by us in 1889, catalogued in 1901. Dried seeds large, flattish and oval, incurved at eye. Color generally gray, but marked with many black irregular stripes. The Department of Agriculture Bulletin 100 states that the "green pods are the largest and handsomest of all cultivated Beans, the pods curved, double barreled, tinged with purple and wrinkled and depressed between each of the eight or nine seeds." Something similar to the Kentucky Wonder, but more attractive and more valuable; quite productive

2.50 1.40 50 10

Horticultural Pole, 65 days.—Pods short, broad, striped with red, principally used

for shelling like Limas. Does well in Northern latitudes. Very early and ornamental and used for decoration as well as for table.

2.00 1.25 35 10

*Tennessee Wonder*

Trial Grounds.—Two hundred and sixty samples of Beans, thinned out to 150 of each for convenience in estimating any percentages or impurities. All varieties classified as to time of ripening. Pea trials to the left.

Bush Beans—Average Height of Vine, 15 Inches

These Mature for Table 30 to 50 Days from Germination, According to Variety. Three Quarts of Seed to 100 Yards of Row. One to One and One-half Bushels to the Acre.

Sow when the Apple is in bloom, and repeat as frequently as necessary until within fifty days of frost. In field culture sow in drills at three feet apart. In garden culture, when the cultivation is done by hand, the rows may be at 24 inches. The seeds should be sown in such quantity as under ordinary circumstances to warrant one Bean vine to every four inches. If closer than this, their production will be impaired. On strong soil they do best at a greater distance. Yield about 125 to 150 bushels of green pods per acre.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

POSTAGE NOT
PAID ON BEANS.

BUSH BEANS—Continued

FOURTEEN GREEN-POD VARIETIES

Peck. ½ Peck. Qt. ½ Pt.

Landreth's First in Market, 29 days.—This is quite

properly named, as it is the earliest Bean listed, ripening for table in twenty-nine to thirty days, and therefore very profitable to the Market Gardener and desirable as well to the Private Gardener. The pods are long, broad, green and showy. The pods should be picked when very young, not allowing them to get over two inches long, they then being tender; subsequently they become tough. The habit of the vine is productive. The variety may be used in three ways: 1st. As green pods when young and tender. 2d. Shelled as green flageolets when older. 3d. The hard, dry, white beans as haricot blanc.

\$2.50 1.50 50 10

King of Earlies.—Early as the Red Valentine, longer

in pod, and on some soils a day or so earlier. Foliage darker, pods green in color, half-round, slightly curved. This is a sort of great celebrity among the Market Gardeners of several Bean-growing sections because of its productiveness, and so termed King.

2.50 1.50 50 10

STRINGLESS GREEN POD.—This Bean produces a vine, 12 to 14 inches high, similar to Red Valentine, but develops pods to edible condition possibly a day earlier than Red Valentine; that is, say in 30 to 31 days from germination. Notice this variety is free from strings. One of the best varieties for private gardens.

2.50 1.50 50 10

Mammoth Stringless Green Pod.—Vine 12 to 14 inches high, a mammoth-podded selection from the original Stringless; not quite so early, but more showy.

2.00 1.25 40 10

EXTRA EARLY RED VALENTINE, 32 days.—Edible condition in less than five weeks. Pods round and curved, light green and semi-transparent.

1.75 1.00 30 10

Mohawk.—Producing green-colored edible pods thirty-four days after germination.

1.75 1.00 30 10

Long Early Yellow Six Weeks, 40 days.—Long, straight green pods.

1.75 1.00 30 10

Longfellow, 45 days.—Productive of excellent long, straight, round green pods. A great Market Garden favorite. Vine 12 inches. Highly thought of by Market Gardeners.

1.75 1.00 30 10

Extra Early Refugee, 30 days.—As good a Bean as the Red Valentine and as early. Vine 12 inches. Round, curved pod.

2.00 1.25 30 10

Horticultural Dwarf, 35 days.—Resembling in form and color the Pole variety of the same name. Pods flat and straight.

2.50 1.75 50 10

Refugee, Late.—This Bean in some sections is known as the "1000 to 1," by reason of its prolific character. It matures green pods for table use in 48 days. Round, curved pods and stringless, when young, meaty. Vine 14 inches.

2.00 1.25 30 10

Bountiful Beans.—A large, tender, stringless green pod, curved and flat; a plant of very prolific habit, remaining long in bearing. Style of plant after the character of Long Six Weeks, but more hardy and more productive; consequently highly recommended.

2.00 1.25 30 10

Tennessee Green Pod, 46 days.—Pods long, broad, undulating, very popular in some sections, one foot high, choice.

2.25 1.40 50 15

Black Valentine, 31 days.—Green podded, dry seed black. Pods long and straight, slightly resembling Red Valentine; not quite so broad, more prolific. A day or two earlier than Red Valentine. A sort of great repute.

2.50 1.50 50 10

THIRTEEN WAX-PODS

Challenger Black Wax, 40 days.—A selection from the Black-Seeded Dwarf German, possessing all its desirable qualities and some additional merits. Vine 12 inches. Pods curved, meaty, solid, crystalline.

2.50 1.50 50 10

Landreth's Scarlet-Seeded Wax, 35 days.—Seed in color

deep scarlet, large, kidney-formed; the pods a golden wax. The vine strong, foliage large, broad, hardy. This valuable scarlet-seeded, yellow-podded Bush Bean in some particulars may be compared to the Golden Wax, but its pods are fully half as long again, broader and more meaty.

2.50 1.50 50 10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

SEEDS WHICH SUCCEED

BUSH BEANS—Continued

POSTAGE NOT
PAID ON BEANS.

Landreths' California Rust-Proof Bush Beans.—A golden wax sort, flat, long, straight and very free from rust. Variety exceedingly productive and maturing for table in about forty-five days after germination. Of celebrity from Norfolk south to Florida. Peck. ½ Peck. Qt. ¼ Pt.

Pencil Pod Black Wax.—Pods round, meaty, curved and borne in branches; ready for table in about 40 days from germination. 12 inches high. 2.50 1.50 50 10

Improved Golden Wax.—Maturing for the table in about 35 days from germination. A straight, flat-podded sort, but probably the best known of the yellow wax-pod varieties. 2.25 1.25 40 10

Round-Podded Kidney Wax, 45 days.—

An improvement on Wardwell's Flat Pod; quite as early, as long and as productive, while more showy and decidedly more luscious because more meaty. The pods round, full of meat, entirely stringless and very brittle; the color lemon-yellow; the seeds large and white when dry, with deep purple eye. Height 12 inches.

Peck, \$2.75 ½ Pk., \$1.50 Qt., 50 ¼ Pt., 10

Wardwell's Dwarf Kidney Wax, 40 days.—Seed smaller than Landreths' Scarlet, kidney-formed, color white with dashes of light purple about a white eye. Long, almost straight, flat pods.

Peck, \$2.75 ½ Pk., \$1.50 Qt., 50 ¼ Pt., 10

Currie's Rust-Proof.—A productive sort. Pods golden, long, broad, flat.

Peck, \$2.25 ½ Pk., \$1.25 Qt., 40 ¼ Pt., 10

Crystal Wax, 45 days.—Color of pods very light green and semi-transparent, round, curved, succulent, prolific, continuing long in edible condition.

Peck, \$2.50 ½ Pk., \$1.40 Qt., 40 ¼ Pt., 15

Hodson's Wax, 45 days.—Vigorous, creamy white, long, straight, flat, productive. Late, but most productive.

Peck, \$2.25 ½ Pk., \$1.25 Qt., 40 ¼ Pt., 10

Davis Kidney Wax, 35 days.—Productive, pods showy, long, nearly straight. Inclined to be stringy.

Peck, \$2.25 ½ Pk., \$1.25 Qt., 40 ¼ Pt., 10

Refugee Wax, 40 days.—A variety not excelled in every good quality. Pods round, curved, meaty, bone-white, productive. A sort hard to beat.

Peck, \$2.50 ½ Pk., \$1.40 Qt., 40 ¼ Pt., 10

Scarlet Flageolet Wax, 50 days.—Used either as a Snap or for shelling. Pods long and flat like Golden Wax. Seeds very large and kidney-shaped. Sold out. 2.50 1.50 50 10

Round-Podded Kidney Wax

DWARF LIMAS or BUSH LIMAS—SIX VARIETIES

Two Weeks Earlier than Pole Limas. Average Height of Vine, 18 Inches.

Dwarf Lima, Henderson's, 55 days.—This Bean, in three distinct colors, was introduced by us in 1885 before it was given the above name. We called it Dwarf Carolina. Height 1 foot, compact; leaves small, exceedingly dark green; very productive and early. Peck. ½ Pk. Qt. Pkt.

\$2.00 1.25 40 10

Dwarf Lima, Burpee's, 60 days.—This is a full-sized Lima borne in full-sized pods developed on plants of dwarf habit—an acquisition. Maturing for table ten to twelve days earlier than Pole Lima. Vine not over 20 inches high; foliage large; leaves pointed and light green. 2 to 3 beans in a pod. Plant 8 inches apart in rows 4 feet apart.

2.25 1.25 40 10

Fordhook Bush Lima, 60 days.—Foliage dark green; bush dwarf, about 15 to 20 inches in height, according to soil, quite bushy, dark in color and stiffly erect. Seeds of the Potato Lima class, but larger; pods large, containing three to four Beans, all of very large size, ripening at same time as Dreer's Improved Bush Lima. The leading Bush Lima, growing in increasing demand every day.

3.25 1.75 50 10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

POSTAGE NOT
PAID ON BEANS.

BUSH BEANS—Continued

Landreth's Bush Lima on right, Henderson's Bush Lima on left, showing comparative sizes.

Landreth's Bush Lima Beans, 50

days.—Strictly a bush; vine compact; foliage not so dark as the Henderson's; more productive in pods, which are more curved, one-fifth longer, broader and plumper. Beans longer, broader and twice as thick, and five days earlier than Henderson's; altogether quite distinct and more desirable.

Peck, \$2.60 $\frac{1}{2}$ Pk., \$1.50 Qt., 40 $\frac{1}{3}$ Pt., 15

Bush Lima, Dreer's, 60 days.—A dwarf variety of the Dreer's Improved Pole which has been fixed in its character of a Bush Bean; it is very prolific.

Peck, \$3.00 $\frac{1}{2}$ Pk., \$1.75 Qt., 50 $\frac{1}{3}$ Pt., 15

Improved Bush Lima, 60 days.—Height of bush 18 inches on good soil; very broad dark foliage. Sturdy and a week earlier than any large-podded Pole Lima. Seeds larger than any other Bush Lima, the green seeds being thick and meaty; the pods borne in abundance, large and showy; a continuous bearer throughout the season. Hardly as early as the old style Burpee's Bush Limas.

Peck, \$3.00 $\frac{1}{2}$ Pk., \$1.75 Qt., 50 $\frac{1}{3}$ Pt., 10

Bird Seed

Not for sowing in the garden, but for feeding cage-birds. Put up in one-pound packages. Clean seed, free from mold, which sickens and often kills birds. See inside back cover.

THESE PRICES
INCLUDE POSTAGE.

Broccoli

One Ounce of Seed to 100
Yards of Row.

A plant much resembling the Cauliflower, and like it derived from the wild Cabbage. Broccoli requires a longer season to develop than Cauliflower. It has more numerous and stiffer leaves, and the heads are smaller. The seed is best sown in Midsummer and Autumn, and the plants carried over Winter for planting out in Spring.

Large Early White, 150 days.—Large white head, resembling Cauliflower. We Lb. $\frac{1}{4}$ lb. Oz. Pkt.
offer an especially fine strain of Early White Broccoli, and strongly recommend
its more general culture. \$5.00 1.75 40 5

Brussels Sprouts

One Ounce of Seed to 100
Yards of Row.

A variety of the Cabbage family, possessing the peculiarity of bearing upon its stem or stalk from 50 to 100 buds resembling miniature Cabbage heads. The leaves composing these heads resemble Savoy Cabbage in their crumpled texture and also in their color. The heads or buds, from 1 to 2 inches in diameter, form one of the most delicious garden vegetables, only equaled by the Cauliflower. Treat same as Cabbage. Autumn-grown sprouts, drilled in May and transplanted in July, generally do best, as the plants are quite hardy and the buds mellow under frost.

Paris Improved.—A choice strain, each plant very productive of hundreds of
buttons size of a pigeon's egg. Delicious in flavor and exceedingly tender. \$1.50 60 20 5

Dalkeith.—A fine variety, producing large cream-white buttons. 2.50 70 20 5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Cabbage to produce Seed on Bloomsdale

Three Ounces of Seed
to 100 Yards of Row.

Cabbage

THESE PRICES
INCLUDE POSTAGE.

*No selections of Cabbage are better than those offered by us
Gardeners can rely upon LANDRETHS' CABBAGE SEED*

A few simple rules for planting and growing may help many to success where failure has heretofore been the result.

Don't have the soil in the seed-bed as rich as the field to which the Cabbage is transplanted, or the plants will be starved after transplantation.

Don't seed too thickly or force the growth too rapidly, or the plants will grow too tall, slim and tender and the growth be more seriously checked by adverse conditions.

Root deeply to resist drought. When setting out, plant up to the first leaf-stems.

Supply plenty of moisture and manure.

Don't sow the seed for a whole crop at one time, for plants of different ages are differently affected by adverse circumstances, and by division a planter will have a better chance to profit, at least from a part of his crop.

Trial Grounds.—347 Cabbage trials; 75 Cauliflower and Broccoli trials; 95 trials of Kale and Brussels Sprouts. All classified according to name and habit, all subject to the same conditions of soil, cultivation and climate. Fifty plants of each variety.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

THESE PRICES
INCLUDE POSTAGE.

CABBAGE—Continued

No. 7 Barn.—Housing a variety of Cabbage crop. The same process being done with all other crops. The stalks after being cut in the fields are tied up in sheets and hauled to the barn, where they are spread thickly on scaffolding arranged four feet apart, that the pods containing the Seed may completely dry before threshing. The sheets containing these stalks are hoisted up by a gasoline engine from the wagons to the various scaffoldings. ORDER "LANDRETH" CABBAGE SEED.

FIVE FIRST EARLY VARIETIES

Landreths' Earliest Pointed Cabbage, 65 days.—A selection from Select Jersey Wakefield, in which occurred some plants extraordinarily early, and out of them this is a selection. Of course, these very early plants do not produce heads so large as if developed over a longer period, but they are very choice in quality and attractive in appearance. Grown on Bloomsdale Farm with the special object of fixing a specially early habit. Quite one week earlier than the usual strain of Early Select Jersey Wakefield. 65 days.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.00	\$1.00	30	10

Landreths' Earliest Pointed, 65 Days

Wakefield, Select Early Jersey.—Heading for market 70 days from sowing. It is very early, short stemmed, head cone-shaped, broad at the bottom with pointed peak; leaves leathery, well folded over the top. A reliable header and most excellent in all good qualities. The strain we offer is unexcelled by any offered under other names or at a higher price.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.50	75	25	5

Landreths' Bloomsdale Grown Select Very Early Jersey Wakefield.—Specially selected, extra early, 68 days, choice in all good qualities, earlier than Long Island Wakefield. This strain is recommended to all gardeners

Landreth's Bloomsdale Grown Early Large Charleston Wakefield, 75 days

Landreth's Bloomsdale Grown Early Large Charleston Wakefield, 75 days.—Specially selected. Very choice and uniform, best of any from any source. Recommended to all gardeners.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.25	\$1.00	30	10

Early Large Charleston Wakefield.—Large, solid, half-pointed heads of good quality, later than Early Jersey; specially recommended for institutions and Market Gardeners, producing fully twice as much per acre as the Early Jersey. 75 to 80 days.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.50	70	25	5

FIFTEEN INTERMEDIATE RIPENERS

Landreth's Market Gardeners, 90 days.—Medium-sized heads deep and flat, weighing about 5 to 6 pounds, few outside leaves, fine color. Of celebrity in Florida among Market Gardeners.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.00	80	30	10

Winnigstadt, 90 days.—An old form, but one of the best, early pointed head.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.25	60	20	5

Landreth's Flat Intermediate, 90 days.—

An early and certain ripener. Three weeks later than the Wakefield. Its merits, in addition to earliness, being its choice quality, uniformity of head and attractive appearance. The leaves are small ribbed and well folded over, making a tight, flat, hard head, light green in color.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.25	\$1.00	30	10

Landreth's Flat Intermediate

Landreth's REEDLAND Early Drumhead, 90 days.

—To any one wanting an Early Flat-headed Cabbage of reliability, be he a Market Gardener, private gardener or an amateur, we recommend the Reedland Early Drumhead as uniting all the essentials. A variety bred upon our Reedland Farm. It is short-stemmed, flat-headed, large and unusually early for a large, broad-headed sort.

3.25	1.00	30	10
------	------	----	----

Copenhagen Market, 65 days.—Large round head, earlier than the Charleston Wakefield. Being larger, it produces a greater tonnage to the acre, and, being earlier, is very profitable. The plant is very short-stemmed; foliage light green. No loose outside leaves, and for this reason it can be planted very close in the row. One of the best of the Cabbage novelties.

4.00	1.75	50	10

THIRTEEN LATE RIPENERS

Landreth's Frost-Proof Large Drumhead Cabbage, 120 days.

A sort which stands out in the open fields of Bloomsdale Seed Farms all Winter without the slightest protection, although the temperature often falls below zero. High, cold winds do not kill it, nor does snow or ice. It is by far the hardiest of any Cabbage grown by us, and has proved of exceeding value in localities of variable Winter temperatures, as rapid fluctuations do not hurt it in the least. The Frost-Proof has a short stem and makes a deep blue and wide leaf, which folds over in opposite pairs, making a broad, flat, hard head, all very uniform in size and their period of maturity.

Landreth's FROST-PROOF Large Drumhead—120 Days

CABBAGE—Continued

	Lb.	¼ Lb.	Oz.	Pkt.
Bloomdsdale Large Late Drumhead, 110 days. —This is one of our standard late-maturing varieties. Late, large, solid, always reliable as a header and noted for its excellent quality.....	\$2.75	80	25	5
Landreths' Flat Standard, 120 days. —Large, solid, heavy, late, a certain header..	3.00	90	30	5
Premium Large Late Flat Dutch, 125 days. —A standard sort of wide celebrity because of its size and solidity.....	2.25	70	25	5
Market Gardeners' Large Late Flat Dutch, 120 days. —				
For a large, heavy, hard, smooth-leaved, late-ripening Cabbage, no strain is superior and few equal to this. The head is thick, broad, solid and slightly rounded on the top, though the variety is what is termed a flathead. The leaves extend well over the centre line of the head and fold down alternately, tightly forming a compact head. The natural habit of the seeding plants is to develop thick, short, stocky stems; but this quality is affected by the system of growth, for if the seedlings are crowded in the bed or grown among weeds or under the shade of a house, fence or tree, they reach upward for air and light, resulting in long, slim stalks, which bad form of plants cannot be corrected by any subsequent culture. It is grown upon our own farms, under our own personal daily oversight.....	2.75	80	25	5
Volga. —Same as Stonehead, silvery-green, large, solid. A superior header.....	3.00	90	30	10
Green Glazed. —A glossy, pea-green variety, cultivated in the Southern States, resisting the attacks of fleas, bugs and caterpillars better than others. A valuable quality.....	3.25	90	30	5
Red Dutch. —Leaves red or purple; generally used for pickling.....	2.60	70	25	5

Four Savoy Cabbages

Landreths' Earliest Pointed Savoy

Cabbage, 85 days.—Nothing like it among the Savoy Cabbage, it being weeks earlier than any of its Savoy class. Outside leaves light yellow and much bloated. Heads conical, yellowish-green, and very marrow-like. The flavor is like that of the Cauliflower, and we recommend it as a substitute where Cauliflower heads cannot be grown. Every plant makes a head and it will be found a profitable sort under all circumstances. Prices include postage.

Lb.	¼ Lb.	Oz.	Pkt.
\$3.00	90	30	10

Drumhead Savoy, Flat.—A favorite Savoy; a small drumhead, early and desirable in quality.

Lb.	¼ Lb.	Oz.	Pkt.
\$2.90	80	25	5

Green Curled Savoy, Pointed, 80 days.—This is undoubtedly the FINEST TYPE of Winter Cabbage. After having been frosted it *boils like marrow*, and is not surpassed even by the Cauliflower in its best condition. The strain is not to be confounded with *low-priced imported seed*. It is a shy producer of seed, and consequently never plentiful.....

3.00	90	30	10
------	----	----	----

Improved American Drumhead Savoy.—Best of its class and as palatable as a Cauliflower. Size large, heads solid, curly or crinkled leaved, stalks short, habit compact. A certain header of good keeping qualities..

3.00	90	25	5
------	----	----	---

Thirteen Carrots

Three Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre. Sixty to Seventy Days from Germination to Maturity for Table.

For domestic use sow when the Apple is in bloom. Drill in rows of fifteen inches for hand culture or two and a half feet for field culture, and when two inches high thin to four inches apart.

Extra Early French Forcing, 40 days.—We recommend this first early variety Lb. ¼ Lb. Oz. Pkt.
to Market Gardeners as admirably adapted for FORCING UNDER GLASS or in the open ground. It is stump-rooted, almost round, orange in color, grows about 2 inches long and nearly that thick.....

Consequently among the earliest ready for table. Very desirable as an early sort. No strain superior to that we offer..... 3.75 1.00 40 10

Golden Heart, 120 days.—A showy sort of excellent qualities. SOLID, of FINE FLAVOR and a GOOD KEEPER, and, as its name indicates, possessing when blanched a yellowish or golden tint..... 2.40 80 25 5

Paris Golden-Yellow or Golden Self-Blanching (French Seed), 110 days.—A solid, golden variety, very showy and rich. Very easily blanched as it naturally takes on a very attractive golden color, which is intensified by earthing up. Unexcelled. Grown by a special seed farmer in France. Seed crop very short.....25.00 7.00 2.00 20

TESTIMONIAL.—Thirty-four (34) acres Paris Golden-Yellow Self-Blanching Celery, grown on my farms at Wimauma, Fla., season 1912-13, from Seed purchased from D. Landreth Seed Company, of Bristol, Pa., produced a crop aggregating 20,187 crates, packed in what are known as ten (10) inch crates and marketed by Chase & Company, brought \$29,129.82, F. O. B. cars at Wimauma, Fla.
D. M. DOWDELL.

CELERY—Continued

THESE PRICES
INCLUDE POSTAGE.

	Lb.	¼ Lb.	Oz.	Pkt.
American-Grown Golden Self-Blanching. —Almost as good as the imported, but not in all cases so reliable as to purity. Of a more vigorous and stronger habit of growth than that from French seed. Very excellent.	\$7.00	2.00	60	10
Pink Plume, 110 days. —The same good quality as White Plume, the stalk beautifully tinged with pink. Very ornamental and very toothsome.	3.25	1.00	30	10
Giant Pascal, 140 days. —A mammoth, silver-white stalked variety of French origin, rapidly growing in favor because of its weighty productiveness and consequent profitableness. The Pascal is without doubt the most satisfactory of all the large green varieties and is an excellent winter keeper.	2.40	80	25	5
Celeriac Giant Prague, 120 days. —Very large, round, without rootlets. Similar to a Turnip in shape.	2.50	80	25	5

Chicory or Succory

Large Rooted. —Large leaves and thick stalks, excellent for salad and medicine	1.00	30	15	5
Witloof or Brussels Chicory. —The leaf stems tightly folded against each other, the heart bleached like Celery. Very popular in Europe. Market Gardeners should all have it; the sale is enormous of the imported stocks. In the open garden it is cultivated much like Celery.	1.80	50	20	10

SOLD BY MEASURE,

Corn

WE DO NOT PAY
POSTAGE ON CORN.

One Quart of Seed to 100 Yards of Row. Eight Quarts to the Acre. 120 to 140 Days from Planting to Cutting.

Sugar Corn

SEVEN EXTRA EARLY SORTS

Ears, 4 to 5 Cents Each.

	Peck.	½ Pk.	Qt.	½ Pt.
Extra Early Minnesota Sugar, 60 days. —Among the Extra Early Sugar Corns, coming into condition two or three days subsequent to the Corey. Ears well made out.	\$1.25	70	25	10
White Corey. —Stalks four to four and one-half feet high. A valuable sort, quite robust for a short-stalked and exceptionally early sort. Ears of a good length, that is from six to seven inches, grains large, sweet and tender.	1.25	70	25	10
Kendal's Giant, 60 days. —A large development of the White Corey type. Very early for its size. An acquisition. One of the best early sorts for a family garden, producing large ears for so early a variety.	1.25	70	25	10
Premo. —Good-sized ears. Very early, after the habit of White Corey; very popular.	1.25	70	25	10
Bloomsdale Sugar, 60 days. —An early sort introduced in 1891, but still superior to many of the first early varieties found in the catalogues	1.50	80	30	10

SEEDS WHICH SUCCEED

SUGAR CORN—Continued NINE INTERMEDIATE SORTS

POSTAGE NOT
PAID ON CORN.

	Peck.	½ Pk.	Qt.	⅓ Pt.
Landreths' Sugar, 70 days. —Many other Sugar varieties are earlier than this, but we believe it is the best all-round Corn and the most desirable as a main crop in the family garden. Planters will find it remarkably satisfactory and astonishingly productive, two ears on every stalk, often three and sometimes four. Stalks one foot shorter than the Evergreen and very close-jointed and sturdy, never blowing over. The ears set low, large and well filled. The grain is narrow and deep, somewhat similar in shape to Evergreen, but smaller. The ear remains long in edible condition, which is a very great advantage.....	\$1.60	90	25	10
Hickox, 70 days. —Very superior, an excellent sort preceding the Early Mammoth....	1.40	75	25	10
Old Colony. —An old-fashion variety, hard to beat, very productive and most excellent.....	1.40	75	25	10
Country Gentleman, 70 days. —A short-stalked, productive sort, frequently producing 3 ears to the plant. Ears large for so small a stalk; grain narrow and very deep, after form of shoe-peg. Highly recommended as one of the very best.....	1.50	80	25	10
Early Mammoth, 70 days. —The earliest long, slim ear among the very desirable sorts.....	1.50	80	25	10
White Evergreen Sugar, 75 days. —Slimmer and shorter stalks than the Stowell's Evergreen; broad, vigorous, deep green foliage without any red color; earlier by several days to produce ears suitable for table. Ears set low on the stalk, fully as large and grains a purer white than Stowell's.....	1.50	80	25	10
Perry's Hybrid, 75 days. —An early variety, productive and popular.....	1.50	80	25	10
Zigzag Evergreen, 78 days. —An early variety bearing exceedingly long ears. Stalk short and slender. Early in maturity for so large an ear.....	1.40	75	25	10
Evergreen Sugar (Stowell's), 80 Days. —The most popular among the late Sugar Corns. More bushels are used than all other sorts combined. Large, tender, very deep, milk-white grains.....	1.25	70	25	10

ONE LATE SORT

Late Mammoth Sugar, 85 days. —The strongest growing of all Sugar Corns. The ears are very large and showy. Valuable as a succession.....	1.50	80	25	10
---	------	----	----	----

Sweet Garden Corn

NOT TRUE SUGAR

Landreths' Earliest Table, 55 days. —This produces the largest ear of any variety of an equal earliness in maturing for table use. It is a half Sugar variety of the height of Crosby, or of about five feet. It can be grown in three-foot rows and cut out to eight inches. The ears are produced about eighteen inches from the ground and two to the stalk, the grain covering the entire cob clear to the point. On quick soil it should be ready for table eight weeks after germination, earlier than the earliest Corey, while producing an ear twice as large. Not being a Sugar Corn variety, it does not possess the sweetness of the Sugar sorts, but is very acceptable before the others are ready. To the Market Gardener it is very profitable.....	1.75	90	25	10
Extra Early Adams, or Early Burlington, 62 days. —Height of stalk 4 feet, ears set within 6 inches of the ground. Not a Sugar Corn, but a decided acquisition so very early in the season. Plant close in rows at 2½ feet and thin to 1 foot.....	90	50	20	10
Adams Early, 68 days. —In order of maturity after the Extra Early Adams.....	90	50	20	10
Early Landreth Market, 80 days. —Not a true Sugar Corn, but a hybrid or mixture between a Sugar Corn and the Adams Early, and cultivated on large areas by Market Gardeners. This variety will mature ears for market in about 80 days from germination. The stalk is quite leafy and grows to a height of 6 feet. A very profitable sort as a money maker. Plant in rows at 4 feet and thin to one foot.....	1.40	75	25	10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

POSTAGE NOT
PAID ON CORN.

Field Corn—Ten Sorts

	Bush.	Peck.	½ Pk.	Qt.
Early Bristol, 100 days. —From germination to entire hardening 100 days. A light yellow or lemon. Ears long and slim; very productive. Fine quality.....	\$2.00	60	35	10
Golden Dent (showy), 110 days. —Named from the bright color of the indented grain; a prolific variety. Very showy and weighty.....	1.90	60	35	10
Leaming, 110 days. —A productive and early producer of moderate-sized ears, bearing orange-colored grand seeded grains. This sort will thrive on thinner soil than either the Beauty or Golden Dent. It is of high reputation everywhere.	1.90	60	35	10
Snowflake, 120 days. —A pure white with dented crown; makes very white meal. Fine for ensilage. Very popular in the Cotton States.....	1.90	60	35	10
Golden Beauty, 120 days. —Productive of immense crops of large ears, golden grain. The handsomest of all. 100 bushels of shelled corn to the acre very usual....	2.00	60	35	10
White Dent, 120 days. —Large grain with indented crown, pure white interior, strong grower and productive.....	1.90	60	35	10
Southern White Gourd Seed, 120 days. —A very showy variety; large grain and snowy-white. Admirable for meal. Only offered for Southern culture.....	1.90	60	35	10
Old Cabin Home, 130 days. —A thick-eared Southern type of white Corn, with enormously deep and broad grain and extraordinarily slim cob. Remarkably fine for meal.....	2.00	60	35	10
Pop Corn White Rice. —A sort with pointed grain. A popular variety... Per 100 lbs.	7.00	per 100		15
Pop Corn Plain White. —Smooth and round grained. A harder sort than the White Rice..... Per 100 lbs.	7.00	per 100		15

Corn Salad

Eight Ounces of Seed to 100 Yards of Row.

Sow broadcast or in ten-inch rows in Autumn for cutting at close of Winter, or sow at close of Winter for early Spring use. When sown in Autumn cover very lightly with the lightest hay—the merest protection, more will be injurious.

Broad-Leaved (Large Seeded).—Used as a small Salad throughout the Winter and Spring. Sow thickly in drills, cover slightly first of Autumn, and sprinkle with straw on the approach of severe weather. Height 4 inches.....

Lb.	¼ Lb.	Oz.	Pkt.
75	25	10	5

Georgia Collards

Two Collards

One Ounce of Seed to 100 Yards of Row.

A loose-leaved plant of the Cabbage family. A hardy and excellent vegetable for Winter use. The Collard succeeds in localities where it is often difficult to grow Cabbage to perfection. Sow and treat precisely as Cabbage.

Buncombe.—A strain used in Georgia and the Carolinas, because considered best adapted to those soils and climates and the fancy of those localities. Far better than Georgia, being much better bred. Stems and leaves all green.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.00	30	15	5

Georgia or Southern.—Cabbage greens. Its robust and vigorous character fits it to resist conditions unfavorable to the perfection of more highly developed types of the Cabbage family. The leaves can be blanched white as Celery by enveloping each plant for a period of four weeks with a large paper or muslin bag. 70 days.

Lb.	¼ Lb.	Oz.	Pkt.
70	25	10	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

SEEDS WHICH SUCCEED

Trial Grounds.—Twenty-eight tests of White Spine Cucumber, distinct samples purchased from ten seed merchants, all claiming to sell better strains than their neighbors. Two rows or fifty plants to each sample—the tests later on showing many inconsistencies or variations in merit. We know something about the merits of different brands of White Spines.

Cucumber

**THESE PRICES
INCLUDE POSTAGE.**

Four Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre. Period of Maturity 40 to 60 Days from Sowing, According to Variety and Season of the Year. A good crop cannot be grown on thin soil.

For early use plant in hills 4 x 4 feet, on a warm border, when the Cherry is in bloom, and for a succession sow in drills at 5 feet when the Apple is in bloom. For pickles plant middle of Summer.

FOR SALTING FOR PICKLES

Short Prolific, pickling size

	Lb.	¼ Lb.	Oz.	Pkt.
Short Green Prolific Pickle, 50 days. —A variety of the "Frame type," but smaller and producing fruit suitable for pickling in fifty days from planting. An abundant bearer, highly commended for pickles, for which it is used by many of the most famous pickling establishments. Vines very short, admitting of planting in rows as close as 2½ feet.....	90	25	15	5
Jersey Pickle, 60 days to make pickles. —It is productive, and is said to "green" better than any other variety and to "hold color." Early Spring sowings will develop fruit of pickling size, 2 to 3 inches long, in 60 days; early Summer sowings still quicker.....	90	25	15	5

INCLUDE POSTAGE.

CUCUMBER—Continued

FOUR WHITE-SPINED VARIETIES FOR SLICING

So called because the thorns are white.

Early White Spine, 60 days.—A favorite sort grown by truckers for shipment to market. Used almost entirely for slicing.....

Lb.	¼ Lb.	Oz.	Pkt.
85	25	15	5

Extra Early Arlington White Spine Cucumber, 50 days.

—This develops for table earlier than the ordinary Arlington, being a selection of a deep green color, which color it retains during the days of transportation to market. Its earlier character makes it particularly desirable to Market Gardeners and equally desirable as a family garden sort. Fruit long, slim and attractive. Quite superior to the ordinary White Spine.....

90	25	15	5
----	----	----	---

Landreth's Extraordinary White Spine—A strain of White Spine which has gained great renown among both Truck and Market Gardeners

Landreth's Extraordinary White Spine, 50 days.—So

very superior in every particular to the ordinary stock of White Spine as not to be classed with it either in quality or price. Vine a strong grower, foliage broad-leaved, deep green, close-jointed; does not sunburn. Blooms early at every joint and sets fruit at every bloom, consequently very prolific. Fruit three inches long for Gherkins can be gathered in 45 days. Large fruit for slicing can be pulled off in eight weeks.....

\$1.30	40	15	10
--------	----	----	----

Bloomsdale Perfected White Spine, 55 days.—A produc-

tive white-spined variety with broad and showy foliage, habit of growth rather rampant. Fruit long and slim and very dark green throughout all early stages; but after reaching a length of six or seven inches the ribs at blossom end turn a bone-white, somewhat after the style of the White Spine, but not so entirely white at end as the familiar White Spine. This is a slim variety, dark and of a uniform thickness throughout its entire length. In its old stages and past its green condition, it turns a light lemon.....

INCLUDE POSTAGE.

SEVEN DARK SPINES

Landreths' First, 50 days.—Surpassed by few in length and slimness of fruit. The earliest long, slim field Cucumber in cultivation, maturing to slicing size for table in seven to eight weeks from germination; dark green, and desirable. Very poor seeder.....

	Lb.	¼ Lb.	Oz.	Pkt.
.....	\$1.50	40	20	5

Early Frame.—A leading variety, as it is among the best. A vigorous and productive vine, green all over, crisp and tender.....

	Lb.	¼ Lb.	Oz.	Pkt.
.....	90	25	10	5

Landreths' Choice, 50 days.—From

Japan, from whence everything is novel. Distinctive sort, similar to Japanese climbing, the foliage soft and velvety, and in shape resembling the leaf of a Cantaloupe. It is a vigorous grower and productive of fruit of medium length, even diameter throughout the entire length. A very desirable variety, when small, either for salting or pickling, or for slicing when of larger development.

Lb.	¼ lb.	Oz.	Pkt.
\$1.00	30	10	10

Emerald

Emerald.—Decidedly an acquisition because of its deep green color, which it retains unchanged for a week after picking, thus fitting it for shipping long distances. In size it is larger and slimmer than White Spine. The fruit is cylindrical, smooth, free from warts and bears brown spines.....

	Lb.	¼ Lb.	Oz.	Pkt.
.....	1.10	35	10	5

Turkey Long Green, pickling size

Turkey Long Green, 80 days to reach edible size.—Not so abundant a bearer, but recommended to all who put up their own pickles; fruit LONG and SLIM; only surpassed in quality by Landreths' First.....

	Lb.	¼ Lb.	Oz.	Pkt.
.....	1.25	40	15	5

London Long Green.—Vines vigorous, productive, more productive than Turkey Long Green; valuable for salting.....

	Lb.	¼ Lb.	Oz.	Pkt.
.....	1.10	30	10	5

Gherkin.—Burr, or West India Round Prickly Cucumber; used for pickles only. Seeds of the Burr variety require soaking before planting, as they sprout slowly.

Escarolle Batavian or Broad Leaved, 45 days. —Foliage broad and flat. Choice Salad. Stands dry weather better than other sorts of Endive.....	1.20	40	15	5

Egg-Plant

One Ounce of Seed to 100 Yards of Row. Matures for Table in 120 Days after Sprouting.

This seed is generally sown under glass and transplanted to the field 1 or 2 weeks after Corn-planting season. The plants are set in rows of 4 feet and at 3 feet in the row. The land cannot be too highly fertilized for this crop—very short, thoroughly rotted stable manure or similar preparation is best; strong or hot, rank manure is unsuitable.

Sow in hot-beds or other protected place early in the Spring; when up 2 or 3 inches transplant into small pots (which plunge in earth) so as to get stocky, well-rooted plants, and late in the Spring, or not till the commencement of Summer, unless the weather be warm, transplant into thoroughly worked, rich and recently well-manured ground. A good plan is to open a deep, wide trench, filling it nearly with manure; restore the earth and plant therein, placing the plants 3 feet apart each way. The seed does not vegetate freely; repeated sowings are sometimes necessary. It is almost useless to attempt the culture of Egg-Plant unless the proper attention be given. In growing the Egg-Plant in the Summer and Autumn months in Florida, great trouble is sometimes experienced in getting a stand of plants owing to the excessive heat and beating rains. This difficulty can be largely overcome by shading the ground where the seed is sown. If sown in beds the shading may be accomplished by means of frames covered with seed-bed cloth or by blinds of slats or common boards properly supported over the beds to cut off the direct rays of the sun. In Florida, if the seed is sown where the plants are to remain (a bad practice), the shading may be done by using Palmetto fans and leaves, and placing them one each on the north and south sides of the hill, the tops meeting over the seed. This plan is used by some of the most successful growers in the Gulf States.

About 3000 plants are required to plant an acre. These plants should produce an average of 4 to 5 fruits, weighing 5 to 6 pounds each. Our selected seeds are always taken from fruit weighing 6 to 8 pounds each; we have had them of 12 pounds in weight.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

EGG-PLANT—Continued

THESE PRICES
INCLUDE POSTAGE.**Landreth's
Large Round
Purple, 130
days.**—The

Landreth is decidedly the best selection of Egg Plant, being productive and vigorous, the fruit often reaching a weight of twelve pounds. The fruit may be described as chunky, broad at bottom and flattened, diameter often nearly equal to the length. Color, when grown on soil of proper quality, a deep purple, often appearing almost black. Soil has much to do with depth of color. Single plants of this variety on good soil often reach a diameter of three feet and produce six to eight large fruits.

*Landreth's Large Round Purple*

	Lb.	¼ Lb.	Oz.	Pkt.
Landreth's Large Round Purple, 130 days.....	\$4.00	1.15	40	10
New York Improved, 140 days.—An improved form of the old Large Round Purple.....	3.90	1.10	40	10

Large Round Black, 140 days.—Early. Twice the size of the Black Pekin; fully as large as the Large Round New York Purple, just as good and a quicker seller in market. Does not split. Color black all over the fruit. Known also as **Black Beauty**. Less liable to sunburn, consequently popular as a shipper from all market-garden districts where known.

Grass Seed

See List of Varieties named in this Catalogue, pages 6 to 10.

*Landreth's Lawn Grass is Unexcelled***Herbs—ALL AROMATIC**

These impart a strong, spicy taste and odor, and are used in various culinary operations. Those marked with an ★ are perennial, and when once obtained may be preserved for years. Of such sow the seed very carefully in seed-beds about the middle of Spring, and in the ensuing Autumn or Spring transplant them to convenient situations. The others are annuals, or such as come to perfection the first year and die. The seed of these may be sown carefully in shallow drills, middle of Spring, and when the plants are up a few inches thin them to proper distances. To preserve for use, dry thoroughly, rub the foliage almost to powder and put in jars or bottles and cork tightly.

	Lb.	¼ Lb.	Oz.	Pkt.
Anise. —White flower. Cultivated for flower and perfume. Seeds used as a condiment and in the manufacture of liqueurs, also in flavoring bread. Aromatic. 18 inches.....		30	10	5

★ Thyme, English. —Leaves much larger than the French. Used for seasoning. 8 inches.....	1.75	50		5

Horse-Radish

This plant, seldom producing seed, is propagated from sets cut from old roots, and in market-garden culture nearly always planted as a succession to a Spring crop, which by time of removal leaves the Horse-Radish well established. The sets are planted in rows of about 2 feet by 18 inches, frequently among Spring Cabbage. Holes are made with a long planting-stick, into which are dropped the Horse-Radish sets to a depth that the crown will be 3 inches under the surface. It will only succeed in highly fertilized land, and each year should be planted afresh. In garden-culture the sets are sometimes planted in the upper end of round drain tiles sunk into the ground and filled with earth, the Radish root being thus directed straight downwards. Yield about 150 bushels to the acre. Does best on damp soil. By mail, postage paid, 25 cents per dozen. By Express, 100 for 60 cents; 1000 for \$4.90.

Kohl-Rabi

One Ounce of Seed to 100 Yards of Row.

This plant, used both for table and for cattle feeding, is a Cabbage in which the cultural development has been directed to the stalk, not to the leaf. The enlarged stalks, taking the globular form of Turnips, are more hardy and nutritious than Turnips. Any good soil will produce a crop, the plants for which may be grown, like Cabbage, in seed-beds for transplanting or sown in permanent position in 3-foot rows. Sow the seed for table use at any period when Cabbage may be sown. Drill in rows at 2 feet and thin to 6 inches. For cattle feeding drill the seed in Midsummer for Autumn development. Yield 300 to 400 bushels to the acre. For the table, the half-grown plants are superior to Turnips, and are in season during June, July and August, or at periods when Turnips are not good. Try them when the balls are no larger than a silver dollar. They will be found very choice and a rarity of merit.

FORCING, 55 days, Very Early White Vienna. —Similar to the White Vienna, but five days earlier. Very choice. Leaves very few and very small.....	Lb. 2.60	¼ Lb. 75	Oz. 25	Pkt. 10

Common Green or White. —Long-leaved, large ball, often 8 inches in diameter; used for cattle feeding.....	95	30	10	5

Lawn Grass (see List of Varieties in this Catalogue on pages 6 to 8.)

A Green Sod.—A quick green covering on bare earth can be obtained in two weeks after sowing White Clover—not as good a sod as from choice Lawn Grass, but such as it is obtained in quarter the time. Therefore when an immediate effect is desired, use White Clover. One-quarter pound of White Clover will sow a space 20 x 20 feet, or 400 square feet. Price, 60c. per pound, postpaid.

The Grass Seed Mixture "Landreth's Never Die," sold, postage paid, at 35c. per pound, is fully described on pages 6 to 8.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

INCLUDE POSTAGE.

One Ounce of Seed to 100 Yards of Row. Four Pounds to the Acre. Fifty Days to Produce a Crop Suitable for Cutting.

Hardy greens for cutting. Curly, loose-leaved plants of the Cabbage family, of hardy character and succeeding on almost any soil. Sow in early Spring when the Oak is in full leaf and again in early Autumn. Drill in rows of 2½ feet and thin to 8 to 10 inches, according to vigor of variety.

Landreth's Bloomsdale Kale, 50 days.—Similar

to, but far better than, Dwarf Curled Scotch, being very curly, broader spreading and far denser in foliage, darker in color, so short in stem as to rest directly on the ground. Plants broader than a bushel basket and seeming to hug the earth. More hardy than Dwarf Curled Scotch, passing unharmed through the severest winter as far north as Philadelphia. 9 inches.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.35	40	20	10

Dwarf Extra Curled German Greens.—A variety of lighter green tint than the Dwarf German Greens, and much curled.

Lb.	¼ Lb.	Oz.	Pkt.
70	25	10	5

Bloomsdale Kale—Leaves almost flat on the ground. Very choice.

Norfolk or Dwarf Curled Scotch, 55 days.—A favorite sort.

Lb.	¼ Lb.	Oz.	Pkt.
-----	-------	-----	------

Foliage yellowish-green, but not as dwarf as Bloomsdale.....	75	25	10	5
--	----	----	----	---

Siberian or Philadelphia Dwarf German Greens, 60 days.—Leaves curled on edges; hardy, standing the most rigorous winters. Blue leaved, or slate color. Sow in Autumn for "sprouts" or "greens." Height 4 to 6 inches. Sow in permanent position. Color dark.....

65	20	10	5
----	----	----	---

Imperial or Dwarf Curled Slow Seeder, 60 days.—A sort slow to shoot, and for that reason very profitable both to the market and private gardener. Very productive in leaves, blue-green and curled on edges.....

75	25	10	5
----	----	----	---

Spring Kale.—Sow four or five seeds to the inch in the open garden very early in the Spring. It will afford a quicker cutting of greens than any other plant.....

50	15	10	5
----	----	----	---

Leek

Two Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre. Ninety Days from Germination to Edible Condition.

Sow when the Apple is in bloom and again in Midsummer. If for permanent position, sow in rows of 2 feet; if for transplanting, sow in close beds. To secure a full development, thin out the rows or plant the seedlings at 3 inches apart in the row. Upon the approach of hard frost take up the plants and preserve in trenches the same as Celery. Yield from about 100 to 150 bushels to the acre.

	Lb.	¼ Lb.	Oz.	Pkt.
--	-----	-------	-----	------

Carentan, 80 days. —Very superior, large rooted, broad leaved. Very hardy.....	\$1.50	50	20	5

Lettuce

Two Ounces of Seed to 100 Yards of Row. Three Pounds to the Acre. Forty to Fifty Days from Seeding to Maturity.

To have fine Lettuce in early Spring, sow in seed-bed from commencement to middle of Autumn. During Winter protect the plants by a box covered with window or other sash or with litter as they stand on the ground. Early in the Spring transplant some into rich ground. The others force under the sash. Or in early Spring sow in a hot-bed and transplant, but Autumn-sown plants are best. For a later supply, sow in drills when the Cherry is in bloom; when up a few inches, thin out, leaving plants at proper distances; this is a better plan than transplanting late in the season. For this purpose use Select Big Boston, Landreths' Forcing, Virginia Solid Header and heat-resisting varieties, which we have selected as standard sorts by reason of their ability to resist heat and the longer time they are in condition for the table than some other kinds which shoot to seed as soon as the head is formed.

SEVEN LOOSE-LEAVED OR CUTTING VARIETIES

	Lb.	¼ Lb.	Oz.	Pkt.
Landreths' Earliest Cutting, 35 Days. —The earliest cutting Lettuce in the market. It may be planted close, as it does not head, and affords curled, crisp, good-flavored foliage long before the heading varieties have commenced to close up.....	\$1.75	50	20	10
Black-Seeded Simpson, 40 days. —A cutting variety of unusual merit; not so golden as Silesian, but of greater popularity.....	1.25	40	15	5
Early Curled Silesian, 40 days. —A cutting variety; the second to produce edible leaves.....	1.20	40	15	5
Golden Curled. —A golden-leaved sort, producing a half head of rare excellence; leaves much fluted on the edges; very showy and a most admirable cutting sort.....	1.40	40	15	5
Bronzed Curled. —A half Cabbaging variety of bronze-edged leaves and superior to either Prize Head or American Gathering.....	1.50	45	15	5
Grand Rapids. —A loose-leaved, vigorous grower, resembling Landreths' Golden Curled. Very popular for forcing under glass.....	1.50	45	15	5
Prize Head or Satisfaction. —A cutting variety of curly leaves, having bronze edges and general bronze effect.....	1.20	35	15	5

EIGHTEEN HEADING VARIETIES

LANDRETHS' EXTRA SELECT BIG BOS- TON, 50 days.—Seed

saved from a selection better than that producing the ordinary stock of seed. Heads very large, solid and uniform. Landreths' stock of Big Boston is of great superiority.

Lb.	¼ Lb.	Oz.	Pkt.
\$2.50	70	25	15

Black-Seeded Tennis Ball.—A nearly reliable header, compact in growth, the leaves close set and slightly bloated or savoyed. Color a whitish-green.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.40	40	15	5

Big Boston, 50 days.—Very popular as a reliable and uniform header. Leaves short and round-ended, slightly crumpled. Deep green with bronzed edges, all forming a compact head, making it a very desirable sort for forcing. A variety in demand beyond the supply.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.50	50	20	5

Landreths' Extra Select Big Boston

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

SEEDS WHICH SUCCEED

LETTUCE—Continued

**THESE PRICES
INCLUDE POSTAGE.**

Lb. ¼ Lb. Oz. Pkt.

Hanson.—Leaves curled and quite golden in color, folded so tightly as to make a perfectly white interior. A variety so resistant to hot temperatures as to make it very popular \$1.25 35 15 5

California Cream Butter.—A good Summer sort of reliable heading quality. Color yellowish-green, slightly marked with brown specks. Interior bleaches white.
Lb. ¼ Lb. Oz. Pkt.
\$1.25 35 15 5

Landreths' Forcing, 35 days.—Small, crisp, compact heads of three inches in diameter before any other sort commences to head. Having very few outside leaves, it can be planted at less than half distance—more than twice as many to the space as of larger sorts. A valuable sort to the forcing house gardener or to the cottager using hot-beds or cold frame, because so many plants can be set on a limited space.

Lb. ¼ Lb. Oz. Pkt.
\$2.00 60 20 10

Landreths' Forcing—Particularly choice

May King, 40 days.—One of the earliest varieties to produce perfectly round Cabbage-shaped heads, a uniform header and an all-header. Outer leaves round, smooth on edges, handsomely savoyed. Color a yellow-green with a slight tinge of bronze, while the inside color of the head is almost golden.

Lb. ¼ Lb. Oz. Pkt.
\$1.40 40 15 5

Iceberg.—A sort of remarkably thick, strong yet marrow-like ribs, forming a completely protected interior. Blanches absolutely white.

Lb. ¼ Lb. Oz. Pkt.
\$1.40 40 15 5

May King

Landreths' Virginia Solid Header, 40 days.—Six weeks from the sowing of the seed to the formation of a close head of unexcelled attractiveness and quality, making this variety superior to nine out of ten sorts. It is equally adapted for culture either in the open garden or under glass, as it is exceedingly compact and a certain header. It is largely used by the most discriminating Market Gardeners—in the greenhouse, in the cold frame and in the open ground.

Lb. ¼ Lb. Oz. Pkt.
\$2.25 70 30 5

Landreths' Virginia Solid Header

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

TO BE SATISFIED ORDER FROM LANDRETH

**THESE PRICES
INCLUDE POSTAGE.**

LETTUCE—Continued

Speckled Dutch Butterhead, 50 days.—A long-standing white Cabbage variety, forming quite compact heads, the leaves possessing the peculiarity of being irregularly dotted with spots resembling iron rust. This is the favorite variety with Market Gardeners in the neighborhood of Philadelphia. Lb. ¼ Lb. Oz. Pkt.
\$1.40 40 15 5

Bloomsdale Early Summer, 50 days.—None better, it being a certain and good header, early and attractive. Sugar-loafed.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.65	50	15	5

Bloomsdale Reliable, 50 days.—A week later than May King, darker in color, larger in head, more round in leaf. A favorite sort. Sold out.

Brittle Ice Lettuce.—Peculiar in appearance—a veritable ice head—smooth leaves fluted on the edge and closely formed, making a blanched or crystal interior. These blanched leaves are very brittle and attractive; the ribs thick and marrow-like.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.75	50	20	10

Mammoth Butter (Black Seed).—A selected strain, with large, solid, yellow heads. The favorite variety of the New York Market Gardeners.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.45	40	15	5

Salamander Perfected

Bloomsdale Butter (Black Seed).—Late in development and consequently valuable as a succession to the earlier sorts. Foliage dark green, large and showy. 1.65 50 15 5

Salamander Perfected, 50 days.—Very similar to Bloomsdale Reliable, a little larger, a little later and a darker shade of green. 1.20 35 15 5

New York Green or Wonderful.—A large, late variety of dark green color. 1.50 50 15 5

Deacon.—A fine sort, resisting sunburn. While the outside leaves are of a light green, the interior of the head is a rich, buttery type. The variety stands hot weather. 1.20 35 15 5

Cos Lettuce—Four Sorts

Landreths' Romain, 50 days.—All Americans familiar with European travel have been delighted with the long, shell-shaped, narrow-leaved Lettuce served everywhere and termed Romain on the hotel bills of fare; but upon their return home they have not found the Romain in the American markets. Yet if they have home gardens they can grow it themselves to as perfect a condition as observed abroad. The Landreths' Romain is a fine type of this Lettuce. 2.00 60 20 10

Landreths' Heat-Resisting Green Cos, 52 days.—Vigorous, always heading, crisp, never wilting under the severest sun. Remarkably fine. It should be in every garden. We recommend this for Florida and Gulf States, as it resists heat, and growing erect and being tied for blanching, remains free from sand. 1.90 60 20 10

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

LETTUCE—Continued

THESE PRICES
INCLUDE POSTAGE.

Landreths' Florida Favorite Cos, 55 days.—A most desirable sort. Flourishes on hot, dry sand. Produces long, narrow, erect leaves, which require tying up to blanch; prevents the entry of sand into the head.

Landreths' White Cos—Interior of head absolutely white and crisp

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.90	60	20	10

Landreths' White Cos, 50 days.

—This variety, maturing for table in seven weeks from germination, should be found in every vegetable garden, as it is a thoroughly reliable Lettuce. A strong grower and very productive, with long, shell-shaped leaves of most excellent quality. It is a self-folder, but when the plant is over half-grown it is best tied up with a soft string or a wisp of grass, that the inner leaves may be blanched perfectly white, in which condition they are more crisp and decidedly more palatable than varieties of a Cabbage-heading habit. It is a mystery why it does not displace them, especially as a given amount of ground will produce more than twice the amount of edible leaves that can possibly be obtained from any round-head variety. The Landreth White Cos is a choice selection from the Cos family, variations of which are used in Europe to a far greater extent than those of any other Lettuce. The sort served everywhere in Europe. If in rows, space the rows three feet apart and set the plants nine inches apart in the row, as they require that space to develop.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.00	60	30	10

Mustard

Five Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre.

In the Spring, when the Pear is in bloom, drill in rows 1 foot apart. To have a succession the sowings should be made every two or three weeks till October. Cut young; when old the flavor is strong. Once sown, certain to perpetuate itself.

Leaf of Ostrich Plume Mustard

Ostrich Plume.—Double curled. Exceedingly ornamental. Green. Very superior to any other curly sort. Very delicate in texture; well named.....

Lb. $\frac{1}{4}$ Lb. Oz. Pkt.

75 30 10 5

Creole, or Giant Southern Curled, 30 days.—A fine curled sort. It is quite ornamental. Ready for table use in all its stages of growth.....

60 20 10 5

THESE PRICES
INCLUDE POSTAGE.

MUSTARD—Continued

Bloomsdale Large-leaved Mustard—Growing in a flower pot

Bloomsdale Large-leaved, 35 days.—

So named by reason of producing, when fully grown, immense leaves which are as long and as broad as the largest Tobacco. These same leaves when size of a man's hand are very tender and admirable as a salad. The leaves when twice that size we recommend for boiling as Spinach. This plant should have a place in every Southern garden. An immense amount of edible material can be raised on a very limited space.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
75	30	10	5

Mushroom Spawn

The culture of Mushrooms to the initiated is very easy, but it is a subject of much difficulty to the novice. We cannot attempt here to give at length the necessary directions, but refer the inquirer to some of the publications upon the subject.

Kept on sale in the form of bricks. Two bricks of spawn broken up into pieces an inch in size will spawn a surface a yard square. The spawn is planted in dark pits, caves, in outdoor hot-beds, or on banks of compost. Better-quality spawn cannot be bought than that we offer.

English Mill Track.—Celebrated the world over. Price per brick of about $1\frac{1}{2}$ pounds, **35c.**, postage paid. Price per dozen bricks, about 18 pounds, **\$2.00**, by express.

Brandywine Spawn.—Very widely celebrated for its perfect germination and fine quality of buttons produced. Price per brick, postage paid, **40c.** In larger lots, by express, **20c.** per brick.

Watermelon

Three Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre.

When the Black Walnut is in one-inch leaf, plant Melons.

Watermelons do well upon sod ground or upon land prepared for their reception by plowing down a crop of Winter Wheat or Winter Rye, the sod or grain aerating or keeping loose the soil. When the Walnut is in bloom the seed is planted in hills at 10 feet apart in each direction. Two large shovelfuls of well-rotted stable manure dug and trampled into each hill and covered with earth.

The cultivator should be prepared with quite 4 pounds of seed to the acre, that he may have a reserve for replanting in case of destruction of his plants by insect depredations or beating rains.

One vine alone to the hill should be allowed to attain perfection. With 450 hills to the acre, there should be 900 first-class Melons.

Much of the Melon seed offered throughout the country is the product of immature and deformed Melons remaining in the field after all the choice fruit has been selected.

Landreths' Bonfire, 75 days.

—The vine is vigorous, the melons 10 to 12 inches in diameter, nearly round. The rind is a black-green, both green and white part being only a quarter of an inch thick. Just beneath the skin the interior is of an intense scarlet color of a uniform brilliancy—no white meat—and the color, which we term scarlet, is of a most dazzling effect. The meat, without an interior break or crack, is crystalline, delicious in flavor and produces exclamations of surprise from anyone who sees one of the melons cut. An entirely new form, as indicated by the arrangement of the seeds.

EIGHT ROUND AND OBLONG MELONS

	Lb.	¼ Lb.	Oz.	Pkt.
Extra Early (65 days from germination). —Very desirable as the first Watermelon to ripen. Every one should have it. Form oblong. Weight from 15 to 16 pounds	85	25	10	5
Light Green or Round Light Icing, 75 days. —One of the <i>best of all Melons</i> ; always of good flavor, rind very thin. <i>Unexcelled in all good qualities.</i> Very choice, crystalline. Fine for home use.	80	25	10	5
Dark Green or Round Dark Rind Icing, 75 days. —Shape, size and flavor same as Light Icing, but dark-skinned, almost solid black.	80	25	10	5
McIver's Sugar, 80 days. —Oblong in form. General ground dark colored with lighter stripes, darker than Rattlesnake, very small foliage, vigorous vine. Flesh very sweet, pink in color.	95	25	10	5
Blue Kolb Gem or Iceberg. —Similar to the old Gem, but of a blue skin.	70	25	10	5
Indiana Sweetheart, 90 days. —Resembling a Large Round Icing, but heavier and paler in color, good bearer and a reliable shipper, standing any amount of rough handling.	80	25	10	5
Success, 80 days. —A large and almost round melon of great celebrity in Virginia and Maryland, so well thought of as to be cultivated by the hundreds of acres. The flesh is bright, solid, crystalline and very sweet. The rind is dark green and so tough as particularly fits it for shipment. The variety is very productive and profitable.	90	25	10	5
Preserving Melon, Red Seed, 90 days. —A round, light and dark-striped Melon, meat greenish-white, used for <i>preserving only</i> ; seeds red and small. Tough rind.	85	25	10	5

Landreths' Arkansas Traveler

SIXTEEN LONG MELONS

	Lb.	¼ Lb.	Oz.	Pkt.
Landreths' Arkansas Traveler, 75 days. —A medium-long and for its size a very weighty Melon, averaging 40 pounds. Long, dark green, with waving stripes of black. Interior of fruit always solid, the edible portion extending to within half an inch of the skin. The flesh a brilliant red, sweet, tender, crystalline, very juicy and altogether at once impressing one as a superior variety. It is intermediate in ripening. Has a very hard rind and therefore is a good shipper.	90	25	10	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

	Lb.	¼ Lb.	Oz.	Pkt.
Indian Chief. —Most popular all along the Atlantic Seaboard. A big producer, a fine seller, a money-maker. A large, long, dark, fine shipping variety.....	\$1.25	40	15	10
Halbert's Honey, 80 days. —Equal to the Kleckley Sweet, of 20 inches oblong form, almost equally round at each end. Rind dark green. A most profitable seller in local markets, but not a good shipper.....	95	30	10	5
Seminole. —This Melon resembles the Landreths' Light Icing. Sweet and melting.....	70	25	10	5
Landreths' Boss, 80 to 90 days. —We still adhere to our claim that no Melon has ever been introduced which can be compared with the Boss in delicacy of flavor, dazzling brilliancy of color of flesh, solidity of flesh, depth of flesh, melting quality and everything going to make a perfect Melon. Success with the Boss, however, is only met with when the soil is strong and rich, both naturally and artificially, and it requires a space of 9 x 9 or 9 x 10 feet to the hill. Under good conditions Melons weigh from 30 to 40 pounds, and we have had frequent reports of their reaching a weight of 60 and 70 pounds to the Melon. True stock can only be had direct from us.....	1.00	30	15	10
Bradford, 85 days. —Similar to the famous Joe Johnson in shape and markings; long, color dark, with darker wavy bands, flesh melting and of excellent flavor....	80	25	10	5
Duke Jones. —Rind dark green, with irregular colored stripes; very prolific and of fine appearance.....	70	25	10	5

Cantaloupe or Musk Melon

Two Ounces of Seed to 100 Yards of Row. Four Pounds to the Acre.

Cantaloupes, or Citron Melons, as they are termed in Jersey, do well upon sod ground or upon land prepared for planting by plowing down a crop of Winter Wheat or Winter Rye, the sod or grass aerating or keeping loose the soil. No plant is more influenced by the conditions of its growth.

The seed is planted at about Corn-seeding time, or when the Apple is in bloom, in hills about 4½ feet in each direction, two shovelfuls of well-rotted stable manure being tramped into each hill and covered with earth. The large, long Melons, like the Reedland Giant and Casaba, are generally sold by the hundred; Melons of the ordinary form and size are sold by the basket of one-half to five-eighths bushel capacity. Twenty-six hundred hills to the acre should produce 15,000 to 20,000 fruits. Cantaloupes and Cucumbers are often destroyed by lice on the vines. The remedy to meet such depredations is to spray the leaves with Bordeaux Mixture. Cantaloupe vines are often blighted by heavy early morning fogs, the leaves appearing afterward as if a flame of fire had passed over the field.

TWENTY GREEN-FLESHED VARIETIES

	Lb.	¼ Lb.	Oz.	Pkt.
Small Jenny Lind, 58 days. —A very small early variety, flattened at the poles, of surpassing good quality, recommended for family garden, rather small for market. The only variety which has retained its reputation for a period of 50 years as an unexcelled family melon.....	\$1.00	30	10	5
Landreths' Extra Early, 63 days. —This, so far as we can observe, is the first large Cantaloupe to ripen, being almost as early as the Jenny Lind, while twice its size. The form is half flat, fairly ribbed, green-fleshed. Its merit consists in its early ripening habit. The quality is not the best—not very sugary—but that can be waived, so long as it is decidedly earlier than any other large sort.....	1.00	30	15	5
Large Jenny Lind, 65 days. —A double-sized development of the Small Jenny Lind.	1.00	30	10	5
Landreths' Shipper's Pride, 65 days. —The vine a very productive producer. Fruit flat at both ends, and of habit of a Large Jenny Lind; outside of the surface of the fruit completely netted or ribbed with a fine tracery, protecting it against abrasion in transportation; the flesh light green and of a most delicate flavor. The fruit is of a size to pack about 30 in a crate.....	95	30	10	5
Extra Early Cape May, 65 days. —A very early and large round Cantaloupe or Musk Melon of nutmeg form; quality most excellent and exceedingly productive; fruit deeply ribbed and heavily netted, flesh deep green, tender, juicy, very sweet; foliage very small and distinct and proof against sunshine.....	1.50	45	15	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

**THESE PRICES
INCLUDE POSTAGE.**

CANTALOUPE—Continued

Extra Early June (Fine), 67 days.—A large, flat, early Melon, following the Extra Early. Fruit more flat than the Jenny Lind, deeply ribbed, heavily netted; flesh green, of a most exquisite quality.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.50	45	15	10

Landreth's Pineapple Cantaloupe.—

Market Gardeners have sold carload lots of the Landreth Pineapple Cantaloupe at double the price of other sorts sent to market at the same time. So eager have Market Gardeners in two or three sections been to get the seed, that last year many of them paid \$5 per pound for it, and would have paid \$10 per pound. It is twice as large as the Rocky Ford. Flesh green, deep and of a most excellent flavor.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.40	40	15	10

Landreth's Pineapple, 70 days

Extra Early Hackensack, 65 days.—A week or ten days earlier than the old Hackensack. Small foliage.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.00	30	10	5

Eden Gem, 70 days.—It is a small-fruited selection out of the Rocky Ford. It is sometimes called Netted Rock, and in some Melon districts has proved to be the best of the Rocky Ford types. Possessing all the good qualities of fruit and some very hardy characteristics of vine. Flesh green with orange tint next seed.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.75	50	15	10

Rocky Ford, 70 days.—A Cantaloupe of great celebrity grown at Rocky Ford, Colo. Slightly pointed at both ends. Small in size, but of very superior flavor; rind well ribbed; flesh green with a line of gold just beneath the skin. The most popular and most grown of all Cantaloupes.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
75	25	10	5

Extra Early Hackensack

Rocky Ford Double Extra Select,

70 days.—This seed is saved out of hand-selected fruit and is superior to the ordinary run. Flesh light green and of a delicate, spicy flavor. Melon well ribbed and netted. No strain of Rocky Ford seed is better than this which we offer as Double Extra Select.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.60	50	15	10

Atlantic City, 72 days.—A fine, bold, pineapple-shaped Melon of excellent quality, large and very showy; moderately ribbed and so heavily netted as to fit it for shipping to long distances. Flesh green, thick and sweet; doing admirably well on sandy soils and possessing all the good qualities of the Acme or Baltimore Citron, with largely increased size. Forty will frequently fill a barrel, and their appearance sells them.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.25	40	15	5

Rocky Ford Double Extra Select

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

\$2.50	70	25	10

Knight's Early, 70 days.—Green-fleshed, by many considered superior to Rocky Ford, rounder at the ends, sometimes a perfect globe, completely netted, small ribbed, a good shipper. Very healthy and productive.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.25	40	15	10

Missouri, 80 days.—A sort of rare good quality. Form globular, flattened at each end; wonderfully ribbed, with dark green cavities, ribs covered with strong netting, fitting it for shipment; flesh green, flavor excellent, foliage strong and hardy.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.50	45	15	5

Netted Rock King

Anne Arundel

Anne Arundel (70 days from planting to ripening).—A thick, oval Melon much larger than Rocky Ford, ribs very distinct and netted all over. Flesh green and sugary. It is in all respects one of the best of Melons. Its entire webbing or netting fits it to resist abrasion during shipment. It always gives satisfaction on good ground.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.00	30	15	5

Large Hackensack, or Turk's Cap, 80 days.—

Flesh green, a favorite with Market Gardeners. One of the best Melons for shipping; will carry 10 days. Twenty will generally fill a barrel. Suitable for heavy soil.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
95	30	10	5

Montreal, 85 days.—A particularly showy Citron, average weight 10 pounds, going up to 20; 8 to 9 inches largest diameter. Well ribbed and netted. Flesh deep, sugary and green in color. Suitable for heavy soil. Of such great celebrity in Canada as to be the only variety cultivated. Best started under glass in frames and remaining in original location.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$1.25	40	15	5

Large Hackensack

INCLUDE POSTAGE.

CANTALOUPE—Continued

Acme or Baltimore.—A Melon of high repute in Philadelphia and Baltimore. Known in Maryland as the Baltimore Citron. It is showy, pointed at both ends, strongly netted, which fits it for shipment, the netting protecting it from injury. This variety, in good average soil and under average conditions, will produce 100 barrels to the acre. The best selling Melon in the Philadelphia market. Green fleshed, fine flavored, productive and a good shipper, packing 25 to 30 to a crate.....

Lb.	¼ Lb.	Oz.	Pkt.
95	30	10	5

SEVEN ORANGE-FLESHED VARIETIES

Emerald Gem, 80 days.—A small, very early Melon; form globular, flattened at the poles, ribbed, netted, orange flesh, deep emerald-green line under the skin. Outside rind dark green.....

\$1.25	40	10	5
--------	----	----	---

Salmon and Green, 80 days.—Fruit slightly oval and regularly rounded at the ends. Lightly ribbed and slightly netted; skin very dark green; extremely thick fleshed, the edible portion extending to the very rind. Flesh deep orange and very sweet. Cavity small.....

1.50	45	15	5
------	----	----	---

Paul Rose or Petoskey, 75 days.—Possessing characteristics of the Osage, form slightly oblong, distinctly ribbed, slightly netted, color when unripe a deep green, turning a golden tint; flesh salmon.....

1.00	30	10	5
------	----	----	---

Osage, or Improved Miller's Cream, 75 days.—Fruit medium sized, oval, slightly ribbed, dark green in color, covered more or less with shallow netting. The flesh is deep salmon color and very thick, there being but a slight cavity in the centre of even the largest fruit. A favorite variety for the later markets,

as there is always a considerable demand for it from the restaurants and hotels, where its excellent qualities are highly appreciated.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.20	35	15	5

Ordway Pink, or Burrell's Gem, 75 days.

—Vigorous, healthy foliage, fruit well netted, flavor excellent, salmon colored, small cavity, seed firmly held together; might be called an orange-fleshed Rocky Ford, but shows a button at the blossom end.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.00	30	10	5

Surprise, 80 days.—

This occurs with both green and orange flesh, the orange-colored variety being much superior. Very productive of medium-sized fruit, nearly round, sometimes a little flattened. Color of skin light creamy green, flesh yellow, little netting. Very sweet and fine flavor. Earlier than Tip Top.

Lb.	¼ Lb.	Oz.	Pkt.
\$1.50	45	15	5

Nasturtium or Indian Cress

THESE PRICES
INCLUDE POSTAGE.

Four Ounces of Seed to 100 Yards of Row.

Just before Corn-planting season sow in drills at 3 feet and thin out to 5 inches, or plant to trellis-work. The Dwarf is the best, as it does not require sticks or training.

The flowers and young leaves are used as a salad. The seed-pods, with foot-stalks attached, are gathered while green and tender and pickled as a substitute for Capers.

We cannot say too much in praise of the Nasturtium as an ornamental plant. Far superior to the Sweet Pea, as it blooms earlier and months longer or till killed by frost. It is cultivated as easily as Corn.

Tall Mixed, 70 days.—A variety for garden culture. A running vine 5 to 6 feet....

Lb.	¼ Lb.	Oz.	Pkt.
65	20	10	5

Ornamental Sorts, 70 days.—These are all described under Flower Seeds. (See page 19.)

Okra or Gumbo

Twelve Ounces of Seed to 100 Yards of Row. Twenty Pounds to the Acre. Sixty Days from Planting to Maturity.

Plant the seed when the Apple is in bloom, in hills or drills; if in hills, 2' feet apart and two or three plants in each; or in drills, 3 feet apart and 8 or 10 inches between the plants. The seeds are liable to rot in the ground, and should be put in thickly to secure the requisite quantity of plants. Very rich ground is demanded by this vegetable.

Landreths' Dwarf Stalked Long Green Pod, 50 days.

Gumbo soup made out of the Okra is unexcelled in delicacy, and at the same time most health-sustaining because of its mucilaginous character, being an offset to many other dishes not conducive to comfort. The Landreths' Long Green Okra is the best form of this delicious vegetable, being the deepest green—a most desirable color. It is cultivated as easily as Corn, producing three-inch-long pods in thirty days from date of planting.

Lb.	¼ Lb.	Oz.	Pkt.
55	20	10	5

Landreths' Long Green Pod

Landreths' Long White Pod, 60 days.—New. Pods white, unusually long, often 10 inches, very slim. Exceedingly productive.....

Lb.	¼ Lb.	Oz.	Pkt.
55	20	10	5

Velvet Pod, 60 days.—Smooth, and of a velvet-like skin. Light in color.....

Lb.	¼ Lb.	Oz.	Pkt.
50	20	10	5

THESE PRICES
INCLUDE POSTAGE.

Parsley

Seventy Days from Sowing to Cutting. Two Ounces of Seed to 100 Yards of Row. Eight Pounds to the Acre.

The drilling should take place when the Cherry is in bloom, and may be continued until Autumn. If for horse culture, the rows should be 3 feet apart; if for hand culture, the rows should be 18 inches apart.

Single or Plain Leaved.	Used as a pot herb. Leaves flat and plain. Exceed-	Lb.	1/4 Lb.	Oz.	Pkt.
ingly aromatic.		\$0.80	25	15	5
Champion Moss Curled.	An improvement on the Fine Curled; more desirable.	1.00	30	15	5
Emerald, 70 days.	Very superior; very fine curled and twisted leaf of deep green color. A well-bred, very choice strain, short-jointed, tufted, certain to please...	90	25	15	5
Hamburg or Turnip-Rooted.	The thick roots are treated like Parsnip, valuable in flavoring soups, stews, etc. Roots somewhat resembling a Parsnip.	1.25	40	15	5

Onion—SEVEN WHITE SORTS

BERMUDA ISLAND.—The profit of this Onion is its extraordinary earliness. It ripens three to four weeks earlier than other varieties. The Bermuda White Onion is so astonishingly early in development as to be almost miraculous. Seed sown same time in the Spring as White Portugal, Yellow Danvers, or any other sort, will produce Onions 2½ to 3 inches in diameter before the others are 1 inch in diameter. The mature bulbs are white, waxy, flat and so mild as to be unusually palatable. Any party growing Bermuda Onions can have them three weeks ahead of White Portugal, five weeks ahead of Danvers, and a Market Gardener will find them to sell like hot cakes. We recommend the Crystal White Wax and the Bermuda White and Red in all Onion districts as sorts which will succeed and be found most profitable.

Crystal White Wax, 55 days.—Named by the Landreths in 1898; a half globe, a sort absolutely waxy-white and crystalline. Very early, earlier than White Bermuda, and of great reputation in Texas; an eight weeks' Onion.

4.00 1.25 40 10

White Bermuda, 60 days.—This variety is not a pure white, but has a tint of straw color.

Lb. 1/4 Lb. Oz. Pkt.
\$3.00 80 25 5

Extra Early Bloomsdale Pearl, 65

days.—In many respects the most remarkable Onion under cultivation, growing with the rapidity of a Summer Radish. Nine weeks from sowing to maturity, the bulbs pearly-white, waxy, translucent, form flat and broad. Flavor very mild, all astringent qualities being eliminated. Indeed, it can almost be eaten raw with the freedom of an Apple. The keeping qualities of the matured Onions are very good, but the sets sprout very early and should be planted in October. We can furnish sets in September. Those who have tried it always want it again because of its distinctive qualities. On a very rich soil it will grow sometimes five and six inches across the top.

SEEDS WHICH SUCCEED

ONION—Continued

**THESE PRICES
INCLUDE POSTAGE.**

Italian Queen.—An extra early small silver skin.....\$3.00 80 25 5

Bloodsdales Silver Skin or White, 85 days.—A mild, pleasant-flavored variety, admirable for family use. Not so good a keeper as the dark-skinned varieties, but better flavored and always salable.

Lb., \$2.00 ¼ Lb., 60 Oz., 20 Pkt., 5

Silver Skin or White Portugal.—An early white, flat Philadelphia variety.

Lb., \$1.90 ¼ Lb., 50 Oz., 20 Pkt., 5

Giant White Garganus.—Also known as Silver King; a giant late Italian variety.

Lb., \$2.00 ¼ Lb., 60 Oz., 20 Pkt., 5

Yellow Globe Prize Taker

FIVE YELLOW SORTS, FLATS AND GLOBES

Prize Taker, 90 days.—A mammoth Yellow Globe—similar to the huge Spanish Onions exhibited at fruit stands in Autumn. Does well in light sandy soils. Very large producer. A variety which will succeed under conditions where other sorts fail, consequently highly recommended for the Southern States. See illustration. Will make large Onions from seed in localities where others fail.

Lb., \$1.60 ¼ Lb., 60 Oz., 20 Pkt., 5

Bloodsdales Large Yellow Strasburg.—A reliable, widely cultivated variety, not Lb. ¼ Lb. Oz. Pkt.
so strong in flavor as the Red. Earlier than Red Wethersfield.....\$1.25 40 15 5

Yellow Strasburg or Flat Danvers.—A flat yellow Onion of early habit. Good keeping qualities. The best sort to sow for the production of sets..... 1.25 40 15 5

Bloodsdales Danvers, 100 days.—Oval in form. This strain will produce marketable bulbs in 14 weeks from date of sowing. Growers of Onions for the market will at once appreciate the importance of securing seed of unquestioned quality, and this we offer as such..... 1.70 50 20 5

Large Yellow Globe Danvers, 115 days.—An oval-shaped, straw-colored, long-keeping variety. Superior keeper to the flat Yellow Dutch..... 1.50 40 15 5

THREE FLAT RED SORTS

Bloodsdales Extra Early Dark Red, 100 days.—A variety of unusually early maturity for a large red. Medium size, broad, flat, deep red in color and an excellent keeper. Several weeks earlier than the Wethersfield Red. A special strain difficult to obtain elsewhere. Some selections of Onion seed sold as Extra Early Red are two weeks behind the Bloodsdales in period of maturity..... 1.50 40 20 5

Wethersfield Large Red, 120 days.—Be not deceived in Wethersfield, there are many types; some selections ripen in August, others in September, others as late as October. We need not say the variation in time makes a difference in price of product..... 1.50 40 15 5

Red Bermuda, 60 days.—The name of this variety is Red, but it is dashed with red on a straw-colored ground..... 2.70 70 25 5

THREE SOUTHPORT GLOBE SORTS

The Southports Succeed Best in Northern Climates

Southport Red Globe, 130 days.—A very desirable round red variety, heavy, a large producer and a good shipper. Very salable in market..... 1.75 50 20 5

Southport Yellow Globe, 110 days.—The Southport Yellow Globe Onion is a little more oval than the Danvers Globe, larger, more solid, heavier, not quite as early. Nothing excels the strain we offer..... 1.75 45 20 5

Southport White Globe, 120 days.—A showy large white variety. A very solid and heavy sort and a good keeper..... 2.25 60 20 5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Screening Onions.—This implies sifting out the dirt and dust and grading the Sets into two classes—that is, over and under seven-eighths of an inch diameter. The screening operations make the Bloomsdale Sets far superior to those generally offered on the market, as they are always under seven-eighths of an inch in size. SEND US YOUR ORDER FOR SETS. The best in quality. Landreth's Sets are without doubt the most solid and cleanest offered.

Onion Sets

Three Quarts of Sets to 100 Yards of Row. Ten to Fifteen Bushels to the Acre, According to Size.

WE DO NOT PAY POSTAGE ON ONION SETS OVER ONE QUART.

Landreth's Specialties in Onion Sets

We grow on our own lands many thousands of bushels of Sets annually and purchase additionally large quantities grown by our neighbors. We offer all the sorts usually grown and some sorts not offered by other Seedsmen, but by November are always sold out of past Summer's crop of **Pearl, White and Red Bermuda**, as they must be planted not later than November. We, however, offer the seed of Pearl at 45c. per ounce.

Packing Charges for Onion Sets: Crates, 2 bush. 25c.; 1 bush. 15c.; Barrels, 4 bush., 30c.; Sacks, 5c.

These extra charges should be included in remittance.

Market Gardeners cannot do better than with **Landreth's Seeds**. They are the acknowledged standard, and so referred to by all other SEED HOUSES at home and abroad.

Standard Varieties of Onion Sets—Now Ready Prices Fluctuate

These four standard sorts are always ready to ship in October, or at any other time up to May.

		Qt.	Bush.
Bloomsdale Extra Early Red (for description see reading matter, page 71)	about	25	Bushel
Yellow Strasburg (for description see reading matter, page 71)	"	25	prices
Red Wethersfield (for description see reading matter, page 71)	"	25	on

Trial Grounds.—Partial view of 400 tests of Peas, 310 tests of Beans, 156 tests of Tomatoes, and some thousands of tests of other Vegetables. This picture shows one of four sections of the Bloomsdale Trial Grounds, which various trials cover from eight to ten acres a year, but the entire Farm is really a Trial Ground on an immense scale—a ground from where are issued “SEEDS WHICH SUCCEED.” The observer must be convinced that we are familiar with the respective merits of all Garden Vegetables.

Peas

**WE DO NOT PAY
POSTAGE ON PEAS.**

Three Quarts of Seed to 100 Yards of Row. One and a Half to Two Bushels to the Acre.

Peas are among the first seeds that may be sown at close of Winter, frequently being planted before sharp frosts are fully over. The drilling of Peas may be safely commenced when the Peach is in bloom or as soon as the land can be plowed, and continued at intervals up to within sixty days of frost for the early kinds, or seventy days for the intermediate varieties, or eighty days for the later sorts. Late-sown Peas are never as productive as those sown in the Spring, and often are found to be subject to mildew. Landreth's Extra Early will be found to be the best for August and September sowings, because of its early ripening habit and its ability to resist mildew. The dwarf varieties may be drilled at 2 feet if cultivated by horse power, or 15 inches if to be hoed by hand. The varieties of medium length should be drilled not closer than 3 feet, and the tall-growing sorts at 5 feet apart. The number of Peas in a row may vary from 10 to the foot, in the case of the very dwarf kinds, to 8 to the foot of the medium tall varieties, and 6 to the foot of the very tall kinds. Yield 100 to 300 bushels. The Pea thrives best in light, loamy soil; the early and dwarf sorts demand rich ground.

ELEVEN EXTRA EARLY SORTS (None of them needing sticks)

	Peck.	½ Pk.	Qt.	⅓ Pt.
Landreth's Lightning Pea, 42 days. —So called because of its astonishingly early habit. Not so large a vine nor so productive as the Landreth's Extra Early, but quite four or five days earlier, and therefore is specially desirable to those <i>private gardeners</i> whose aim is to beat their neighbors in having the first Peas ready for the table.....	\$1.50	50	10	
Alaska, 49 days. —Green-seeded Extra Early. 24 inches. One of the best.....	\$1.50	80	30	10
American Wonder, 52 days. —Vine 8 to 10 inches high and very prolific in pods of striking form and size. In maturity it is among the first earlies. Very desirable in small gardens.....	2.00	1.25	40	10
Nott's Excelsior, 52 days. —An improvement on American Wonder, a shade earlier and larger podded. Vine almost identical. 10 inches.....	2.00	1.25	40	10

WE DO NOT PAY
POSTAGE ON PEAS.

PEAS—Continued

Landreths' Extra Early,
48 days.—White Oak

trees may be White Oak trees, but woodsmen know that there yet remains much choice among them, and just so with Extra Early Peas. A critical gardener wants the best strain as respects earliness, size of pod, flavor, uniformity of ripening, vigor and uniformity in habit of the plant. All these desirable qualities can be obtained in the strain sold as Landreths' Extra Early. This type will produce Peas fit for table in 44 or 50 days, according to soil and climatic conditions of the season of their growth. This Pea was introduced and named by the Landreths in 1823, and is the only Pea then used which has stood the test of time. Just as popular to-day as it ever was. Height of vine 2½ feet.

Peck	½ Peck	Qt.	⅓ Pt.
\$1.90	1.00	35	10

Landreths' Extra Early—The Red Bag Pea

Ameer

Ameer, 50 days.—Somewhat resembling the Gradus; not so large in pod, but quite near it, and more prolific. A very desirable variety for the Market Gardener. A choice Pea in any locality and for any purpose. 24 inches high.

Peck	½ Peck	Qt.	⅓ Pt.
\$1.90	1.25	35	10

Little Marvel.—Habit like Thomas Laxton, but far superior in every good quality. Showy pod. Very productive. One of the best novelties.

SEVEN INTERMEDIATE SORTS

Fifty-four to Sixty Days from Germination to Edible Condition.

Premium Gem, 54 days. —An admirable second early, 20 inches tall. A standard sort used in large quantities because reliable.....	Peck. ½ Pk.	Qt. ½ Pt
	\$2.00 1.25	35 10
Sutton's Excelsior, 54 days. —An improvement on the old Premium Gem. Short vine, 18 inches, very productive of long, broad, showy pods, of quite superior quality. Try this new variety, which is destined to be a leading sort.....	2.50 1.50	40 10
Carter's Daisy or Dwarf Telephone, 55 days. —So named as the sort resembles the Tall Telephone, but the vine is short as the Pride of Market and very sturdy, with thick stems and broad leaves. The pods are very long, broad, pointed and of a yellowish-green. A valuable sort, being quite early, productive and showy. 20 inches high.....	2.25 1.25	40 10
Landreths' Satisfaction Pea, 50 days. —This is a Pea which we believe will in time be admitted as something very superior, being of a stronger and more healthy growth of vine and a far heavier producer of pods than either the Gradus or Thomas Laxton, the pods being almost as long and broad, quite as fully distended, almost as attractive and far more profitable to the grower. The pods are the longest of any coming in as early. 2 feet.....	2.25 1.25	40 10
McLean's Advancer, 55 days. —A green, wrinkled variety; vine 24 inches; upright and vigorous in growth.....	1.80 1.00	35 10
Pride of the Market, 55 days. —A round blue Pea. One of the best. Height of vine 15 to 18 inches. Pods of enormous size, borne nine to ten on a vine, and containing as many Peas in each pod. 20 inches.....	2.25 1.25	40 10
Stratagem, 60 days. —A blue, wrinkled, marrow English dwarf Pea of rare excellence. Vine 20 to 24 inches, bearing six to seven immense pods.....	1.90 1.00	40 10

NINE LATE SORTS

All these Late Varieties do best with sticks to support them. Sixty to Seventy Days from Germination to Edible Condition.

Yorkshire Hero, 60 days. —A showy, wrinkled variety, maturing after the Little Gem. It is hardy, productive and better than Champion. 36 inches.....	Peck. ½ Pk.	Qt. ½ Pt
	\$1.80 1.00	35 10
Bloomsdale Peas, 60 days. —Sold by us to truckers as a grand and steady picker; enormously productive in large pods containing nine to ten Peas in a pod. One of our customers in ordering Bloomsdale Peas says that he found them the most productive variety he ever planted; that he realized an average price of \$1.00 per basket, or \$300 per acre. 40 inches.....	1.75 1.00	35 10
Dwarf Champion or Juno. —Only half the height of vine of the Champion of England. Pods large and well filled. 20 inches.....	2.00 1.25	40 10
Admiral Dewey, 60 days. —Mammoth, showy, dark pods. 48 inches tall.....	1.75 1.20	35 10
Telephone, 65 days. —Large, wrinkled seeds. Height of vine 4 feet, producing from seven to ten showy, straight pods containing nine to ten Peas in a pod.....	2.00 1.20	35 10
Main Crop Long Island Marrowfat or Telegraph, 65 days. —Used profitably by Market Gardeners in New Jersey in place of the old White Marrowfats; being productive, more showy in the basket and far better in flavor, the pods having somewhat the appearance of Telephone, but are earlier by 4 or 5 days. 2.00 1.25	35 10	

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

------	------	----	----

Neapolitan.—Mild in flavor. Fruit upright. A variety in which the length is equal to twice the diameter, a sort exceedingly productive, yet so remarkably early for a large-size fruit as to be classed among the Extra Earlies. A variety free from hot or burning qualities, that is to say it is very sweet and mild, particularly suitable for domestic use. A variety especially adapted for shipping, as the fruit retains its plumpness and color for a remarkable length of time.....

Irish Cobbler Potatoes—Observe the deep eyes, flat sides and angularity

Potatoes

One Bushel of Potatoes Cut into Sections of 3 to 4 Pieces will Plant 400 Yards of Continuous Row. An Acre will Yield from 200 to 600 Bushels, according to the locality, soil and manure.

IRISH COBBLER.—Most popular of any early variety; very early, productive, excellent. The Irish Cobblers are approximately priced at \$5.00 per sack of 165 pounds.

BLISS TRIUMPH, or RED BLISS, or STRAY BEAUTY.—Popular in the South because very hardy and free from disease. Very early; tubers round and red; very healthy. Approximate price, \$5.00 per sack of 165 pounds.

We sell Potatoes in sacks of 165 pounds, which is the contents of a standard barrel; but some other seedsmen sell only 10 pecks to the sack, weighing 150 pounds, and thus quote a low price.

Our stock of Potatoes which we send out has gained us much celebrity for purity and good measure. We do not buy Seed Potatoes from blight-affected districts, but are having the stock specially grown for us on virgin soil in Aroostook County, Maine.

Pecks, bushels and sacks sent by Express or Freight, at expense of purchaser. No charge for Potato sacks or cartage.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

POTATOES—Continued

OTHER STANDARD VARIETIES

Other Varieties on Application

Early Ohio.—A full week earlier than the Early Rose; not so long, but in many respects similar. Everywhere one of the standards; dry, mealy.

White Bliss, or Junior Pride.—Early, hardy, white skin and flesh, round, very healthy, free from rust.

Early Rose.—True stock and just as good as when it was first introduced; still a standard.

Rural New Yorker.—Very popular; good cropper; profitable.

Improved Green Mountain.—A heavy producer; fine quality and very handsome. The best all round late Potato.

State of Maine.—Intermediate in ripening; tubers LARGE AND WHITE; good keeper; very profitable.

Spaulding's No. 4 Rose.—Especially desirable for Market Gardeners. The tubers are large, medium length and more or less flattened; color light pink or flesh-tinted. Eyes medium to large and shallow, and of the Rose type. It is a heavy yielder and a medium sort of good table quality. The price of the Spaulding is 25 cents a sack higher than ordinary varieties.

Late Beauty of Hebron, or White Elephant.—Large and superior to the old Beauty; heavy cropper.

Early Sunlight.—Tubers white, of medium size and set close together at the root; of good appearance; eye shallow. Stalks close set and vigorous. Its habit is extra early, and therefore largely used by truckers.

Varieties named in order of maturity.

Approximate price, \$4.50 per sack, except where noted. At the date of the printing of this Catalogue actual prices cannot be determined. Consequently, we ask all interested in Potatoes to write to us for prices per sack of 165 pounds.

Chartier or Long Rose, 35 days.—In color the greater length of the root is scarlet and pink, while the point and bottom portions are white.....

75	20	10	5
----	----	----	---

Landreth's All Seasons, 50 days.—A round, red variety, so named because it is edible at all seasons of the year. From 1 to 3 inches in diameter, at which development it continues to possess its original juiciness, sweetness and solidity, and age and size, when other sorts are pithy and entirely valueless. It will keep in perfect condition all winter. We have grown broad fields of this Radish in September and October, and kept them like Potatoes in pits in full perfection until April, when planted out for a seed crop. No other Winter Radish is its equal in quality, and because of its very showy deep scarlet appearance it is a revelation. It is fine for Winter use, keeping admirably.....

Rhubarb

Four Ounces of Seed will Sow 100 Yards. Ten Pounds to the Acre.

Propagated by buds from old roots or from seed. To raise seedlings, sow the seed when the Cherry is in bloom, in rows at 1 foot, and thin the plants to 10 inches. To set the seedlings or the buds from old roots, mark out the ground 3 x 4 or 4 x 4 feet, preparing a rich bed for each plant.

Success can only be attained on well-manured ground. The fertilizing cannot be overdone.

We supply roots as well as seed. They continue vigorous many years. They are shipped only by express, being too heavy for the mails.

Linnæus Seed.—A strong early sort; stalk deep green. Pkts., 5c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.25.

Victoria Seed.—Stalks thick, long, red. Pkts., 5c.; oz., 15c.; ¼ lb., 40c.; lb., \$1.50.

Rhubarb Large Roots.—Per dozen roots, \$1.50, by freight or express; per 100, \$9.00.

Rhubarb Smaller Sets—that is, cuttings made from the entire roots.—Per dozen sets, 75c., by freight or express; \$5.00 per 100.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Spinach—Eight Sorts

Six Ounces of Seed to 100 Yards of Row. Thirty Pounds to the Acre. Edible in 40 to 60 Days.

This seed may be sown late in Autumn or in the Spring when the Peach is in bloom.

Leaves of Bloomsdale Spinach—Notice the puffed-up or swollen-out leaves
Blue Bag Spinach

	Lb.	¼ Lb.	Oz.	Pkt.
Bloomsdale, 40 days. —The Landreths introduced and named this variety in 1828, since when it has become a standard and now appears in nearly all catalogues. As an Autumn sort it is superior to all others, but in the Spring it is inclined to shoot early. The leaves are twisted and bloated, giving them when ready for shipment an elasticity adapting them for transportation to long distances and at the same time giving the crop large measuring qualities. As a consequence far more barrels of Bloomsdale Spinach are cut to the acre than any other variety, often as much as 150 barrels. The illustrations partly indicate the twisted and bloated character of the leaves. Our Bloomsdale crop was immense in vigor and of absolute purity.....	35	15	10	5
Round Savoy Leaved, 42 days. —Sold by other houses as Bloomsdale . We here offer seed of Spinach of that variety which is sold by other seedsmen as Bloomsdale Spinach at a low price. To those who are looking for a cheaper article we recommend this.....	30	15	10	5
Long Standing Round Seed, 45 days. —A prostrate variety of thick leaves and dark color. Slow to shoot to seed, and valuable for that reason.....	35	15	10	5
Viroflay, 48 days (monstrous leaved). —A mammoth sort of fair quality, used largely in Europe. Requires high manuring.....	30	15	10	5
Ever Ready, 50 days. —So named because it continues in cutting condition three weeks longer than the latest. A variety of most superior qualities; leaves dark in color, more pointed, short-jointed, resisting cold and the most intense heat. Decidedly the best for spring sowing. A good successor to Bloomsdale, leaves being dark in color, thick and bloated.....	35	15	10	5
Long Season, 50 days. —Leaves dark in color, almost black; savoyed, thick, succulent and tender. Slow to shoot to seed; consequently remaining long in cutting condition. Stronger and more desirable than the Victoria. Excellent for spring seeding, as it is slow to shoot to seed.....	35	15	10	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Victoria, 50 Days. —A sort continuing long before shooting to seed; dark-leaved, compact growth. Valuable—try it. Is excellent as a succession	Lb.	¼ Lb.	Oz.	Pkt.
	35	15	10	5

New Zealand, First cutting 50 days after sowing, and continuously for 100 days more.—Absolutely distinct in form, color and habit. Foliage thick, succulent, dark green, never sunburns, a true heat resistant, leaves covered with water globules like an ice-plant. Later to mature for table than Spinach of usual form, but remaining in edible condition ten times as long. A sort to "cut and come again," as it is most productive, and continuously over a period of 100 days sends out a fresh growth. The plants spread five times as wide and rise to three times the height of ordinary Spinach, making a difference of fifteen to twenty times excess in the volume of edible material. Excessive heat does not check its growth, but to the contrary it positively grows more luxuriantly, the driest weather never stopping its juicy and rapid growth. In flavor and color it is fully the equal of the best Spinach and is in season when ordinary Spinach is not obtainable, and with epicures will undoubtedly be considered very choice. No garden is complete without the New Zealand Spinach. Remains in cutting condition throughout the hottest summer months when the true Spinach is nowhere obtainable, and remains in cutting condition until killed by frost.....

Golden Summer Crook-Neck

View of Comparative Tests of one hundred of the leading varieties of Tomatoes. It is only by a comparison of this kind, where all sorts are assembled together and where the conditions of soil, climate, manure, time of planting and culture are the same, that their comparative merits can be determined.

Tomato

THESE PRICES
INCLUDE POSTAGE.

One Ounce of Seed will Sow 100 Yards. Ripening for Table 85 to 120 Days from Sowing, According to Variety and Season.

When the Apple is in bloom sow in hills three feet apart, on a warm border, early in the Spring. For a later supply sow a short time afterwards in a more open situation. As the plants advance in growth support them by brushwood. To have the Tomato *very early* it is necessary to start the plants in a hot-bed, or they may be reared in a flower-pot in a window and subsequently transplanted.

Plants for an early crop should be raised under glass. For intermediate crop they may be raised on outside beds. For late crop the seed may be planted in permanent position when the Apple is in bloom. The average production of fruit, per acre on cultivated and fertilized land is about 14,000 pounds, or say 250 bushels per acre, though twice that quantity has often been grown.

The Tomato vine is a rank feeder and especially needs nitrogen, otherwise known in one of its forms as ammonia. Stable manure is rich in ammonia. So is nitrate of soda, nitrate of potash and also that commercial fertilizer known as dried meat, dried blood, or chicken guano. For Tomatoes, which are soft wooded, ammonia is more desirable than potash or phosphoric acid, which are in their turn more valuable in the growth of hard-wood plants or of grains which make hard straw.

Go for nitrogen or ammonia and we are sure you will be satisfied with the results.

BLOOMSDALE GROWN TOMATO SEED

In purchasing Landreth's Tomato Seed the buyer is certain of the absolute purity of what he buys, as every fruit producing Bloomsdale Tomato Seed is grown from selected Seed. In the case of Landreth's Bloomsdale Tomato Seed, every crop is produced from Seed saved from hand-selected fruit of the preceding year—fruit, every one of which was closely inspected and approved as to shape, size, color and general appearance, and, what is more important, only fruit saved from vines of approved development.

TWENTY-FIVE RED SORTS

Earliana, 90 days. —Very early. Habit of vine dwarf and compact. Fruit borne in clusters of from 10 to 15 in a bunch. A remarkable variety and one which is in good favor among Market Gardeners. It is, however, not as early as the Landreth's Morning Star. In South Jersey for market shipment this early sort, picked with the first blush of ripening, has driven out all varieties, three-quarters of the entire acreage in South Jersey being of the Earliana. TOMATO—Continued

*Landreth's Northern Latitude. An Ever-bearer, 90 days
2 to 2½ inches in diameter*

Landreth's Northern Latitude.—An ever-bearing, smallish, second-sized sort. A sort so named because of its early habit of ripening its fruit and its adaptability to be grown along the northern border of the United States and over the Canadian line, consequently well adapted for use by Northern gardeners. A decided novelty of high merit because of its early ripening habit and exceedingly great productiveness. Most astonishingly productive in fruit borne in clusters of 5 to 8 and very many clusters, the whole clinging to the branches of the plant like eggs in a nest and affording as large a tonnage to the acre as many large-fruited and later sorts. Fruit deep red and perfectly round, second size, averaging 2 inches in diameter, invariably ripening up to the stem end, and free from cracks and green core. Both fruit and vines very healthy, foliage deep green, and branches borne to the ground by the wealth of fruit which it is impossible to bear up. Vines and fruit so resistant to disease that the variety might be termed a rust-resistant sort.....

Lb. ¼ Lb. Oz. Pkt.

\$5.00 1.40 40 10

Chalk's Early Jewel, 95 days.—Ten days later than Landreth's Northern Latitude, much larger, globular fruit, smooth skin, flesh bright red, scarlet and solid. The fruit very free from cracks or any convolutions upon the surface. Vines strong in growth, dark green and very hardy. A good market garden sort. Recommended for Northern climates. The Landreth strain is decidedly one of the best Tomatoes. Try it with confidence, as it is early, productive and very choice. We offer Bloomsdale grown as follows.....

days.—Unusually productive. Very showy and distinctive, both in vine and fruit. Not the old Potato Leaved, but immeasurably superior. Vines spreading and vigorous, stems thick, leaves very dark and broad, like a Potato, and often larger than a man's hand. The physical vigor of the plant is assured by its great breathing or lung power. Fruit brilliant red, full sized, round or full at bottom or blossom end. Fruit free from cracks or core and both fruit and vines very healthy. A very desirable sort, ripening fruit earlier than Paragon, one week earlier than Stone, but by far a more showy sort. It is a variety of new features and of very superior excellence. A very valuable quality of the No Substitute, in addition to its productiveness and distinctiveness, is its tough rind, resisting injury by rough handling or in long transportation. Very productive.

Lb.	$\frac{1}{2}$ Lb.	Oz.	Pkt.
\$5.00	1.40	40	20

Coreless Scarlet Globe Tomato, 100 days.—Round in form.

Flesh bright red and meaty. Outside and inside walls so solid as to make it a valuable variety for every purpose. The chief peculiarity of this variety is its entire absence of central core so general in other Tomatoes.

Lb.	$\frac{1}{2}$ Lb.	Oz.	Pkt.
\$2.40	70	25	10

Globe Tomato, 95 days.—As its

name signifies it is a globe, although sometimes it inclines to be olive-shaped, that is longer than broad. It is early, smooth, of a purple-red, very showy, very productive and desirable. Grown in Florida on thousands of acres for shipment to Northern cities. No stock is superior to Landreth's, as is reported by most experienced Tomato farmers, men who grow Tomatoes for the profit which the crop brings them. One of the best for shipping, as it stands transportation better than any other sort.

Fine-grade Seed:

Lb.	$\frac{1}{2}$ Lb.	Oz.	Pkt.
\$3.00	1.00	30	10

Crown Picked Seed, as its name indicates, is first ripened fruit, produced near the root, consequently far superior to the regular crop which is picked from the entire plant. What we offer to Market Gardeners is **Crown Picked Stock** from selected plants and is well worth the price of \$5.00 per pound.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

TOMATO—Continued

Landreth's Ten Ton—Very choice—100 days

Landreth's T. T. T. or Ten Ton Tomato, 100 days.—So called

because when first introduced by us 10 tons were produced to the acre. On Bloomsdale we have grown 600 bushels of fruit to the acre. The fruit in form is large, slightly flattened at both stem and blossom ends. The skin smooth as an Apple. Color blood-red. The meat solid, free from air spaces or hard cores. It is a profitable variety to all growers.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.00	80	25	5

Delaware Beauty, 100 days.—Fruit of intermediate size, ripens a fine red all over and without cracks, round and solid, remarkably smooth, very productive. Fine either for domestic use, for market or for factory.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$5.50	1.50	50	20

Perfection.—A superb Tomato, near the character of the Paragon.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.25	60	25	5

Landreth's Ever Large, 110 days.—So

named because the fruit keeps its size from the first to the last ripening. An exceedingly productive sort, three-quarters of the quantity of fruit weighing over one pound, and a very large proportion of the remainder one pound and a half.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$3.75	1.00	35	10

Paragon or Royal Red, 100 days.—Large, solid and smooth as an Apple. Deep red in color.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.75	75	25	5

Landreth's Ever Large—110 days; always large

Cumberland Very Large Red, 110 days.—Used in South Jersey by Tomato Canners. A reliable cropper, solid, good color; a little rough, but so exceedingly productive as to be a wonder.

Lb.	$\frac{1}{4}$ Lb.	Oz.	Pkt.
\$2.75	75	35	5

Crimson Cushion, 110 days.—Mammoth-fruited, some specimens often weighing over a pound and a half; a little rough, but exceedingly meaty and very showy.

LANDRETHS' RED ROCK TOMATO
NO VARIETY IS ITS EQUAL

Showing entire freedom from splits and small cavity at stem end. Average weight 9 oz. to a fruit; range of weights from 8 to 12 oz. Very often borne in clusters of four or five, sometimes six or seven.

Landreths' Red Rock. — 110 to 115 days from seed sowing to ripe fruit. A wonderfully fine variety, extraordinarily solid, and free from an excess of water, smooth as an Apple, red as it is possible to be. No sort is its superior in texture or flavor. An extraordinarily heavy producer and an excellent shipper. Recommended to truckers and growers for canning factories as very showy and productive. Fine sorts, and profitable because of its great yield and little waste. Every grower who has raised it praises it above all others for its profitable qualities. **UNDOUBTEDLY THE FINEST LARGE RED TOMATO NOW IN USE.** This Summer we saved seed from 250 acres of Red Rock grown on Bloomsdale Farms. The Bloomsdale soil produces plants of exceptional vigor... \$4.50 1.25 40 10

LARGER FRUIT THAN STONE

In purchasing Landreths' Red Rock Tomato Seed the buyer gets a larger and denser Tomato than Stone and is certain of the absolute purity of what he buys, as the fruit producing every Seed was grown from selected Seed of the preceding crop of Landreths' Red Rock. Every Seed of Landreths' Red Rock is grown on Bloomsdale Farm and is absolutely reliable, which is not the case with Seed from some others.

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

TOMATO—Continued

	Lb.	¼ Lb.	Oz.	Pkt.
Stone, 115 days. — <i>A very superior sort, producing extraordinarily thick, solid red fruit, borne in bunches. Very productive.</i>	\$2.50	75	25	5
Favorite, 115 days. — <i>Dark red in color, ripening evenly and holding its size to the end of the season; very prolific, good flavor, few seeds and solid.</i>	2.50	75	25	5
Matchless. — <i>Large half-flat, red, solid fruit. Very productive. One of the best.</i> ...	2.75	75	25	5

SEVEN PURPLE SORTS

June Pink, 95 days. — <i>A very early and productive pink form of Earliana. The best early pink on the market. Fruit solid and borne in more profusion than in the case of the red Earliana.</i>	3.00	80	35	10
Duke of York. — <i>A very large scarlet or red-purple, extra heavy Tomato. Very smooth, solid and meaty. Producing enormous crops, a good shipping fruit, really of the highest merit.</i>	3.40	90	35	10
Dwarf Champion, 100 days. — <i>Stems short, thick, stiff, almost self-supporting. Grows like a tree. Leaves very dark in color, much curled and twisted. Fruit borne in showy clusters, quite large, nearly round, solid, red color with purple tint. By reason of its erect, stiff habit, transplanting with absolute certainty. No seed at any price is superior to Landreth's.</i>	3.00	80	25	5
Acme, 105 days. — <i>An early ripener, size medium. Shape slightly oval and smooth. Color reddish-purple; flesh deep scarlet and solid. A popular sort everywhere.</i> ...	2.25	60	25	5
Ponderosa, 110 days. — <i>A monster purple fruit; quite rough and containing very few seeds. Very choice. The best stock to be had from anyone.</i>	4.00	1.25	40	10
Buckeye, 110 days. — <i>Large, red-purple, solid, very showy. An astonishingly good smooth sort.</i>	3.50	1.00	30	10
Beauty, 110 days. — <i>Well named. Fruit large and showy; color deep red with slight tone of purple; growing on the vines in clusters. Solid, meaty, smooth and free from rot.</i>	2.25	60	25	5

THREE PRESERVING OR PICKLING SORTS

Plum-shaped Yellow, 95 days. — <i>Differing from the Plum-shaped Red in color.</i>	2.90	80	25	5
Plum-shaped Red. — <i>Fruit 2 inches long by 1 inch diameter, used in pickling in unbroken form. Differing only from the preceding, the Yellow, in color, this being red.</i>	2.90	80	25	5
Grape, Cherry or Currant. — <i>Fruit red and borne in clusters like grapes; very desirable for pickles. Fruit no larger than a small cherry.</i>	3.00	85	25	5

ONE YELLOW SORT

Golden Trophy or Golden Queen, 100 days. — <i>A bright yellow type of Trophy; large, early, solid and far better flavored than any of the red varieties.</i>	2.90	80	25	5
---	------	----	----	---

Salsify or Oyster Plant

Edible 90 Days after Planting.

This plant produces an edible root, long and slim, white-fleshed and smooth white skin. Leaves gray-green, long, straight and narrow. It is a native of the south of Europe, but only within the present century used as a culinary vegetable. Sow when the Cherry is in bloom, in drills, *in deeply dug and well-manured ground*; the drills should be 18 inches apart. When the plants are up a few inches weed and thin them so as to stand 4 to 5 inches from each other. Preserve in pits, same as Carrots or Beets. Cultivate in all respects as directed for Carrot. Requires deep, rich land. Yield 100 to 150 bushels.

Sandwich Island, 90 days. — <i>A variety superior to the French sort, producing smoother, larger and more vigorous roots, foliage stronger, and altogether superseding the old form.</i>	Lb.	¼ Lb.	Oz.	Pkt.
	\$1.25	35	10	5

For Express charges paid by customer, or small seeds Postage paid by us, see inside of cover.

Turnip

THESE PRICES
INCLUDE POSTAGE.

TEN WHITE-FLESHED SORTS

Three Ounces of Seed will Sow 100 Yards of Row. Three Pounds to the Acre. Matures for Table in from 60 to 90 Days, According to Variety and Season.

	Lb.	¼ Lb.	Oz.	Pkt.
Extra Early Red-Crowned Milan, 45 days. —Undoubtedly the earliest Turnip in cultivation. Very desirable in its early stages, but after it gets one and one-half inches in diameter it grows pithy.....	\$1.00	35	10	5
Extra Early White-Crowned Milan, 45 days. —Similar to the Red Milan except in color. Useful in early stages of its growth.....	1.00	35	10	5
Early Flat Red or Purple Top (strap-leaved), 60 days. —The oldest standard red. Purple on crown, with white bottom.....	60	20	10	5
Early Flat Dutch (strap-leaved). —Similar to the above, excepting it is white all over.....	60	20	10	5
Large Early Red Top Globe, 65 days. —Large size, rapid growth, unusually attractive and admired by all. A very much heavier producer than either of the preceding. We confidently recommend it. No sort is its superior. Will produce more tons to the acre than any other sort.....	60	20	10	5
Early Snowball (extra early). —This is a small white globe, earliest in maturity of its form and character. We highly recommend it.....	70	25	10	5
Jersey Lily, 65 days. —Early, globular in form, very showy and desirable; all white. Recommended for private and market garden.....	70	25	10	5
White Egg. —A sort forming roots the shape and size of eggs in an incredibly short period after sowing. Flesh always palatable.....	70	20	10	5
Landreths' Southern Snow-White Globe, 70 days. —Color pure white; shape round, size large, solid, quick in growth for a large Turnip. Producing a great weight to the acre. In the Autumn and early Winter it is apt to be hard, but mellows like an Apple by keeping. We recommend this to stock breeders for early feeding, also for sowing at seasons too late to succeed a crop of Ruta-Bagas..	60	20	10	5
Cow-Horn (large cropper). —This variety is pure white, excepting a dash of green at the crown, and in shape is long like the Carrot.....	60	20	10	5

FOUR YELLOW-FLESHED TURNIPS

Golden Ball. —Roots medium size, quick in development; always well-shaped. Color golden, both inside and outside.....	60	20	10	5
Amber Globe, Green Crowned, 75 days. —This, which we introduced in 1863, is almost indispensable in every rural household. It is a vigorous, free grower, valuable for both table and cattle feeding. Productive and a good keeper.....	60	20	10	5
Amber Globe, Red Crowned, 75 days. —A selection from the older green-crowned Amber Globe. The same in all valuable particulars, but more ornamental by reason of the contrast in colors of yellow and red. Immeasurably superior to Aberdeen. Equal for table use to Ruta-Baga.....	60	20	10	5
Yellow Aberdeen or Scotch Yellow. —This is a highly approved Cattle Turnip.....	60	20	10	5

SIX RUTA-BAGAS

Swede—Landreths' Particular. —Very superior to any other Ruta-Baga under any name. Shape round as a ball. Deep purple on upper half, deep yellow on lower half. Very few roots. Flesh exceedingly tender. Quick to mature. Price one dollar a pound. Those who wish Ruta-Baga at a lower price must get another variety than the Landreths' Particular	1.00	40	20	10
---	------	----	----	----

THESE PRICES
INCLUDE POSTAGE.

TURNIP—Continued

Bloomsdale Swede or Ruta-Baga (maturing in 90 days). Lb. ¼ Lb. Oz. Pkt.
—The Bloomsdale is quite wonderful in its fine breeding. In nothing that we offer are the effects in selection and in careful breeding so apparent as in this Ruta-Baga..... 75 25 10 5

Landreths' Improved Yellow-Fleshed Purple-Top Ruta-Baga, 80 days.—A hardy, ovoid-rooted sort of heavy cropping habit; flesh yellow, solid, deep purple..... 70 20 10 5

Market Garden Ruta-Baga, 90 days.—Similar to the Bloomsdale Swede, but not so large. Grown largely by Market Gardeners to sell for table uses..... 70 20 10 5

Champion Swede or Yellow Ruta-Baga, 90 days.—A superior English-grown Ruta-Baga, but not equal to the Bloomsdale Swede..... 60 20 10 5

Sweet German.—By some called White Ruta-Baga; the flesh being white, hard, thick and well-keeping. Far better flavor than the Yellow Ruta-Baga.

Lb. ¼ Lb. Oz. Pkt.
60 20 10 5

Seven-Top—Notice the seven leaf buds spring out of the crown at distinct points

A VARIETY GROWN
FOR GREENS

Seven-Top (for greens or salads).—This may be left standing in the open ground during Winter as far north as Philadelphia. In the Southern States it yields in the Spring abundant foliage for boiling with cured meats, and is in much demand.

Lb. ¼ Lb. Oz. Pkt.
60 20 10 5

To Cottage or Private Gardeners

This Seed Catalogue is written in such clear language that anyone can understand the descriptions of Garden Vegetables, Ornamental Flowers and everything else offered for sale, which descriptions are by all odds more complete as to detail and accuracy than found in any other catalogue, because the descriptions are not extracted from other books, but are from intense observations in the fields and trial grounds. The order of arrangement of varieties is such that makes every item easily found and when found easily understood, even by the most inexperienced gardener, who no doubt is completely "obfuscated" in attempting to understand most seed catalogues with their unsystematic arrangement and extravagant descriptions so often misleading. Compare the orderly arrangement of this Catalogue with the hodge-podge arrangement of many others.

The Seeds offered are not surpassed in quality by any, yet our quotations are often at lower prices than found in other catalogues.

In the sale of Landreths' Seeds there is no guarantee that their use will produce definite crop results because of varying conditions of soil, climate, time of planting, manner of cultivation, over all of which Landreths have no control, and the Seed is sold with this distinct understanding.

POSTAGE INCLUDED IN POUND PRICES

Field Seeds, Tobacco, Bird Seed

Bird Seeds and Foods (postage included).

Mixed Bird Seed.—The Seed, thoroughly re-cleaned and free from dirt, is put up in square packages. These packages contain a mixture of Canary, Millet and Rape Seed in correct proportions, with a separate package of Hemp Seed (to be given occasionally), also a piece of Cuttlefish Bone, thus comprising everything necessary for the sustenance of Cage Birds, and we feel certain they will give entire satisfaction to our customers.
per lb., postage paid, 22c.; 25 lbs., by express, for \$3.25.

Canary Seed Unmixed	per lb., 26c.
Hemp Seed	per pt., 18c.
Lettuce Seed	per lb., 25c.
Maw Seed	per lb., 25c.

Rape, English	per lb., 20c.
Rape, German Summer	per lb., 20c.

Broom Corn.

Evergreen . . per 100 lbs., not prepaid, \$6.50; per lb., 20c.

Buckwheat.

Japanese per bush., \$1.50; per lb., 15c.
Silver Hull per bush., 1.60; per lb., 15c.

Cotton Seed.—100 lb. prices on application.

Five Sorts of Upland, postage included . . . per lb., 30c.
Money Maker is especially recommended. Ask for circular.
One Sort of Long Staple Sea Island, postage included per lb., 35c.

Flaxseed per 100 lbs., \$5.00; per lb., 15c.

Millet.—Prices on application.

Hemp Seed per 100 lbs., \$4.50; per lb., 15c.

Osage Orange postpaid, per oz., 10c.; per lb., 60c.

Peas.

Field Varieties.—Prices on application.

Canada per bush.
Cow Peas per bush.
Southern Clay per bush.

Rape Seed.

Dwarf Essex . . per 100 lbs., by express, \$9.00; per lb., 24c.

Rice.

Wild, Freight or Express, not prepaid . . . per lb., 30c.
mailed, 40c.

Rye.

White.—Pure strain of White Winter Rye . per bush. \$1.25

Thousand-Fold.—A very strong grower, tillering out better than any other sort, and consequently drilled thinner, only six quarts being required to sow an acre. The straw grows seven feet high, and has grown eight, producing forty bushels to the acre per bush. 1.25

Spring per bush. 1.50

Sorghum.

Grown both for molasses and forage.

Early Amber.—This variety of cane is of *extra early* maturity, and is, therefore, infinitely superior to other varieties which ripen so late as to afford but little time for pressing between the periods of maturity and frost.
per 100 lbs., \$5.50; per lb., 15c.

Early Orange.—Fuller than the Amber, thicker in stem, more foliage per 150 lbs., \$5.50; per lb., 15c.

Sunflower, Russian.

Per lb., 22c. By Express or Freight, not prepaid, per 100 lbs., \$9.00; per 25 lbs., \$2.50.

American Tobacco Seed.

Like all other cultivated plants, Tobacco has its various forms, qualities and applications. Red clay subsoils with rich top soils generally produce the best dark, rich export Tobacco. Soils composed of sand or gravel with subsoil of light brown or red clay develop the best stemming Tobacco and fillers. Flat lowlands of alluvial soil give the best cigar types. Limestone soils, dark and rich, are the only soils adapted to White Burleigh, which when well grown is very choice. Slaty soils produce the best quality of the yellow wrapping sorts.

The varieties intended for purposes as indicated under the various classifications.

Many more varieties could be added under each classification, but those sorts enumerated are the best which can be selected.

For Yellow Plug Wrappers.

History of the D. Landreth Seed Company

- 1784**—The Landreth Seed Business was established in Philadelphia in 1784, its founder being David Landreth, born in England, 1752. The first place of business was on High Street (now Market Street), the exact position being just above Twelfth, then a location well out in the country.
- 1798**—The original firm designation was David Landreth; but in 1798 the firm title was changed to David & Cuthbert Landreth.
- 1808**—In 1808 David and Cuthbert Landreth conducted the business at three locations: (1st) at the principal Seed Store on Market Street near Twelfth, (2d) at the southeast corner of the old Court House, (3d) on the farm near the United States Arsenal.
- 1818**—In 1818 a branch was established at Charleston, S. C., the street numbers being 351-353 King Street, and the business continued 44 years, until, in April, 1862, it was confiscated by the Confederate Court.
- 1836**—In 1836 the title was David Landreth & Company.
- 1854**—In 1854 a branch Seed Store was established at St. Louis, Mo., and continued until the depression subsequent upon the outbreak of the Civil War.
- 1876**—In 1876 the title was changed to David Landreth & Sons.
- 1904**—In 1904 the title was changed to the D. Landreth Seed Co. It will be perceived that this is the oldest Seed House in America, and carries upon its books the names of many families, customers of over 100 years' duration, one an annual purchaser since 1792, that being 122 years ago.

THE ADDRESS IS

D. LANDRETH SEED COMPANY
BRISTOL, PENNSYLVANIA
